Harman kardon bta 10 bluetooth wireless adapter

Top Reviews Recent Top Reviews OVERVIEW Do you have a good sounding home theater receiver, powered speaker, or iPod® doll that lacks the ability to play music wirelessly? Simply plug the Harman Kardon BTA 10 into any powered speaker or system with either a minijack or stereo RCA input and add Bluetooth capability. The compact BTA 10 can be hidden while still allowing you to stream music wirelessly from your Bluetooth-enabled phone, tablet or computer to your existing audio setting. allows wireless music playback from Bluetooth-compatible smartphones, tablets, music players, and computersHARMAN TrueStream™ technology ensures high-fidelity audio over Bluetoothrange: 33 feetLED indicator lets you know when adapter is searched and successfully paired with your Bluetooth device59 mini-to-RCA adapter cable included59 stereo mini-to-mini cable included2 W x 2H x 5/8Dwarranty: 1 yearOur 60-day money-back guaranteeMFR #BTA10 Add-on Bluetooth receiver: Harman/Kardon BTA10 external Bluetooth receiver allows you to add Bluetooth wireless audio streaming to your existing home entertainment system. Your system simply needs a free help or audio input. Now you'll be able to wirelessly stream audio from your Bluetooth-enabled device to your home audio system. Wireless audio streaming: Harman/Kardon BTA10 features Bluetooth A2DP technology, which allows you to wirelessly stream audio from your Bluetooth-enabled device to your home entertainment system. You'll be able to stream stored music and music apps on your Bluetooth-enabled device to your home stereo system. Compatible Bluetooth enabled devices include Apple iPod/iPhone/iPad, Android smartphone/tablets, Windows PCs, Macs, and more. You will continue to control your music and view song/artist information from your Bluetooth enabled device. You can pair up to 8 Bluetooth source devices, but you can only connect and use playback at a time. Note: Due to the differences in Bluetooth technology, some Bluetooth-enabled devices may be incompatible, malfunction, or may not support all features when used with H/K BTA10. Harman TrueStream Technology: Harman TrueStream is H/K's guarantee that you will experience the best possible listening experience when streaming wirelessly via Bluetooth technology. Because there are many connectivity options when it comes to Bluetooth technology, Harman/Kardon engineers always use the most up-to-date and most advanced method. This process ensures the highest quality sound regardless of the application or source device. Analog Audio Output: The Harman/Kardon BTA10 Bluetooth receiver is provided with a single stereo minijack (3.5mm) output which allows it to connect to your home AV receiver's help or audio input. A 59 stereo mini jack cable and a 59 stereo Provided. AC power adapter: Harman/Kardon BTA10 BTA10 off of standard household current using the supplied external AC power supply (input: 100-240V; output: 5.0V/400mA). adds wireless music playback to your existing stereo or home theater system built-in Wi-Fi® and Bluetooth® allows you to play music wirelessly from smartphones and tablets free Harman Kardon Controller app for Apple® and Android™ offers easy Wi-Fi® control, settings adjustments and music selection and playback and Q& A Q how this compares to Metra Helios BTA is HK worth the extra $? [THOMAS Dec 28, 2020] 5 answer A I do not know how it compares to the subway Hellios, but I am very happy with it. [Jeremy Dec 29, 2020] A I have no experience with Metra Helios. I have bought two of Harman Kardons (for different Hi-Fi systems) and I am more than satisfied. [RUSSELL December 28, 2020] A I don't know about bta but he works well [ARTHUR P Dec 28, 2020] A They're not really comparable products. Harman Kardon BTA 10 is for connecting computer to audio equipment via blue tooth, for streaming music. It does not process HDMI inputs. [FITZHUGH 28 Dec 2020] One I hooked mine to the receiver I use in the garage and just this weekend after 8or 9 months, it won't connect anymore. So my answer is probably not. [MARIO Dec 28, 2020] Q Does it allow bluetooth headphones to connect to a non-Bluetooth enabled receiver via the headphone port? [Buck29 Dec 27, 2020] 4 answer A I can't answer that [WAYNE Dec 30, 2020] A To be honest, I never tried. I don't own Bluetooth headphones, so I can't answer this question. Sorry. This device is used to receive Bluetooth signals from a mobile phone and send it to a non-Bluetooth receiver via RCA cables. [howard J. 28 Dec 2020] A It's a receiver, not a transmitter. Think of it as an input de ice, not an output device. [Bill 27 December 2020] A Yes, just think of it as an aux input source you give your receiver. Send to speakers, or turn off speakers and listen to headphones. [Anonymous Dec 27, 2020] Q I currently use Logitech part number 980-000910 in 3 slots, 1 at home, and 2 at work. They are constantly connecting, beeping when it connects and disconnects, and when you disconnect it, you reconnect just a few seconds later and either have to unplug it or remove it from your paired items list in android to use a different Bluetooth connection and no volume control from your phone. The question is whether this device works better and addresses these issues? Logitech has a decent assortment but the other issues are annoying. Thank you [C&S Dec 20, 2020] 4 answers A This works great. I have it connected to my HK receiver and I stream my music through it. Never a hiccup. [Frank Dec 20, 2020] A I had trouble getting harmon/cardon to connect to Bluetooth at all, the opposite of your problem. I ended up a receiver with built-in bluetooth. [Sharon 20 December 2020] A I own 3 of these and have had no problems at allEnter [terry Dec 20, 2020] A This device makes no noise of any kind and, at the moment, I've had zero connectivity issues. It doesn't auto connect to any of my devices so, you shouldn't have the issue of unwanted connect. I use this with my garage system while Im in the garage but it will also connect to my surround sound receiver in the basement. [joshua Dec 20, 2020] SHOW MERSHOW LESS ARTICLES Jak hodnotíte popis produktu? Zatím nikdo nepřispěl do diskuze, buďte první! Bluetooth adaptér od Harman Kardon je tak univerzální, že více jste si till ani nemohli představit. I když je primárně určen pro zesilovače a receivery této značky, jeho univerzálnost spočívá v tom, že je ho možné využít kdekoliv chcete. Bluetooth adaptér je vlastně zvukový zdroj a stačí ho zapojit do AUX-IN nebo AUDIO-IN vašeho zařízení. A nemusí to být jen značka Harman Kardon. Za přijatelnou cenu dostanete univerzální řešení. Technická specifikace: - Paměť párování: 8 zařízení - Odstup signálu od šumu (1 V RMS): 85 dB - Frekvenční rozsah (-3 dB): 20 Hz - 20 kHz - Napájení: 5 V; 400 mA - Bluetooth: Bluetooth 2.1 + EDR's A2DP - Dosah příjmu: 10 m - Rozměry (V x Š x H): 16 x 50 x 50 mm - Hmotnost: 0.45 kg Obsah balení: - Bluetooth jednotka - Napájecí adapter - Cable jack ↔ jack - Cable jack ↔ RCA 11225 Harman Kardon BTA10 1.95 1.9500 GBP OutOfStock A lovely small adapter, bta 10 produces excellent sound for a reasonable price.
