(note: some of these will also work for other versions) To combat the third female Ninja, who is hidden, you must take the following steps on stage just before you reach question marks in the single game. Here are the steps: 1. In the match before question marks, you must win one of the rounds using only Low Kicks and Directional Buttons. 2. The other round can win normally, so only one round must win in the above way. 3. After you meet these requirements and have defeated your opponent, you will fight Jade at the Goro's Lair stage. Smoke is a grey male ninja similar to Scorpion. This is the way to fight him. When fighting on The Portal stage in a 1 or 2 player game, you can fight Smoke by taking the following steps. 1. After making an Uppercut, Dan Forden can appear at the bottom of the screen and shout 'Toasty!'. 2. When this happens, press and hold Start + Down (even if Dan Fordan has left the screen). 3. If done correctly, then you will fight smoke at goro's Lair stage. You can only fight Noob Saibot in a 2-player match. To do so, you must win 50 matches in a row (25 matches in some versions of the game). Once you have reached the 50th match, if done correctly, you will face with a mysterious dark ninja called Noob Saibot on Goro's Lair stage. Your grandfather's. is a play about the names of the co-creators of Mortal Kombat: John Tobias and Ed Boon. One of the most interesting stage deaths in Mortal Kombat 2 is pit on the Kombat Tomb stage with thorns on the roof. Once you have completed your opponent and performed Pit Fatality, hold down on both player 1 and player 2 of the controller. This will cause your opponent to slip out of the spikes after death. On the character selection screen, player 1 can highlight Lui Kang and press Start + Up to have the computer choose a random fighter for you to play as. Player 2 needs to highlight the Reptile and press Start+Up. After selecting your character in 2 player mode, hold down and punch high on both controllers until the match starts. Cheat Code List 1. Fight Noob Saibot - At the Select character screen press left, up, down, down, right, select. 2. Fight Shao-Kahn - At the Character Select screen press Right, Up, Up, Right, Left + Select. 3. You'll now see the Test Mode option, where you can change the different features. 4. How to Make Raiden's Fergality Fatal experimental mode as described above. Then there's the on the Oooh option, annoying. Now, you have to play as Raiden on the Armory stage (stage 6). When it comes time to do your finisher, stand at any distance and hit L, L, L, BLK. Your opponent will turn into one of Mortal Kombat's creators! 5. Mad Shao Kahn Glitch First do cheating test mode as described above. Now put the First Player into No Damage. Then set the 2nd Player to One-Hit Kill. Now you will get a strange response after you have defeated Shao Kahn. After the credits are over, Kahn will return for a round of 3, 4, and 5. Although you can beat him, if you get hit the game will freeze before he is about to explode. Once it gets frozen, you just need to re-set your game. 6. Kung Lao death in the first round Glitch Enter cheat test mode as described above. Now turn on One-Hit Kills for Player 1 and start a 2-Player game. Choose Kung Lao as one of the characters (the second player can be anyone). When the match starts, there is Kung Lao doing nothing, but Hat Throw moves his (back, front, low punch) while there are other opponents standing still. Then on the second round do the same thing. When it says Finish Him!, there's Kung Lao performing Hat Throw Fatality (keep the punch low and hit back, come back, forward then release the low punch). Then there are other players Continue. Now choose Kung Lao again and the second player can choose any other character. As soon as the first round begins, there is Kung Lao making his Hat Throw move immediately. This will do a strange glitch and the hat will cut off the head of the person as if you had made a fatality! You can also have other players move towards you, then as you work move their bodies will slide on the floor! Test Mode Cheats Menu - At the Options screen, highlight 'Done', and tap: Left, Down, Right, Right, Down, Left, Left, Left, Left, Right, Right, Right. Cheats Menu Code - On story screen press: Down, Up, Left, Left, Left, A, Right, Down, B, Y, C. Unlock Noob Saibot – Complete 2-Players challenges 25 times in a row to unlock Noob Saibot as a playable character! Blood Code: At the plot screen, tap: A, B, A, C, A, B, B. Cheat Mode: Press Down, Up, Left, Left, A, Right, Down at the start screen and optional. Flag effect in cheat mode: When you use the cheat mode code and go into the cheat menu, at the bottom of it is the 'flag' that you can turn on or off. Here's what each one does: - Top A man flying over the moon on pit stage: FLAG 3 - CPU will use death to finish you: FLAG 6 - Fight the WHOL tournament on the same stage: FLAG 7 - Infinite credits: FLAG 5 5 Objects flying over the moon on pit stage: FLAG 2 - One hit kills CPU: FLAG 0 - One hit kills you: FLAG 1 - Will give you Reptile's clues between each fight: FLAG 4 Green Effects: While you fight Reptile, pick up controller two and press start. Now when the player selects the display, Sub-Zero and Scorpion will be green. Fight Reptiles: When you are fighting on the pit stage, sometimes in the background strange objects will cross the moon. If this happens, you have to beat the opponent with a perfect double (in other words don't get hit) and you have to do your character's death on the opponent when it says 'FINISH HIM' at the end of the secound round. Once these requests have been met, an on-screen message will appear saying 'You've found me now prove myself!' and you'll fight reptiles at the bottom of the pit. Reptiles have all the special moves of Scorpion and Sub Zero and die and move very fast. Secret Sonya: Enter the cheat menu code, and then pop two flags and three flags. Set up the base plan for the first three and maps to pit. Fight your way to match the second stamina. This should also be fought in the pit unless you have to continue along the way. If you are not in the pit, let the computer opponents kill you and continue until you get into the pit. Then double perfect and start the match with reptiles. Since this is the endurance ring, you will have to fight two reptiles. If Sonya is the second of the second endurance ring, then the second reptile will be the secret Sonya. This Sonya glows green, has a ball punch that changes into a Scorpion-like spear, and her ring attack will freeze you like Sub-Zero's ice. iLikeCupcakes 06-01-10 10:47 AM 5/5So screenshots!
