## Lowes acrylic sheet 8x10

We make a complete selection of clear UV resistant plexiglass®, clear and colorful plexiglass, infra-red transmitting, UV filtering, UV transmitting and plastic plexiglass mirror acrylic plastic sheets. Plexiglass® brand is characterized by clear acrylic sheets. Several sheet sizes from the stock are available: 4x8, 4x10, 4x12, 6x10, 8x10 in clear. Large sheet size available in thickness 4 thick. We are an authorized plexiglass® plastic distributor and supply source – and have been for over 60 years! Thinking about buying a plexiglass sheet at Home Depot or plexiglass in Lowes? This thin movie isn't the masked stuff you see there. They don't cut and frankly, we're less expensive and offer an array of services so you do exactly what you want. Square, rectangle, trapezide, circle - you draw it, we can cut it! Family owned and operated, ePlastics is the place to buy Plexiglass sheets — the only best Plexiglass sheets are sold here. Note: Plexiglass is naturally UV resistant. It is not yellow and absorbs much of the UV spectrum. Acrylic or Persex sheet is the same material as plexiglass acrylic plastic sheet. Plexiglass - On eplastics we stock, cut, ship, and manufacture plexiglass® acrylic sheets it's easy to order. You just buy the discount plexiglass acrylic sheet size closest to your requirement, then we can cut your final size for plexiglass windows etc. Just enter the size you need when ordering and adding a labor item. We will save on self-size cut plexiglass sheets typically shipping costs — small packages cheaper via ship UPS. We share a wide variety of plexiglass - clear acrylic plexiglass sheet panels, cell cast acrylic plastic sheets, acrylic glass sheets, shapes, tinted, colored, non-glare plexiglass, plastic mirrors and textures. We are one of the largest independent plastic distributors and fabricators in the United States. We stock all the major brands of plexi acrylic sheet: plexiglass sheet, acryllite, lucite, persex® and optics, as well as a variety of specialty colors and textures such as frost plexi glass and clear plexiglass mirror as well as colors of plexiglass mirror. Quantity discount on plexiglass sheets. Our cutting and shaping capacities are our main qualifications. Our 10' x 10' CNC controlled saws from our CNC 8'x8' router to our mini mill machine centers – when others can't. I We can! If you don't see it, call us! Looking for cheap plexiglass sheets or discounts? We ship colors and clear acrylic plexiglass nationwide, to Canada, and internationally. Our shipping prices are the lowest as we ship not only from our headquarters, but from regional manufacturing and shipping hubs across the United States. Plexiglass® Brand Acrylic Usually misspelled in the form of plexiglass, plexi glass, flexi glass. Plexiglass Sheet - Plexiglass's manufacturer, courtesy the acrylic sheet family of Arkema Group Inc. Persex® Sheet Sheet A tradename for acrylic sheets known worldwide - such as lucite® acrylic sheets. Plexiglass® acrylic sheet is considered the industry's standard as it was first introduced 75 years ago due to its unsurpassed quality, ease of use and wide range of colors, patterns, thickness and sizes. Since its launch, the plexiglass® family has continued to expand and now includes plexiglass® G, MC, Q, T, UF and frosted acrylic sheet formulations. PLEXIGLASS® Plexiglass Sheet Cleaning Instructions Maintenance and Cleaning - Washing - A Lightweight Soap or Detergent and Plexiglass Wash with Lukewarm Water Solution® Sheet. Use clean soft cloth or sponge and solution as much as possible. Rinse thoroughly. Dry by blotting with moist cloth or chamois. We recommend Brillinz or Novus polish sold on this site. Do not use: window cleaning fluids, diarrhea compounds, gritty fabrics, solvents such as lead or ethyl gasoline or alcohol, acetone, carbon tetrachloride, etc. Use good grade naphtha or kerosene to remove tar, oil, paints, dried masking paper, etc. Users of these solvents should be familiar with their properties to handle them safely. Wash and clean as above. Polishing - apply a thin®, even coat of automobile paste wax (not a cleaner-wax combination) with soft clean fabric to protect the surface of the plexiglass and maintain its brightness. Lightly buff with a clean cotton flannel or jersey fabric. After polishing, wipe with a clean damp cloth to keep any electro-static charges on the ground that can attract dust particles. Antistatic coatings - These coatings can be used to prevent the accumulation of electrostatic charge. Underwriters listings are listed as components accredited by Underwriters Laboratories - Plexiglass® G and MC Sheets, Colorless and All Colors, Underwriters Laboratories with 94HB's UI Flame Class. Clearly these products are only suitable for external use in contact with ultraviolet light, water, exposure or excrement according to UL746C. These products in all colors have been subjected to one or more of the following tests: ultraviolet light, water exposure or immersion in accordance with UL 746C, where the acceptability for outdoor use is to be determined by Underwriters Laboratories. Clear Acrylic Plexiglass - Plexiglass Acrylic Sheet Products Plexiglas® G Cell-Cast Acrylic Sheet Plexiglas® G P-95 / DP-95 Plexiglas® MC Acrylic Sheet Plexiglas® Matte Finish Plexiglas® Frosted Acrylic Sheet Plexiglas® Clear-Edge Frosted Acrylic Sheet Plexiglas® T Acrylic Sheet Impact Series Plexiglas® Q Acrylic Sheet Plexiglas® SQ Acrylic Sheet (Sign Grade) Plexiglas® UF-3, UF-4 and UF-5 Acrylic Plexiglas® Perfection® Standard and Non-Glare Finishes For Picture Framing Plexiglas® SB Bullet Resistant Acrylic Sheet Plexiglas® ELIT II (Edge-Lit Technology) Acrylic Sheet Plexiglas® Vision Sheet Plexiglas® Dr® Acrylic Sheet Plexiglass - Plexiglass® G Cell-Cast Acrylic Sheet Premium Architectural-Grade Plexiglas® G satisfy the requirements for all high performance cast acrylic sheets applications. Plexiglass® G is created by a cell-casting process that provides the following features: best optical-quality, highest long-term design tension, better weather, ease of construction, and the highest degree of chemical resistance available in acrylic sheets. Plexiglass® is naturally UV resistant. It is not yellow and absorbs much of the UV spectrum. There are other grades that absorb the most harmful wavelengths and others that transmit full spectrum. Plexiglas® G sheet is available in colorless, white transparent and many transparent colors as well as P4 one-sided patterns. Plexiglass G is sold in a variety of thicknesses, and is available in 4', 5' and 6'x8', 4x10, 6x10 as well as large size sheet sizes on request. Plexiglas® G-P-95/DP-95 acrylic sheet plexiglas® G standard acrylic P95 sheet has a side pattern. It is an additional texture that provides decorative effects and spreads annoying surface reflection. Matte finish is available only on one side. The P-95 is constructed through a cell-cast process that meets the requirements of almost all high performance applications. Matte finish is available in many colors with sheet sizes ranging from 48 x 96 to 72 x 96. Thickness ranges from 118 to 944. Plexiglas® MC Acrylic Sheet – Our standard grade listed on this site plexiglas® MC is an affordable sheet known as melted calendaring. It offers many similar high quality features such as Plexiglas® G. In addition, it has exceptional thickness tolerance and can be thermoformed in more detail. Plexiglas® MC Sheet Sign is available in white, black and more than 30 transparent and transparent colors. MC is available in a wide variety of sheet sizes and patterns with thickness from 0.060 to 0.354. Plexiglas® MC Matte Finish is an industry standard. Plexiglas® MC is a continuous process acrylic sheet that provides exceptional thickness tolerance. Now available in Matte Finish, this versatile sheet offers more design possibilities. A choice of P95, MC Matte finish offers a wide range of sizes to fabricators to improve yield and reduce costs. It is ideal for displays, point purchase items, construction applications and general fabricated parts. Available in standard width with standard length of 48, 51, 60, 63, 72, and 75 and 96 and thickness from 100 0.060 to 0.354. Plexiglas® Frosted Acrylic Sheet is designed for use in point-of-purchase displays, illuminated signage, and as a light diffuser, the plexiglass frosted sheet is made from an acrylic resin that includes a frosting mechanism that is integrated throughout. Sheet structure. This mechanism provides a textured finish on all surfaces, with no secondary finishing required. In point-of-purchasing displays, frosted effect scratches and fingerprints hide, and requires less cleaning to maintain an attractive surface. Since the scattering mechanism is an integral part of the structure, surface scratches and cleaning have no noticeable effect on optical properties. Unlike surface embossed textures, plexiglas® frosted sheets will maintain their frosted look after thermoforming. Designers will find the new frosted sheet attractive for lighting, shelving, tabletop, background and visual display. Plexiglass - Product Offerings: Standard Product Offering: Colorless and 3167 Light Green Gauge/Green Gauge mm) 63 X1000.220 (5.5 mm) 72 X960.236 (6mm) 72 X1000.354 (9mm) 75 X1000.472 (12mm) Additionally, Plexiglas® Frosted Sheet is now available in standard thickness of 0.118 (3mm) and a sheet size of 51 x 100 in the following colors: 3160 Light Grey3161 Light Bronze3162 Dark Blue 316 3 Light Blue3164 Dark Red 3165 Black Opaque3166 Medium Blue W3172 White Translucent Plexiglas® Clear-Edge Frosted Acrylic Sheet Plexiglas® Clear-Edge Frosted was designed using resin technology similar to plexiglas® frosted sheets. An added advantage is the application of a new process technology that has a frosted effect on both sheet surfaces, highlighting the clarity of the colorless or colorful clear edge. Designed in response to growing demand for matte finish looks, the middle clear layer of the sheet is sandwiched between thin layers frosted up and bottom. Clear-Edge Frosted is the ideal choice for designers looking to create attractive lighting, shelving, tabletop, background and purchase display point. Frosted surface maintains all the properties associated with our current frosted sheet material: \* Effectively diffuse lightbr \* Hides fingerprints and scratches \* Requires less cleaning and maintenance \* Plexiglas® clear-edge frosted is sold in standard width of 48. Standard lengths of 51, 60, 63, 72 and 75 and 96 and 100. \* Plexiglas® Clear-edge frosted 0.177" is available in thickness range of 0.472. \* Colorless, glass green 3030 and blue edge 3120 are offered. Additional colors are also available. \* Clear-edge frosted can also be sold in one-sided formulations. \* Plexiglas® Standard and Non-G Glitzy Finish for Picture Framing® \* Altuglas International offers a complete line of plexiglas® acrylic sheet products designed to meet the needs of picture freshers, museums and galleries. Standard and non-glare finishes provide excellent optical quality which is 17 times stronger and 50% lighter than the equivalent piece of glass. Introduced in 48 x 96 sheet sizes with thickness ranging from 0.060 to 0.236. \* Plexiglass - Plexiglas® SB Bullet Acrylic Sheets \* Plexiglas® SB sheet comes from UL752-level I for use in bullet-resisting applications associated with small arms. This us patent number is 4,505,972. The material is available in the shape of 4', 5' and 6' x 8' sheets. Plexiglas® SB provides a lightweight, crystal clear option versus bullet-resistant glass or polycarbonate of the same UL class rating.
