Feels good man meme

From baby dancing to cute cats and political photoshop, memes spread far and wide. They make us laugh, think, and come together. But what is a meme? Evolutionary biologist Richard Dawkins, known for his popular books on science and atheism, created the term in his 1976 book *The Selfish Gene*. The word itself is a combination of genes and the Greek word for imitation, and he claims that culture is a means of transmission. Decades later, we were inundated with entertaining and influential memes thanks to internet culture. The BBC recently wrote about how memes are so important in our daily lives, bringing news, ideas and humour in one clever little package. Memes can help us relax about serious subjects. They also spread like jokes to give us a humorous point of view. Iconic meme stars usually get unexpected roles, and like the world-famous Grumpy Cat, they can capture our hearts. Yuri_Arcurs/Getty Images After adult entertainment, cat pictures and videos are the most popular content on the internet. It's no surprise, then, that cat memes are so popular that some entrepreneurs make a good living trade in them. This meme evolved into a book and a day-to-day picture calendar, where cats comment on their lives that we can all relate to. Sonsedska/Getty Images A demo of a CGI graphic or computer called baby dancing may be the first widely distributed meme-style image. Short, silly, or interesting clips followed, such as that of video blogger Gary Brolsma synchronising lips and signaling in front of his computer to Romanian pop song Numa Numa. His production values were horrendous, but the experience caught on, and through the magic of sharing memes, he became world famous. Vlogging has become a very lucrative YouTube business for entertainers of all ages. fizkes/Getty Images The text typed over the iconic image is their own meme category. The overly attached girlfriend has crazy eyes and bears quotes like letting the lights on so I can watch you sleep. Success Kid fist-pumps while touting his victory like buying concert tickets online. Many of these random photos - Success Kid is just one of many pictures his mother posted on the photo-sharing site - have been recognized as big brands. In the crossover, the world-famous Grumpy Cat, featured on many grumpy themed memes, also appears on Friskies cat food packaging. Andrew Rich/Getty Images Through captions, photoshop modifications and lucky photography, memes have provided incredible political and social satire. One notable example is the photograph of the Prime Minister Boris Johnson, who is almost similar to US President Donald Trump, was spoken to by Queen Elizabeth. Balloon caption from the Queen reads I think you've returned to America. yulian11/Getty Images Quoting It's a trap! of Star Wars is a popular photo commentary on social It may be used, for example, as a humorous response when someone announces their plans to visit a friend online in person. Characters from movies, television, and comics can appear in streaming comments to make the point more graphic and humorous than words alone. Albert L. Ortega/Getty ImagesCute, or kawaii in Japanese, cartoon creatures and emoji characters from Japanese pop culture are popular memes. Hello Kitty is one of the most famous, along with Chococat and other related pictures. Pusheen is a fat grey cat who is involved in everything from sleeping to enjoying food, giving meme-style comments like answers to What are you doing? in the messenger app -- Pusheen eating pizza says it all. Even poop emojis have become popular online and offline memes. Poop emoji hats, T-shirts and even night lights are available. Attridge/Getty Images Even everyday photos can be memes when they accurately express a common experience. Images that read a thousand words can now be used in emails and messages to share feelings of joy, despair, loneliness, and joy without words. When these images are used as memes, they bring a special clarity of message, because everyone knows what a picture of a lonely man means. The same goes for a very poignant sports photo or an expression of a child's happiness -- the a mentioned Success Kid is a great example of that, even without a caption. RobHowarth/Getty Images Memes do for free what the company spends millions trying to achieve: get the message out. Unsurprisingly friskies hired Grumpy Cat to be their spokesperson, and Success Kid appeared on billboards for Virgin Media to announce that his parents were getting HD channels at no extra cost. Dos Equis created the ad concept with jonathan goldsmith's caption as The Most Interesting Man in the World. Presented in the form of a captioned meme, he took off online with hundreds if not thousands of parodies like I don't always listen to the Rolling Stones, but when I do, my neighbors. BrianAJackson/Getty Images Memes aren't just entertaining. As Richard Dawkins knows, they do bring ideas and opinions in an infectious form that spreads rapidly from person to person. Social networks provide greater speed than previous emails. Although most memes are funny, memes are a vehicle for more possibilities. PeopleImages/Getty Images To top off a year of subversive memes, the internet offered us a treasure trove that is He's Not Your Man last weekend, a bait-and-switch meme that uses absurdist humor to show classic bad behavior in couples, while mocking relationship advice. It begins with a pleasant stab at a lolopsided relationship by listing the common characteristics of an ugly partner: he ghosts you, doesn't listen, is rude to waitstaff, etc. Then the pivot list, becomes hyperspecific to indicate the an actual horrible man in history or fiction:This is a flexible meme, with versions that apply to raccoons, the New York City subway, and the fictional killer Count Olaf. Even Dr. Seuss's Cat in The Hat is called to be a freak, and Clippy, the annoying Microsoft Word Office Assistant is given a full meme treatment:This, like most memes, is quite silly, but also very relatable. Most of us not only take ugly dating advice (requested and vice versa), but memes also speak to a deeper truth about relationships: that sometimes we stay in them despite the behavior of trademark red flags. As it turns out, cleverly using the concept of relationship advice as a template to show the many terrible things - often celebrated - men in history have done. After all, he's not your man is a gracious reminder that even if he's not the corrupt leader of an ancient Roman province or a sentient paper clip—if he's always late and can't text back, well, woman, he's not your man. It's been a great year for the LGBTQ community. With its rapid roller coaster shift in public policy and correlated social responses, gay rights advocates in particular have run the gamut from win to downtrodden and back again, albeit slightly annoyed. By Supreme Court June 26 Obergefell v. Hodges' verdict, which legalized same-sex marriage, things are finally starting to look up. But the tide of equally aggressive anti-gay sentiment that comes with it is less pleasant, and more recently, a group of state employees have even taken it on their own to make things more frustrating by denying same-sex couples their legal rights under federal law. Fortunately, we'll always have memes -- specifically these gay rights memes that make things a little better (or at least make you laugh long enough to ignore the bigoted Facebook rants that your friend's mother just posted). Instead of replying to your aunt Jesus' sad post by replying that Jesus might be cool with the LGBTQ community, or trying to defend your well-researched points regarding the historical origins of non-heterosexual relationships on internet comment boards (please, God - never read the comments section), you can whip up one of these cute babies and give yourself a good laugh. Picture: We Heart It; We Heart It; Know your memes; ImgFave; Ryt; Meme Center; ImgFlip; QuickMeme Keep up with the latest daily buzz with the BuzzFeed Daily newsletter! It's safe to say that memes have taken over the internet, and they're constantly evolving every day. From simple images with little editing to photoshopped images complicated, memes come in all shapes and sizes. But creating your own memes can feel intimidating, especially if you don't feel confident in your computer skills. So we've created an easy instruction guide to help you create memes to share with family and friends. Step 1: Do your research Know your memes: It's good to see memes that have gone viral, especially the latest. This can inspire -- there may be certain meme themes that are popular nowadays, for example -- or let you know if someone has already tried your idea. The best resource to catch up with the latest memes and trends is Know Your Meme-- a website dedicated to keeping track of any and every meme you come across. The image above, for example, has been re-customized into a meme-dom on several occasions. Keep an eye on trends: Keeping current with news, pop culture, and other memes can be a great source of inspiration. Instagram, Twitter, Reddit and Facebook are great for seeing trends. Entertainment topics usually win. Notice what makes you laugh the most and what gets the most responses. The recent meme to make the rounds is one known as the Slaps Roof of Car meme. Choose a subject you can relate to: If you're not a sports fan, you may have trouble selling sports-themed memes. Cute animals are always a great way when you're tapped out of ideas, but if you really want to push the envelope, choose a public figure you can easily emulate. If you want to use personal experience as the center of your meme, choose one that's easy to associate. Define media: The easiest media to use is photos, but if you can be funny or capture something funny on camera, you might want to browse into the video. Step 2: Create your content Collect your material -- Before going any further, this is the point at which you decide whether you will come up with your own stuff or recycle the things you find online. If you're doing photo memes and want to use existing content, take the appropriate screen from the video you want to use. You can also browse the web for the image you want to use as a peg, or hit the Imgur meme generator. Keep it short and simple -- Keep in mind that the typical internet user's attention span is quite short, so you want to make an immediate impression. It comes with catch phrases that use simple and memorable language. Find the right expression to convey -- Make sure your visuals match the sentiment you want to describe. Step 3: Find the necessary tools If you are creating photo memes, it might be wise to get Photoshop. You can also search for meme-generator sites such as the Imgflip meme generator, which lets you upload your own photos to use as backgrounds. Finally, you can install a photo app directly on your phone that lets you add text to your images. Step 4: Create a You have your photo -- it doesn't matter if you take it, grab the screen, or find it online -- you can use any of the services below. Imgur Meme Generator (web-based) When you get to generator, you must log in to your Imgur account or create one. Then click Upload New Background. Next, drag your picture into the box at the top of the pop-up window, click the Browse button to upload the image from your computer, or paste the image or URL. In the text box just below the Browse button. Once you've done that, Imgur automatically uploads your images and takes you to the editing page. Once your photo is ready, it will appear on the Imgur editing page, where you can type text that will accompany your picture. Here, you can do all sorts of things, like move text and resize it. Be sure to name your meme before clicking Create This Meme! The Up Next page gives you a lot of options on what to do with the meme you just created. If you want to save it for later, just right-click the picture and save it to your computer. You can also copy the link so you can share it later. If you don't want to save an image on Imgur, pay attention to the Delete Post link, because it will only appear once. Otherwise, you can add it to your Imgur account. Congratulations, you just created a meme via Imgur! Meme Generator Free (iOS/Android) If you're most creative while on the run, consider Meme Generator Free zomboDroid, currently available for iOS and Android. Download the app and click the photo icon in the upper right corner on iOS and in the lower right corner on Android. Doing so will allow you to access your own photos, although Meme Generator also has a lot of stock imagery to choose from! Select the photo you want and the app will automatically take you to the next step. Your screenshots will then be prompted to choose the layout of your meme and its quality. For layouts, you can choose between Classic and Modern. Classic simply layers your text on top of your image in one traditional line above and one line at the bottom. Modern just puts your text on top of your picture. For quality, you can choose between Normal and High (Normal produces faster results than High but may have lower image quality). After you've made your selections, select OK. Screenshots On the next screen, you can add text, you can add stickers and emojis, and even add effects. When you're done editing, you can select the Save icon to save the image or select the Share icon to share it. You can share it to social media apps like Instagram, Twitter, or even send it to an email address. Or even text it. It's as simple as that with Meme Generator Free! Now, what about creating video memes? Although not as simple in nature as still memes, memes have a place in the world too. Below are some resources you can rely on to capture, create, and share video memes without the need to know how to use expensive and complicated programs like Adobe's After Effects and Apple's Final Cut Pro. Instagram After After After app, tap the Instagram plus sign icon in the middle of the bottom menu bar, then tap Stories. To start recording a Story or short video, press and hold the white circle in the center. Once you're done with the clip, release it, and you can then add things like text, stickers, or other effects. When you're ready to share a Stories video, just tap the Your Stories icon in the lower-left corner. Your Instagram Story videos will disappear from the app after 24 hours unless you save them or add them to your profile. Snapchat Snapchat in recent years has become a popular solution for sharing short videos with friends. After launching the app and getting your subject in the shot, you'll want to press and hold the large circle, which starts the recording process. You can record videos without time restrictions, and all in one shot. Once you're done, you can add all kinds of emoji, text, and effects to your video to make it appear -- just like you would if you took a picture. You can even save clips too: look for the down arrow icon in the lower left corner of the screen after you finish recording your clip. It's a good idea to share it with your story or friends -- that way anyone who follows your snap will be able to see your artwork up to 24 hours after you pick it up. However, if you save your video, you're free to post it elsewhere for the world to see, including Reddit, YouTube, Facebook and Twitter. Step 5: Share memes aren't really memes if you keep them to yourself. The most important part of creating memes is online exposure. Share it on the social networking sites of your choice, such as Twitter and Facebook, to make it official. Editor's Recommendations
