Microsoft Mouse and Keyboard Center is an app that helps you make the most of your Microsoft keyboard and mouse. Mouse and keyboard center helps you customize and customize how you work on your PC. This latest version includes these new features or improvements:- Smart Switch now supports both the mouse and the keyboard.- Use Spotlight to show people what you're talking about during an online meeting – just click the mouse to put a reflector on one side of the screen. - Adapt your mouse and keyboard to meet your unique needs and style of work. - Change mouse and keyboard settings to make it easier to use the unique features of most PC apps. Effortless transition to Mouse and Keyboard Center from existing device management apps: - Launch the app from Windows Start. - View and change the basic and app-specific settings for all connected devices in one place. - Explore features with descriptive pop-up and let InfoTips. - Includes access to an online library to/troubleshooting. - Includes access to a healthy online computing guide for tips about working more comfortably on your computer. About keyboard packages: Install the appropriate keyboard software and the system will be able to recognize the device and use all available features. This will also make it possible for owners to configure additional typings. If additional keyboard accessories are connected, this step can also improve the overall stability and compatibility of the package as well as performance. Therefore, if you want to install this version, make sure your computer's operating system is supported, save the package, extract it if necessary, run the available configuration, and follow the on-screen instructions for a full installation. Note that while other platforms may be compatible, we do not recommend applying this software version to configurations running under Operating Systems other than those specified. That said, if you consider applying the current version, download and install the package. Also check with our website whenever you can in order to stay up to speed with the latest releases. It is highly recommended that you always use the latest version of the available driver. Try setting a system restore point before installing a device driver. This will help you if you installed an incorrect or inappropriate driver. Problems may occur when your hardware device is too old or no longer supported. The package provides the installation files for SideWinder X4 Mouse (Mouse and Keyboard Center) Driver version 9.3.139.0.In to manually update the driver, follow the steps below (next steps):1. Go to Device Manager (right-click My Computer, choose Manage, and then find Device Manager in the left pane)2. Right-click the hardware you want to update, and choose Update Driver Software3. Choose to select the location of the new driver and browse to the folder where you downloaded the driver It is highly recommended that you always use the latest version of the driver available. Try setting a system restore point before installing a device driver. This will help you if you installed an incorrect or inappropriate driver. Problems may occur when your hardware device is too old or no longer supported. Microsoft Drivers Keyboard Drivers Mouse Drivers Download the latest version of the Microsoft SideWinder X4 Keyboard (IntelliType Pro) driver for your computer's operating system. All downloads available on this site have been scanned by the latest anti-virus software and are guaranteed to be virus and malware-free.
