Imperial cooking bdo

See below for Imperial Crafting Delivery NPC names and locations. Old imperial Crafting Delivery boxes can no longer be produced. However, if you already have them, you can still deliver them to Imperial Crafting Delivery NPC. Check the item's manufacturing costs and the cost of selling the item at The Market before you decide to cook imperial. Many items make more silver through Marketplace. is very useful in determining whether a prescription is profitable. One of the game mechanics that makes Black Desert Online stand out from other MMORPG games is imperial craft. In simpler terms, imperial crafting is a unique activity in the game that allows you to earn excellent silver sums through the art of life skills combined with trading. It is consistent with two primary skills, which are imperial cooking and imperial alchemy. Imperial cooking and imperial alchemy are a unique subset of trading that involves cooking or alchemy to perform these activities. Use the imperial craft to make trade boxes that you can sell to NPC for a good profit. Imperial Cooking Imperial Cooking offers a wider range of cooking recipes that will make a lot of silver. You can create and pack different materials to sell Imperial Crafting Delivery Trader NPCs in exchange for silver. When interacting with these NGCs, the options bar will appear and a list of materials will be displayed. The boxes you want to focus on are those named Apprentice Cooking Box -> Guru's Cooking Box (depending on your cooking level). If you move above the box, as done in the picture below, you can see what foods can be used to create the imperial box and how much it takes for each box. However, there are other elements outside these categories. These elements are either old fields or events based. The daily delivery volume is how many boxes you can sell on the day of the Imperial Crafting Delivery Manager. It's calculated from half of your points. To create an imperial cooker, go to your processing menu(p), select the Imperial Cuisine tab, right-click the food you want to create the boxes from, and press Start. Now you see, I have boxes I can sell to the Emperor. For best results be sure to make all your returns every day! There are six tier boxes you can create: The Apprentice SkilledProfessionalArtisanMasterGuru We go through each of these boxes and the best recipes you can use when creating! Imperial Cooking Boxes From Apprentice To Master If you've ever seen a recipe or item you want to craft and want to know which ingredients or resources are needed to make them, you can easily locate them. Simply press F2, and the on-screen bar will appear, and you can enter the recipe or vessel you want to create, and this will show you the ingredients you need. Note: you should also know that some ingredients are available to you from cooking vendors such as cooking wine, mineral water, salt, sugar, and some more. These vendors are found in every major city, like Heidel or Velia. That's how we look at the recipes. Apprentice: Cooking boxes Thick five-grand chicken porridge minced bird meat 2x (minced chicken on the processing menu)Mineral water 2x (you can buy it from a cooking vendor)Wheat 3x (you can get from the nods around the game) The main ingredient is minced bird meat, which is made exclusively by processing(grinding) your chicken. Another essential ingredient is mineral water and wheat. However, the wheat ingredient does not mean literally. It is translates to flour or starch. You can also use corn obtained from Loggia Farm or other options such as potatoes, barley and wheat. In the end, these products are processed into flour. Since wheat and potatoes are essential ingredients, they should not have a problem with making. This recipe is fairly easy to make because the ingredients are available for you from farms, and you need to process it to create recipes. Cereal soup Wheat 6x(from nodes)Sol 1x(from cooking NPC)Mulled wine 3x(from cooking NPC)Mineral water 1x(from cooking NPC) If you have a generous supply of potatoes or corn, you can switch to a recipe for cereal soup. Other items can be purchased from the trader. However, you should be careful not to lose resources because you need to use six wheat-based ingredients to create just one meal. Most people view exercise levels as an exercise to understand the mechanics of imperial cooking and that you need to have workers in the pavements to gather resources for cooking. Trained: Cooking boxes Recipes for a skilled class are much harder to create because of the number of ingredients needed. From personal experience it is advisable to continue to produce recipes class accustomed rather than skilled classes. Of all the recipes available, the recipe for omelette and grilled meat is the easiest. In addition, a large stock of resources must be made for the processing and packaging of other recipes. For example, an imperial box takes 90 grilled bird meats, while an olet only 13. Grilled meat 2x chicken meat2x cooking wine6x deep frying oil 1x salt. To create this recipe you need chicken meat, chicken oil, salt and deep frying oil. Chicken meat is immediately obtained via chicken nod, so it doesn't have to be processed. Omelet 5x Eggs5x Wheat2x Olive Oil2x Salt For this recipe you need wheat (it can be any starch source), eggs, olive oil and salt. The highest number of this recipe is the number of eggs needed, as you need five. Although it may seem small, it can be quite boring to collect five eggs as they are obtained with luck. Honey Wine 3x Cooking Med2x Essence Sugar6x Mineral Water The cooking ingredients of this recipe are mineral water, honey for cooking, the essence of drink and sugar. If you are a honey soumen worker at Alejandro's Farm, you should have excess honey. The second cooking element you will need to make is the essence of the drink, which requires 1x flour, 1x release agent, 1x fruit. Wheat flour comes from any starchy source, and the apple is a different story. You can use grapes that is present in Olivia Farm or buy fruit from a fruit seller in Calpheon (named Milano). Like wheat, you can use any fruit product like grapes or strawberries. But a salesman in Calpheone sells strawberries of 650 silver per piece. If you buy from a supplier, you'll hit silver. It is best that workers at Olivia Farm also place to create your excess over time. It's also a great recipe for leveling the power of your cooking (the essence of the drink). Professional: Cooking boxes Life becomes more exciting when you reach a professional tier when cooking. The best recipes at this level are meat pie and cumin vegetables. If you remember, certain sources apply to fruit, while others are called vegetables. The reason for this mechanics is because it's the only recipe that uses vegetables. Recipes unlocked in Artisan, and Master tiers do not use vegetables. Pickles Vegetables 8x Cabbage4x Kis2x Leaving Agent2x Sugar To create this recipe, you need cabbage, sa much, a means of release, and sugar. For cabbage you can use olives, pumpkin, peppers or cabbage. Since there are many nodes available on farms, there will be no problem collecting this ingredient. The kis is the ingredient for cooking that is needed for this recipe, made from cooking 1x wheat, 1x release agent, 1x fruit and 1x sugar to make (another super power-leveling recipe). Remember that burglary vegetables are only present in professional. Therefore, we should mass produce this recipe for trade with them and bring a lot of silver from one recipe. Some players express that cooking acidic vegetables will become your primary form of silver earning until you reach the guru's track. Meat pie 4x Pork6x Wheat oil2x Olive oil2x Sugar Recipe for meat pie uses pork, olive oil, wheat and raw sugar. As mentioned above, wheat is made from any wheat-based item, such as corn or potatoes. As far as pork is concerned, you need four pieces, but it can be any form of meat. We can get meat in different ways. First, you can go into the forest of soliom and kill the gray wolves in the area to harvest the wolf's flesh. Second, you can become a goat mountain butcher and travel to a certain area northwest of Calpheon's Farm. In this area, you can kill and collect sheep meat and lamb. Ideally, you should use your energy to pick up meat if you focus primarily on it is recommended to have at least three signs intended for the collection of lupin and sheep meat in these two areas. In addition, many dishes from professional track and continue use meat in their recipes. If you want to approach more passively, we recommend that you make a second recipe for now. Artisan: Cooking boxes When achieving An Artisan Tier, you'll start to cook more advanced recipes like steaks, grilled sausages, and meat soup. In other words, you will use the meat in any recipe. However, this is the meat you will use, depending on how you choose to use the farms. In Heidel, you must go to a material good seller and have a contribution. With 10 contributions, you can borrow a strong fence from him, and stay there. Then you'll be able to install it. So you can farm resources like garlic and pepper. You should also have a character who sits next to your farms to produce. Steaks This recipe is the best of them, and requires only 8x pork, 2x red sauce, 2 pieces of garlic, and 2x salt. Master: Cookbooks The recipes available in this tile are milk tea, sic, biscuits, meat croquette, chewing cheese gratin. Milk tea 2x Tea with a fine smell or 1x tea with a strong smell 3x Milk3x Cooking Honey3x Wheat flour To create this dish you need tea with a strong smell, cooking honey, milk and wheat flour. Milk is easily obtained by playing a cow minigame near Olive, while honey is extracted from the nods. Milk is the biggest weakness in the master tier, as it can pick up a certain amount per day. In addition, tea with a fine scent is an ingredient you need to craft to create this dish. You can also get milk from the witch's side delicacies. Nodes For Imperial Cooking Before you can start cooking, you need to get the right ingredients. It's a good way to work passively with your labor empire. Here are the trees we recommend for cooking: In Olivia, wale farm and costa farm you can find olives that apply to vegetables, and grapes that are fruits. Next to Velia, bartali farm offers potatoes and chicken nods. You can also collect these ingredients at Finto Farm if you want to have a stock of flour and it. It is important that workers have both the Bartali farm and Fint. Egg proci can be obtained by producing chicken meat in these locations, which is also a valuable source of cooking. Other very important works are The Alejandro Farm, which is merged with Heidel. You get pumpkin and honey on these farms. Since it is among the ingredients used in many recipes and pumpkin is vegetables, we should also have many workers who constantly tear these farms. In addition, the Alejandro Farm is the only kilod in the game where you can get honey, so it is crucial to Supply. You will find the Costa Farm in the south of Heidel, where you can reach wheat and pumpkin. Another important plant is the Northern Wheat Plantation, where you can collect paprika, which is considered for vegetables. The aforementioned elements are essential ingredients that you must constantly create most recipes. Although there are other ingredients you will need to collect, there are surpluses. You need them in certain recipes, but in small amounts. If you're not sure how to set up your labor empire, be sure to check out our guide to the Labor Empire. Guide.
