Whatsapp plus apk download apkpure

Whatsapp PLUS is an improved and customized unofficial third version of the original Whatsapp with Modded Stylesheet files. This means that Whatsapp Plus has its own servers and all your conversations and msgs are sent through these servers. The developer has made some changes to the interface and added some additional functionality. Want to show one tick to the person who sends you msg? WhatsApp plus has one tick option that shows one tick to the sender even when the message is received and read. Whatsapp Plus interface is almost identical to the original WhatsApp. Once you start using it, you'll notice a lot of modern differences in the plus or modern version of Whatsapp. Wi-Fi input in the app will be represented by DND. Disabling it will disable it, which will disable its ability to send or receive messages. WhatsApp Plus features There's a plus sign at the bottom that opens Whatsapp Plus options as soon as you touch it. The first option you come across is a log that provides information about your in-app activity. You get a lot of interesting features and customization options not found in the original WhatsApp app. First, there's an automatic reply to a message that automatically replies to a message. For it to work, click on the + sign and click on Edit as icon. There you will find the Automatic Message Reply feature. You can download themes using whatsapp plus app. The option will help you customize the app to suit your liking. Users can customize every bit of WA plus UI, this includes changing the color and size of the header, pop-up notifications, widgets, conversation screen, etc. WhatsApp plus has more 2k themes, so you'll have a lot of themes to choose from. Not only that you can set up media sharing. For example, you can send larger files without losing image quality. Other customization options available in WhatsApp Plus: Use custom wallpapers. Change the background of the chat. Change the style of chat bubbles. Adjust the hyperlink color and resize the message. You can change the date size and color of the status icon. You can also change the color of Bluetick. The appearance of the WhatsApp Plus menu also has a Main/Chat screen, under which you can change the design of the home screen. You can change the following: Chat title. Chat lines. Call screen. contact screen. Floating point button. Messages about encrypting messages are sent directly to WhatsApp servers as original as WhatsApp does. And technically, messages cannot be forwarded by any party to the service because WhatsApp uses a MAC address and a special encryption key assigned to the device for authentication. Note: You need to delete the original WhatsApp to this program. You can use GBWhatsApp to use two accounts.
