Skywars servers spawn players on a custom Skyblock island and let them fight for survival. Sort by: Voting (Rank) Newest Players Online Skywars is a pvp based game that is usually played in larger teams. The different teams will all be deployed on different islands to begin with. Each island will have a few chests and some resources on it to the players. The players then try to visit each other and begin to build towards each other to cross the gap between the islands. The team that lives the longest wins. At the central point there is usually an island with loot as well, with more valuable items than at the spawn point, so timing is the key to getting there as soon as possible! Can't find a server you like? Maybe it's time for you to make your own so you can make it exactly the way you want. If that sounds interesting, go to Gameserverkings. They can host it for you and help you set it up. Skywars is a PvP minigame in which players compete against each other on floating islands until there is only one survivor left. Each player spawns on his own island and when the round begins must prepare for the battle before crossing to the other islands and fighting. Chests on each island contain useful items, including weapons and food, and there is a larger island in the middle of the map with even more resources. We sincerely welcome rules enduring players of all ages to join our amazing community and explore this wonderful place with us. Let the excitement begin, and you would definitely enjoy your time with us. OP-Survival Survival (faction) in Battleasya is a towny-like survival experience, with more community involvement as a whole. Quiet it may seem to be... But with factional mechanisms partially integrating into these survival classics, it features a number of additions of competing elements: no destruction (No grieving, overclaiming and TNT explosions), but with some battles and wars. In short, you would have to survive with others, and that requires good teamwork. Join existing factions, small towns or big cities and make new friends right away. OP-Skyblock Skyblock is a classic survival type that is challenge oriented. You start on an island in the air with very limited but sufficient resources. Using a layered ore generator, you expand your island, collect resources, and invite new members to survive and compete with others. Each block you have placed will have a minimal to a huge impact on your island levels. SkyWars Skywars is a popular Minecraft mini-game with a simple premise: fight until one player or team is still alive. The catch is that you start on a small island, and it's entirely up to you to build bridges to attack other players, or walls to defend yourself. EggWars The concept of the game is to defend your team's egg and destroy the eggs of other teams. If you've destroyed their eggs, they won't respawn. To win, you must survive the last team, with the help of the iron ingots, gold bars and diamond generators. Soup KitPvP Soup kitpvp is the best way to improve your pvp skills. Get as many wins as you get to push your stats. Earn coins to buy new kits and earn points to level up just by eliminating other players in the free-for-all arena.
