Paul The Math's Mate Program is based on the principle that regular, structured practice helps the development of short and long term memory. Systematic weekly auditing consolidates and expands a student's mathematical knowledge, skills and ability to solve problems. Each question on a Math's Mate spreadsheet is part of a set of 4 similar questions in the term. For example, consider sheets 1, 2, 3 and 4 of Math's Mate Blue term 1. Question 12 about each sheet is similar in design, content and difficulty. This grouping of question style is also the case for the next set of four sheets and so on. The Math's Mate results spreadsheet, found at the beginning of each expression in each student workbook, allows students to find out what they know and what they still need to learn and practice. How to use the Follow the 7 easy steps below to learn more: 1. Fill out spreadsheetStudent fills out math's mate spreadsheet. Parents sign the work.2. Right completed workOutlets correct their work in class. In the weeks that followed, particular strengths and weaknesses become apparent.3. Test studentsTeach resources include A and B tests that can be completed after every four worksheets. These tests ensure that diagnostics are accurate 4. Maintaining Teacher Records for Easy ReportingThe Math's Mate results sheet gives teachers a record of each student's progress allowing them to clearly show parents their child's strengths and weaknesses. 5. Assign intervention materialsThe relevant skill builders may be assigned as identified on the mail sheet.6. Completes Skill BuilderStudents is supported with instructions, work examples, glossary, mathematical facts and additional exercises to be completed.7 Correct skill builder teacher encourages students' efforts to get on top of all key competencies. MATH'S MATE BUNDLE When schools buy a class set of Math's Mate workbooks, teachers are supported with free teacher resources and skill builders. These make the teacher's job as simple as the cost of running the programme is very reasonable. Contact us for more information. SKILL-BASED LEARNINGAll skills acquired by students at each Math's Mate level relate to important mathematical threads. Each string is revised weekly. SYSTEMATIC STRUCTUREMath's Mate has a uniform structure across all levels. Each term gradually increases in difficulty as the student strengthens their skills. The advanced (White) level is an in-between level for students who need an additional challenge. The blue shadow area on the graph shows the typical problem area for each student's workbooks. Skill BuildersMath's Mate provides four Skill Builder editions, each spanning two year levels (Orange/Rose, Yellow/Red, Blue/Green and Mauve/Lime) to support quick, easy and helpful cleanup for students who have problems in a particular mathematical area. Each Skill Builder consists of: Step-by-step instructions on how to solve a typical question A prepared example Practice question A glossary of important concepts of Math Facts How to use Skill Builders 1. Find out which Math's Mate questions pose a difficulty 2. Find the relevant skill builder in math results 3. Look up any unknown expressions in the Skill Builder 4 glossary. Complete the relevant skill builders 5. Change the skill builders from the Skill Builder 6 answer sheets. Circle the finished skill numbers in math mate results 7. Go back and repeat previous Math's Mate questions Math Mate design, and how Skill Builders relates to Any question about Math's Mate spreadsheet is part of a set of 4 similar questions in the term. For example, consider sheets 1, 2, 3 and 4 of Math's Mate Blue term 1. Question 12 about each sheet is similar in design, content and difficulty. This grouping of question style is also the case for the next set of four sheets and so on. Thus Math's Mate test made available in Teacher Resource PDF, also reflects this grouping of question style and substance. Math's Mate spreadsheet results sheet found at the beginning of each expression in each Student Pad (and in each Teacher Resource PDF) allows students to find out what they know and what they still need to learn and practice. The relevant Skill Builder numbers are listed at the end of each set of 4 questions on the registration sheets. Linking Skill Builders back to Math's Mate Similarly skill builders can be linked back to each set of 4 similar Math's Mate questions. These links are identified in the grid by the title of each skill. (See e.g. 13.3 below from Skill Builder Blue/Green) The grid shown here, for example, would relate a skill to question 19 in: the last 4 sheets of MM Blue term 2, and the last 4 sheets of MM Green term 1. Once understood these links will be useful for students, in their choice of Skill Builders, and teachers, in distribution of Skill Builders to students.
