Beautiful Go launcher themes are among the highlights of this launcher. However, managing the transporter's green resource caused it to drain a lot of battery for no reason. Fortunately, the team behind the launcher has managed to make some nice changes in recent years. The launcher is currently in a state where it can be used correctly. The article focuses on the best topics to go free you can get from the Google Play Store. Forever the first topic on the list is simple and the program is named Forever. For anyone who is a fan of flat icons, this is the right issue to go on. With the theme, you get access to new wallpapers, icons, and design elements that apply to the rest of the launcher. In case you don't like the wallpaper, you can always replace them with the ones you prefer. Win Go Launcher Key Theme: ZT.art Price: Free single if you are looking for a cleaner, more sophisticated then lonely is the perfect theme for you. It's among one of the cool go topics that are available on the market. It follows somewhat material design. The symbols are flat, and the colors are just the right amount of dimming. Although it's a paid topic, lonely will look amazing on your home screen. The miracle of things I really admire about all GO Launcher themes is that besides just bringing in new icon packs, they also introduce other elements. You get widgets, app drawer changes, and even the wallpapers. Ness is a great example of one such subject; Displaying several design elements, this is one of the best topics around. Miracle GO Launcher Key Theme: ZT.art Price: Maze Free Maze is one of the best go launcher themes I offer. The reason is simple, the subject is simple, easy to understand, and even easier to use. The design elements are plentiful, and they all work together in the right order. All icons get themes correctly as well, so you won't be facing any missing icons or topics inconsistently. Surely, such a good subject doesn't come for free, but it's worth every penny. Glass for anyone who needs iOS as icons, so the glass theme is right for you. You can't say there's something wrong with wanting these symbols because everyone has a preference. As the name suggests, the glass theme isn't too fancy; The color scheme includes color, and the wallpaper is good too. In addition, there is a decent amount of other design elements included as well. The glass is undoubtedly one of the best free go launcher themes you can get for your phone. Developer: ZT.art Price: Luxurious Free is another wonderful theme you can use to create the best go launcher installation. The theme focuses on somewhat rolled-up symbols with tasteful color palettes. First look at the subject, and I quickly remembered the favorite MIUI topics that were all rage back on the day I got my first Android. Glorified isn't the most innovative topics for Go Launcher Ex, but the simplistic and practical approach makes me come back for more. Fancy GO Launcher Key Theme: ZT.art Price: Beauty Initial Free While the name of the theme certainly makes a lot of people wonder if this topic is going to remain relevant after a while, my experience so far has been pleasant. Primal beauty is one of those themes that understands the idea of right-rolled symbols. The icons also have a pretty good color palette, so you don't have to worry about the icons being too boring, or too lively. In addition, other design elements are also nice. To ensure you get one of the best go launcher settings. Sure, the subject is paid for, but at least you'll get the value of your money. Gentleman Gentleman is another nice topic for Go Launcher that you can download. Now the general theme is quite nice. However, the biggest complaints I have with this issue is that not all icons are subjects. So you're left with some symbols that look like they're carrying, and some of them aren't. For people who rely heavily on stock apps, it shouldn't be a problem but if you have a lot of apps, then that could be a problem. Design elements on the gentleman theme are also pretty good. Plus, the nice combination of black and gold makes it one of the most available topics. GENTLEMAN GOLauncher Key Theme: ZT.art Price: Free White is a color that happens to be really tasteful when you talk about creating a home screen installation. It's also one of the hardest colors to work with. However, if you use Go Launcher Ex, and you want your experience to be flawless, you can go for a white soul. Granted, it's one of the most expensive topics you come across on this list, but having spent some quality time with it, I can guarantee it's worth the price. All the design elements have been beautifully handled, and there is nothing redundant about it. The white soul is undoubtedly worth the price tag it carries. Elegant if a black and gold gentleman's attitude isn't the one you're looking for, then don't worry. There are other options available in the same color scheme. Icons are much better defined, and most third-party apps A subject, too. You also get compatible wallpaper to go along with it, so you don't have to worry much about finding one after you've downloaded the theme. Overall, elegant is a pretty decent subject that gets most of the work done and provides nice visuals as well. Elegant GO Launcher Key Theme: ZT.art Price: Free tablet If you have as chalk smeared boards as a child, this is the right theme for you. Although the subject follows the simple black-and-white approach, the icons appear to be made using chalk on the board. This issue is not something that everyone will appreciate as it is tastefully done, but it looks really good on most devices. On the other side, the issue is also free, so you don't have to worry about paying. Animals we're finally closing in on all the amazing themes for Go Launcher Ex, but we're not done yet. Vividness is another great topic you can download for your Go Launcher Ex. As the name suggests, the theme focuses on saturated colors and symbols. It's not entirely bad, because I know a lot of people who would prefer their colors that way. The icons follow a flattering design that has been popularized by Google, and is still used on many subjects. Animals is also free to use, making it a priority for many people. Vividness GO Launcher Key Theme: ZT.art Price: Dark Free is a theme that focuses on smooth black color icons that are just the right amount of black. There's not too much color involved in this issue, and I don't really have a problem with that. Especially when I consider that there are times when I prefer my subjects to be darker. The theme includes enough design elements to keep you satisfied, nor have I noticed many missing icons. It may not be the most exciting or vibrant topics out there, but it does the trick. Developer: ZT.art Price: Free time of life If you want to take a break from dark colored topics, the Life Time theme may be the perfect one for you. The theme is actually fairly simple, but it focuses more on vibrant colors that are going to respect your home screen one way or another. The icons are beautifully designed, and there are some other design elements which makes it one amazing theme to go on. If you like symbols that are probably drawn to them, it's a must for you. Obsidian The last topic on our list is obsidian, which is for people who prefer a glossy look with dark icons in color. Yes, it can happen with obsidian, and I can see how the subject actually follows the nature of the obsidian itself. The great thing about obsidian is that it actually carry even the applications that are not well known to the general public, it ensures that your experience stays uniform across the board, and you don't end up with inconsistent icons. Obsidian GO Launcher Theme Key: ZT.art Price: Sure conclusion, Go Launcher Ex may not be in the same place as it used to be in the old days, but the fact that people still prefer to use this launcher cannot be denied. With proper support and regular updates, the launcher still works just fine. Not to forget, there are so many designers who work hard to bring the best possible experience of custom themes and icons to Go Launcher Ex. It certainly serves as a redeeming quality of the launcher. That's all we had to share on Go Launcher topics, let us know your thoughts on it through the comments section below. Go Launcher Themed Apps APK Go Launcher seems to be going through the old way of Android launchers, which have been most commonly used over the years. You can easily place apps, widgets, and shortcuts on five home screens besides a docking station and app drawer. If it's just another launcher, why are most users going crazy for a Go launcher? This appears to be because of customization options. Although you only have a pier, the app drawer without any cool stuff, and the old-school home screens, you can pinch almost anything you want. Whether it's a docking station, app icons or animations, you can find just about anything on Go Launcher. It's very clean and is fully customizable. There are plenty of Go Launcher themes that can make this launcher unique. There are various reasons for the launcher. However, customization is one of the most common reasons and Go Launcher features are exactly the same. Go Launcher themes have plenty of wallpapers and icons, which can easily fit well and offer a seam of user interface. If you don't need to use a specific app icon, you can easily customize your app icons individually and choose from different topics available. You can find a lot of free topics to get the best experience. Most of these topics come with custom icons if you install third-party apps like YouTube, Facebook and Instagram. Gone are the days when you can customize the icons of default apps like camera, settings, etc. Plus, there's no shortage of app drawer and home screen animations and a lot of them look really cool. There are plenty of wallpapers and themed times available for free use. There are also animations, which become floating symbols. Overall, Go Launcher themes are really the best choice to fully customize your device. Fully.
