Awesome to let you make a difference in paying off an extra mortgage. I just wish it had an iCloud or Dropbox sync on chadw007 on 2020/10/09 16:06 I tried to run this app and it never loaded, it just hangs on an empty screen. I tried to reinstall the same problem with A35Driver 2020/09/28 13:16 I really like the calculator on the web site, but this app just doesn't work properly. Each time I change a value in one field, it arbitrarily changes the values in another field. For example, if I set the original capital and set the interest rate, it changes the length of the interval. If I change the interest rate, it changes the capital. Sometimes you can't change a value at all. Very confusing and frustrating because it makes the app useless. by gogosar 2020/09/11 03:49 Awesome calculator performs various scenarios for increasing monthly payments vs. refinancing at lower interest rates that are now. I wish I knew about it a few years ago. Definitely a solid app, I'm glad the developer took the time to do it and offer it for free (from now on), by markwhitelaw 2020/08/25 14:48 The app worked well until it didn't work. Had to be deleted and reloaded. And now it's not working anymore. It didn't let me enter interest or height.
