Read more The gift of body donation for anatomy research is of tremendous value to healthcare. If you have any other kind of test, procedure, surgery, or medical intervention you have likely received treatment from one person who started by studying human anatomy. Donors help develop all areas of medicine and we thank them for their last gift to make other people's lives better. Read more The Brain Biodiversity Bank website in the sector offers an online atlas of stained sections of the brain of humans and sheep used worldwide as class materials in human medicine, veterinary medicine and biomedical sciences, among other features. The human atlas contains the corresponding MRI image in three dimensions.
