The campus is easily reached from the N.J. Turnpike, the Atlantic City Expressway or any of the Delaware River bridges. The Welcome Gate is situated at 1 Memorial Circle, Glassboro, NJ 08028. From the North (Northern New Jersey, New York, etc.) Take the NJ Turnpike South to leave 4 (73 North). In about 1 mile, take I-295 South. Follow I-295 to Route 42 South (Atlantic City). Exit Route 42 South on Route 55 South. Follow Rte. 55 South to leave 50A (Glassboro-Mullica Hill). Take Route 322 East (2 miles) to campus. After crossing the railroad tracks, make the second right in the Welcome Gate, 1 Memorial Circle. The wait will lead you to parking during normal working hours. If the guard is not present, call 856-256-4922 for assistance. From Philadelphia, the Walt Whitman or Benjamin Franklin Bridge takes to I-676 South toward Atlantic City. Shortly after I-676 Route 42 became South, leave right on Route 55 South. Take Rte. 55 South to leave 50A (Glassboro-Mullica Hill). Take Route 322 East (2 miles) to campus. After crossing the railroad tracks, make the second right in the Welcome Gate, 1 Memorial Circle. The wait will lead you to parking during normal working hours. If the guard is not present, call 856-256-4922 for assistance. From the West, I-95 takes to the Commodore Barry Bridge. Follow Route 322 East (15 miles) to campus. After crossing the railroad tracks, make the second right in the Welcome Gate, 1 Memorial Circle. The wait will lead you to parking during normal working hours. If the guard is not present, call 856-256-4922 for assistance. From Central New Jersey, route takes 70 West to I-295 South. Follow I-295 to Route 42 South (Atlantic City). Exit Route 42 South on Route 55 South. Follow Route 55 South to leave 50A (Glassboro-Mullica Hill). Take Route 322 East (2 miles) to campus. After crossing the railroad tracks, make the second right in the Welcome Gate, 1 Memorial Circle. The wait will lead you to parking during normal working hours. If the guard is not present, call 856-256-4922 for assistance. From the Maryland, Delaware, etc.) Take I-95 North to the Delaware Memorial Bridge. Take the N.J. Turnpike North to Exit 2 and take Route 322 East. Stay on Rt. 322 for about 14 miles. After crossing the railroad tracks, make the second right in the Welcome Gate, 1 Memorial Circle. The wait will lead you to parking during normal working hours. If the guard is not present, call 856-256-4922 for assistance. *Please note: Tours will depart from Savitz Hall (Building #1) and Open Houses will depart from Esby (Building #5) on the map above.* Visit the Campus Tours page for specific dates and times for campus tours. From 322 West After crossing the railroad tracks, make the second right in the Welcome Gate, 1 Memorial Circle. The wait will lead you to parking during normal working hours. If the guard is not present, call 856-256-4922 for assistance. Savitz Hall is across the street on the left. From 322 East After passing the big Rowan sign on your left, make the first left in the Welcome Gate, 1 Memorial Circle. The wait will lead you to parking during normal working hours. If the guard is not present, call 856-256-4922 for assistance. Savitz Hall is across the street on the right. If you are a student on any campus, you are very likely to pass through buildings every day. Have you ever thought about what those buildings are? One semester, you can step into one for a class or two, so it's best to be prepared and know what they're exactly up to. Below are the ten buildings you need to know at Rowan University. 1. Camden Academic Building Address: Glassboro, NJ 08028 This building was originally built to house a demonstration primary school for the campus. Now it serves as the home of the College of Communication and Creative Arts. Students will find the Rowan Radio and Rowan TV studios, classrooms, film-combustion spaces and computer labs equipped with modern programming and equipment. 2. Wilson Hall Address: Glassboro, NJ 08028 It is home to the College of Performing Arts. Wilson Hall hosts the Dean of the College of Fine Arts, large rehearsal spaces, the Boyd Recital Hall, practice rooms for individuals and groups, classrooms, student lounges and a music library. 3. Westby Hall Address: Glassboro, NJ 08028 This building is home to Westby Hall. It houses the art studios for students interested in ceramics, sculpture, jewellery, metalmaking, painting, photography and printing. It also has computer labs, classrooms and a lecture hall. 4. Science Hall Address: Glassboro, NJ 08028 This building is home to the Science Hall. This three-story building is home to the 102-seat Edelman Planetarium, an observatory on the roof that houses a 16-inch telescope, teaching labs, and numerous research labs. 5. Robinson Hall Address: Glassboro, NJ 08028 Hall is one of buildings located in the middle of the campus. This is the campus' largest classroom building. It consists of classrooms, lecture halls and seminar rooms. It also houses a small café for students to check out. 6. Memorial Hall Address: Glassboro, NJ 08028 This building is home to Memorial Hall. It houses numerous dance studios for dance rehearsals and classes. Students will also find information and compute resources such as the Help Desk, Web Services, and the Duplication Center. 7. James Hall Address: Glassboro, NJ 08028 This building is home to the College of Education. It was first named after Dr. Herman D. James Hall, who was the university's 5th president. This building houses faculty offices, classrooms and the Early Childhood Demonstration Center. 8. Esby Gym Address: Glassboro, NJ 08028 This building is home to the Esby Gymnasium, short for Esbjornson Gymnasium. This facility is home to a number of classrooms for the Department of Health and Exercise Science, faculty offices, a secondary swimming pool and a gymnasium dedicated especially to student athletes and the Rowan Swimming Team. 9. Cooper Medical School Address: Glassboro, NJ 08028 This six-story building is home to a number of learning spaces for students to use. These include active learning rooms and auditorium that can put up to 250 people, wellness facilities, the Learning Commons, classrooms and the Medical Library for the university. 10. Campbell Library Address: Glassboro, NJ 08028 It is home to academic life. It houses the Campbell Library which is home to more than 400,000 books. This six-story building houses the RCA Heritage Museum, the university archives, special collections, computers, printing, study areas, and the writing center. Rowan University is a public research university that is home to more than 19,000 students on and off campus. This university is located in Glassboro, New Jersey ad even has a medical campus in Straford, NJ, Students will be able to pursue a number of degrees and programs here. Algicide, oxidant, rattrapage eau verteAction accelerated 24 heuresConvient throw toutes les eaux, même très dure Puissant bacterial compatible avec tous types de traitement. 21.30 € Throw la destruction des bacteria, champignons et virus... 42.55 € Toutes les meilleures ventes I recently opened my pool... and of course there was great algae. So I went to Walmart (idiot that I am) and bought HTH Green to Blue Shock System! Of course who reads the box... but apparently this product doesn't work with Cartridge Filters. It seemed to work, I had all the particles cleared the filter, etc... but now my pool is a blue/greyish cloudy I called up HTH and they tell me I need to drain the pool because I'm not supposed to have this product with a System! No other way to solve this blue/gray problem! Is that true.....?? Do I simply miss something?? ... efault.htm And what are the dangers of draining the pool? Someone once told me it could pop out of the ground....! Son is my wife is going to kill me! :blah: -Barrier Reef Fiberglass Pool -Hayward Pump -Hayward Cartridge Filter -AquaComfort Salt Chlorine Generator Welcome Drain is risky, but it's not necessary. You'll just have to clean your filter a lot!!! (which you will have to do anyway to remove all the algae.) All the HTH probably did was let the algae clump together. Just keep cleaning the filter when the pressure increases 25% of the clean pressure. Also Read Pool School (button in the upper right) and specifically: Defeating Algae turns your green swamp back into a sparkling Oasis shocking your pool edit: Looks like those things are just cal-hypo... packaged to be more expensive likely. It's also adding calcium (CH) to your pool and it's not uncommon for cal-hypo to make your water cloudy... even if you didn't have a lot of algae now. Welcome to TFP! For the Blue to Green system to work correctly, you should be able to vacuum to waste. Very few pattern filter systems can do this. But it's not a permanent problem, you can still clean the pool in the normal way, it might take a while, but it will work. If you haven't yet, check out the How to Shock Your Pool article in Pool School. It covers most of the details. I came home tonight and my pressure level was about 30 and my Salt Generator No Flo light was on..... so wash the filter clog! I tossed off the pattern..... very difficult to clean as normal.... these things are like squabbly of something! After an hour I cleaned it reinstalling the pattern (only 2 days old by the way) and returned normal water flow....! But after about 3.5 hours, the water flow slowed and the No Flo light turned on the Salt Generator again..... so the pattern is clogged again....! I think it will be a long process and continue to clear the pattern..... probably I'll have to replace it once the water really clears up... Thank you guys for the good advice... I have a sense of peace that I don't actually have to empty the water out of the pool... that scares the out of me...! As you see, you need to clean the filter very often in the beginning, but the further you get in the process, the greater time you'll go between cleaning. Once you're done, you'll need to perform a really good cleaning/week on the pattern(s), but I doubt you need to replace it. *update* WHATEVER is in this Crud HTH Green blue shock treatment.... it's nasty! There is still some remaining powder still stuck on the Walls... I had to scrub it off with a barn sponge.... DON'T use THIS Crud!!! not!!! far as good.....! I've been with it for about a week now... and the water certainly looks clearer....! I need to wash off/hose down the filter about 3 times a day after running the pumps for about 7 hours.... with every day I could increase the time I ran the pumps... thus make the water clearer. On Monday night I shocked the water again and last night (Tuesday) noticed the dark yellow cotton stuff on the bottom of the pool... so more manual vacuum at 12AM! not perfect yet... but soon....! Glad you're making progress, but you can't shock a pool one night... Done correctly, shocking is an ongoing process that is described in the links in my first post. You need maintaining your FC above shock level the entire time you try to clear the pool. Pool.
