Plays fast, plays honestly, and is just hard enough to get me back for more! Highly recommended Euchre fan! Very addictive, and AI is surprisingly real. My favorite. Great game. Like four hands with real people. Love it!! I'm addicted! Super easy to play. The best I have I can't think of something I don't like. LOVE to make it canadian loners and stick dealer! October 28, 2020 Version 5.14 I have played a lot of euchre over the years and there is no way this game gives random suggestions. There are completely too many useless hands and loners. There are very few skills involved as you either seem to win a landslide or get inflated. It's a pity, because the game is better than all the other games I've tried. I keep playing, but I've never been as frustrated as I play this game. My advice is not to download this game. When you get used to a smooth, messy game, it offers a hard time playing something else. If you start preparing to be angry most of the time. If you are good your rank will improve quickly, but you will be punished with a supposedly endless string of garbage hands. Thank you for submitting your review and sharing your experience with us. We know that it is not fun to play a game that was not designed to be true, and we wanted to assure you that the suggestions are completely random. Sometimes there will be running in good or bad hands based on chance. We always want to improve the game experience of our players and forward your feedback to our developers. Read Flyinjeep Review! Me too! I don't understand why he gave her a 5 star rating though? I think I'm as good a euchre player as you'll find as I have a reputation and paid my way through college play, including \$100/game, \$50/set! But as Flyinjeep said, the deals can't be casual as I played for days with 4 fit hands on every deal! I've never dealt with that many bad hands in my life! Try to stop the loner or fix something with your hands like that! Also, I told the developers that in one-game format players are the stupidest players in the world and none of them would learn to play the game correctly! I told them they should develop their game from Hoyle's book, which explains the basics of euchre! I have a dating partner called Shark, which is all but! He will pass almost all the time, leads aces when he both jacks to trump, get fixed because he gets his aces trumpeted (It's like playing 3 versus 1), won't trump you when you're doing trump, even though he's even the right bower, makes trump when he shouldn't and not when he should! Other players are just as stupid! Please, please rearrange you are an app to play wisely for the benefit of all! You have the resources to do this, use them!!! Thank you very much for this insight. When creating our own games, we made sure that the game was always 100% correct, and the suggestions are random. We've created AI players to play like a human being. This can help you navigate to the app options page and adjust your opponent's skill level. DI An easy skill level is designed to make a occasional mistake in the same way as a human player to that level would. Thank you again for your feedback. Your thoughts and reviews help us continue to improve as we grow. I played this game for years just before AI, and although I liked \*mostly\* enjoyed it just because my card success is of course bad. I'm also a bridge player and I had a hand named after me - one nothing bigger than mine - because I get it so often. In this game, suggestions, as others correctly pointed out, are not random. Your AI opponents uncannily have exactly the cards they need to set you up, or exactly what they need to make two points repeatedly while you keep having four fit worthless hands. When you get a monster up the card is, of course, off color, or your partner orders it on the wing and prayer and goes down, no matter if you set it in a conservative setting or swing from the rafters lol. I've played enough cards for my well over half a century of games to know what the opportunity is and what the design is - this game is fixed. Very badly, it's the best of a very mediocre many euchre offerings out there. Make better people. This is a good start. Thank you for the time to provide this feedback. When developing our games, it was very important for us to make sure that card mixing and suggestions are always random. AI works very hard to make the best play it can, but sometimes doesn't see the same moves a man would be. We really appreciate your feedback, and we take this into account as we continue to change and improve the game over time.
