The data controller is TELE-FONIKA Kable S.A. based in Myśląwice; 32-400, at Hipolita Cegielskiego p. 1 (hereinafter referred to as the Company). You can contact the controller via e-mail ##spctdhqldt#at#iuzpqat.rdb## You can contact the data controller on all matters relating to the processing of personal data and the exercise of data processing rights. Your data will be processed in order to answer your questions - the legal basis for the processing of the data is the need for processing for the legitimate interest of the controller; it is justified for the administrator to provide the client with information about its services, to present offers tailored to the needs and interests of the client in order to increase the sale of its services. Your personal data will be made available to entities that process data at the request of the Data Controller (e.g. IT service suppliers, marketing agencies) – and such entities process the data on the basis of a contract with the Controller and only at his request. Your personal data will be retained for no longer than until you have conspired to conduct an investigation or until the legal obligation to retain the data expires. You have the right to request access, rectification, erasure, restriction of processing and object to the processing of personal data, as well as the right to portability of personal data and the right to request access, rectification, erasure, restriction of processing and objection to the processing of personal data, as well as the right to transfer personal data and the right to do so At your request, the controller will provide you with a copy of the personal data processed, but for any additional copy you request from the Data Controller, it may charge you a fee of a reasonable amount derived from administrative costs. You have the right to withdraw your consent and your data will be deleted without delay. Withdrawal of consent shall not affect the lawfulness of processing which has taken place with prior to its withdrawal. To the extent that your data are processed automatically in order to conclude and perform the contract or are processed by consent – you have the right to transfer personal data, i.e. to receive your personal data from the Controller in a structured, commonly used and machine-readable format. You may transfer this data to another Data Controller. You also have the right to lodge a complaint with the supervisory authority responsible for the protection of personal data. If you wish to exercise the above rights, please contact the data controller or the Data Protection Officer. Contact details are available above. The provision of personal data for the above purposes is voluntary. Natalia Wąsowicz - Junior Development Specialist, TFKable Group Series of power and control cables (cable tray type) – i.e. high-quality products characterized by exceptional mechanical durability and flexibility of use. INSTALLATION AND OPERATION SAFETY Depending on the purpose of the cables flextremerc contains power and control cables – both types can be installed in cable trays, racing, open air as well as in wet and dry places. In addition, the fulfillment of the requirements of the pressure test makes it possible to place the cables directly in the ground. Power cables are made of numbered insulated wires and plain grounding wire, while in the control cable - all wires are insulated (including grounding one). These wires are marked with a appropriate color. The inherent advantage of FLEXTREMETC cables is their high level of flexibility, which ensures easy installation. installation affects shorter shorter INCREASED POWER - XHHW-2 (EPR) INSULATION AND COATING (CPE). Structural elements that increase the efficiency of the FLEXTREMETC line include: • Outer coating made of CPE thermostat rubber mixture. Thanks to this material, the wires can be easily bent, thus ensuring high resistance to tearing and wear. The specially developed CPE rubber compound has excellent performance in tensile strength and elongation for a break. Pre-ageing values maintain ul 44 minimum requirements and even reach higher values by 106% and 115% respectively. On the other hand, after aging in the natural air circulation – by 55% and 18%. In addition, the CPE coating is oil-free, flame retardant and does not show falling hot drops. • Insulation, made of epr-based rubber mixture (type XHHW-2). Unlownát flame retardate (FT4), easy to graze and resistant to water absorption. Further enrichment of epr-based rubber structure with thermoplastic PE caused insulation to be characterized by better mechanical strength and crush resistance. • Side inserts consisting of an EPDM rubber mixture with increased hardness and crush resistance. The use of inserts helps to evenly distribute the mechanical load throughout the cable structure. In addition, it protects individual wires from damage and preserves the aesthetic appearance of the cable. • Suitably selected polyester tapes condition the mechanical transfer of a given load to the entire cable structure and represent an additional endurance barrier. In addition, they limit the mixing of individual wires during crushing, thus conditioning the maintenance of the round shape of the wires. Unique mechanical properties FLEXTREMETC Flextremerc construction has been developed in accordance with the requirements of Dir Bur (UL 1277 Crushing Test – cable marked for direct burying), i.e. products from the FLEXTREMETC line are resistant to crushing and cutting (compression cut). In addition, they have excellent physical, thermal and electrical properties. These wires are not only resistant to sunlight and moisture (moisture resistance), but are also resistant to oil (UL 1277) and ozone (EN 60811-403, Method A). They are fireproof (FT4 UL 1685) and can operate at temperatures from -40°C to 90°C, which is to meet the cold bending test at -25°C. TFKable FLEXTREMETC products comply with REACH and rohs.
