With Lords & Castles, Dungeon Legends and Idle Airport Tycoon, they each earn over 1 million downloads from the Google Play Store, Codigames latest version, Idle Supermarket Tycoon is sure to grow in the hearts of players across all ages. Although there are already numerous idle clicker games and several supermarket-themed apps as well, Codigames experience with the idle clicker genre and the relevant success of its idle clicker games proves that they can offer a lot to make this game fun and addictive. If you want to spend these few intermittent idle hours and want quick and easy games to spend a little time and if you enjoy making progress in a game even without actually being on it for a long time, then Idle Supermarket Tycoon can be exactly what you're looking for. Idle Supermarket Tycoon gives you a pretty strong idea of what the game with its title is all about, and although you'll start the game with just managing a tiny store with only vegetables for sale, it will grow and thrive to grow too big to test your multitasking skills. Idle Supermarket Tycoon is all about growth Company and its profitability, as well as speed of growth and development, depend on how much time and effort you put into it. Enough money to buy and operate new sections in the supermarket is your primary goal, but there are various other tasks you need to spend some time to ensure higher productivity and profit. Each section can be updated to provide new products that generate higher revenue. Hiring additional people for each section is important, as well as increasing their salaries to increase efficiency. To ensure that customers do not wait too long in line, cashiers should also be increased and upgraded from time to time. It is also necessary to ensure that there are enough parking spaces for all customers and promote marketing promos to attract more people. With a variety of upgrades and improvements that you can spend money on, the overall challenge in the game is to keep everything balanced. You will earn continuously, no matter what you do, but if you want a more efficient run on this game and intend to thrive faster, our Idle Supermarket Tycoon Guide including tips, cheats and strategies can help you accelerate your progress and pave the way for you to be an exceptional virtual tycoon in the game. The tutorials provided at the beginning of the game are fast and as easy as they come. You will first be guided through the primary goals you need to do and before your assistant leaves everything in your hands. Likewise, everything can be done with a simple tap and there is simply no way to suffer losses, so there is little pressure to push you into more profits. Just like a company in real life, spending more time in the game will definitely earn you more and beyond, the management information you can always check in the game, you can lead you to which activity to prioritize as far as improvements go. So without further rethinking, let's go to our compilation of Idle Supermarket Tycoon Cheats, Tips and Strategies! 1. Leave as little idle money as possible Although it is fun and convenient to watch your money grow continuously as you play Idle Supermarket Tycoon, what you should do continuously is to invest all this revenue to improve a variety of departments and profit boosters to ensure an ever-growing growth in profit. Opening new departments and updating them to boost profits may be a first option, but as you progress through the game, you should learn to take a look at every bit of aspect to ensure a good flow of cash and profit. Each upgrade costs much higher than the previous one, so you basically have to switch from one area to another and spend first for the cheapest options possible. Some aspects, such as the increase in salaries, reflect profit is not directly reflected, but ensuring that every customer is looked after competently enough leads to higher returns in the long term. Since it can lead to a little confusion about which upgrades to prioritize and continue to work on, you should take a hint of the prices for subsequent upgrades, as the cost jump will make it impossible for you to go further. In some cases, you can to push through with the next level upgrade, but you would get more from spending money in other areas. In any case, the only exception is to save your money and keep upgrades that you can afford to keep a hold if you are very close enough to earning enough to move to a higher earning place. If it only takes a few minutes for you to earn enough to sell your supermarket completely and start over, then that would be the only reason for you to wait patiently for the raising of funds. You can always calculate how much time you need to keep everything constant by checking the amount of money needed to move to the better place, compared to the amount you have and your income per minute, which you can always see at the top left of your screen. 2. Always check on the management page as a very helpful guide to give you simple information about how each aspect of your supermarket does, make sure to make a habit of checking the management (bar graph) icon the top right side of the screen. Not only does it provide information about which department makes the most money, but it also gives you a clear idea of what to work on. The points highlighted in red mean that a special result needs to be improved. For example, if the parking usage usually reaches 100% or nearby, you can miss out on a lot of potential customers, so you can of course see the parking usage highlighted as red on the management page. This means that you need to update it to make room for more customers. In terms of different departments, some may have an indication that it is less profitable, which follows that you need to spend a little more money on modernization. Keeping everything in perfect balance can be a constant challenge, especially as there are other profit-enhancing activities that keep popping up and keep you away from the task from time to time. Nevertheless, but the pursuit of the perfect balance leads to more profits in Idle Supermarket Tycoon, so be sure to stick to it. 3. Watch ads for extra wins and multipliers video ads have long been a part of any free-to-play mobile game in existence. Although there are still some people who are bothered by it, these ads need to stay in most games to keep them upright and available for everyone absolutely no cost. Another bright way to look at it is a rest period between playtime for your eyes and finger tapping. While there may be some games that force feed ads while you are playing the game Watching video ads in Idle Supermarket Tycoon is completely optional. We mentioned earlier that there are no losses in the game and you will move on no matter how much time you spend playing or how committed you are to going through every corner and every corner to increase your revenue. If you want to make sure that the profits are as high as possible and that progress is as fast as it is grow, there are various video ads to watch and go through each of them at every opportunity will ensure maximum efficiency. First of all, there is an ad campaign that is indicated by the playback icon at the bottom of the screen. Watching or playing a short video ad on the ad campaign page doubles your revenue for 1 hour. You can watch 6 video ads directly and keep 2x sales for 6 hours. If you watch 6 video ads every day, you will also be rewarded with free gems. If you notice the yellow car with a spectacular glow in front of your supermarket, it is the VIP car. Tap it and watch Another short ad will spend the VIP money on buying stuff from your supermarket and give you huge amounts of money or gems instantly. You will also occasionally see opportunities to earn additional customers or express lane checkouts that will be available for a few seconds as buses and vehicle icons pop up on your screen to help you further boost profits for a limited time, be sure to click on them as well when you see them. Just to keep in mind, the express track checkouts are very helpful especially considering that it is difficult to keep checkout tracks as fast as possible and will usually be marked red on your management statistics. Finally, you should take an opportunity to double your offline earnings every time you jump back into the game. Instead of spending gems on these boosters, you can watch a short video ad in their place. These ads offer random values and some may be much more valuable than the rest. If you want the fastest way to earn profits and increase efficiency and profits, you feel free to watch all of them. Related: Idle Supermarket Tycoon Free Gems Cheats, Tips & Tricks: How to earn a ton of gems and unlock all cities The truth is it is possible to see a lot of short video ads continuously and almost one directly after the other. Also note here that viewing these ads is not necessary at all to get through the game and it just makes it much faster for you to move forward. 4. Click on these vans It is very typical and very easy to miss the vans that are parked directly at the side of your supermarket, although they are discussed in the early tutorial. These trucks appear one after the other and can stack up to a maximum of 4 if you fail to click on them. Depending on your profitability, these trucks will immediately spend huge amounts of cash that can help you with any upgrades you need You have to work all the time. Be sure to make it a habit to scroll past your supermarket walls to check these trucks from time to time. Clicking on everyone as they come can very well be the best course of action, but in any case, make sure they don't stack on the cap of 4 as no new trucks appear once they do and that means virtually missed profits. 5. Move to the next area as soon as possible have earned enough money to set up a larger supermarket, you may be asked to set up a new supermarket elsewhere and sell the previous one. You will start small again and reset levels of your department as well as parking and advertising, but the profit increases that it gives you, makes it so much faster to reach point you had before, as well as speed up the process to go far beyond and open additional departments and reach new upgrade levels much faster. This is basically part of the business cycle, although it takes a lot longer to sell your current supermarket and put up a new one in the following places as you move forward. In any case, this will be necessary to unlock more upgrades faster and move forward with the game. Be sure to check on the dollar symbol at the top of the screen and check the required amount of cash you need to earn to move to the nearest city. You can also view a preview of all subsequent locations and the profit multiplier that you can unlock when you start your new supermarket in these areas. 6. Remember to invest in epic upgrades There is a tool icon at the bottom of the screen that you can misinterpret as a settings menu. Clicking on it will take you to the Epic Upgrades page, where you can spend all these hard-earned gems on a variety of permanent improvements to your supermarket. Some of them can be easily afforded early, while some are a little more expensive and can grind a few days to buy. Each of the decisions is largely beneficial and it can be a little difficult to choose which ones to invest in the first place. A good idea to shorten your initial decisions would lead back to the administration side that we talked about earlier. If it takes a little longer than usual to check out the supermarket and your management data has led you to highlight it in red, then you should spend some diamonds on Robotic Assistance to make your cashiers more responsive to your customers. 7. Goal to achieve missions On the upper right side of your screen is the check mark icon that should take you to the mission side. Since you can also unconsciously miss this and the gems that reward it for completing short and simple missions, it's a habit to work early to reach missions early. Although you can only complete missions in succession, some of these missions are achievable even if you do nothing. Missions are usually applied to a certain number of or supplied to a certain number of customers. As soon as you earn rewards for completing a mission, a new one immediately appears. There will be many cases where the mission presented is a goal you have already achieved. In such cases, you simply need to click on the Claims button and work on gems you need to purchase more epic upgrades. Buy, would be everything for our Idle Supermarket Tycoon guide. In any case, we hope that you have learned a lot from it and that you have enjoyed reading every point we have discussed. As with any idle clicker game, as well as companies in real life, how much you can earn and how fast your progress is largely, if not complete, based on the amount of time and effort you devote to playing this game. Even as an occasional player, you can still move forward in the game, so don't be discouraged to take on even selected tips and strategies from everything we've mentioned when you have relatively little time for the game. If there are some relevant tips and strategies you know we haven't mentioned in this Idle Supermarket Tycoon Guide yet, or if you want to let us know how you feel after reading it, be no stranger and share your thoughts with us in the comments section below!
