## Where to buy coal tar

Coal tar has been used for centuries to cope with various skin conditions, and is highly effective in hair care products as a calming agent for the symptoms of psoriasis, seborrheic dermatitis, and dandruff. However, the best coal tar shampoo will act quickly and be able to effectively treat itchy and flaky skin. Bonus points if it has the support of the National Psoriasis Foundation (NPF) on the label and/or is highly recommended by a dermatologist. To get more information on how shampoo with coal tar works (and get her favorite choice), I contacted Dr. Ava Shamban, M.D., a board certified dermatologist. Coal tar has anti-inflammatory and anti-itch properties, thus slowing cell growth, it relieves discomfort from inflammation and itching, he explained to Bustle, adding that coal tar can also help shed skin and slow down the production of flakes, be it from dandruff or from psoriasis-induced scales caused by plaque buildup. Although it has been clinically proven as an effective ingredient for scalp irritation from conditions such as psoriasis, there are two small drawbacks to consider. The first is the one that has a fairly strong and pungent smell, which may be a little off-putting at first, but should fade as you brush the rinse. So if you have a very sensitive nose, you may prefer a fragrance-free shampoo or even one with menthol, which can help mask the smell of the drug, and, according to Dr. Shamban, it is also good to be more helpful with the help of itching. Another thing to keep in mind is that coal tar can temporarily stain skin, light-colored hair, or clothing, so be sure to follow your shampoo directions regarding maximum time off and then rinse thoroughly. Those with color-treated hair may also want to go for a sulfate-free formula to avoid stripping your color or exacerbating dryness. To start your journey to a soothing scalp, you'll find a list of the best coal tar shampoos in the Amazon below. And if you find that wanting something stronger than an over-the-counter option, remember to consult your dermatologist first.1. Overall Best Coal Tar ShampooNeutrogena T/Gel Therapeutic Shampoo (4.4 Ounces)AmazonCoal Tar Concentration: 0.5%This Neutrogena T/Gel Shampoo is approved by the National Psoriasis Foundation, Dr. Shamban, and thousands of Amazon shoppers (it has been rated five stars out of over 6,700 users). The effective formula is meant to be nonirritative and safe for people with psoriasis, plus it is soft enough to be used daily and starts working after only one use. there is one drawback, it is that there is a different smell of the drug, however, with so much positive feedback surrounding this shampoo, it is worth the result. One success story: Like most dandruff/medicinal shampoos it smells unpleasant. But this 100% psoriasis cures my scalp. I have been struggled to keep it under control for several years, even what the dermatologist prescribed for me no longer works. It got rid of my psoriasis which covered my entire scalp in 2 uses. So grateful for this product. I cant recommend it enough! 2. Most Concentrated TreatmentPsoriatrix Coal Tar Psoriasis Shampoo (12 Ounces) AmazonCoal Tar Concentration: 5%With the highest concentration of coal tar on this list, Psoriatrix shampoo is potent, but by brand, it can help get rid of psoriasis symptoms after only a few uses. For best results, the instructions suggest two to three washes until your symptoms begin to disappear. After that, your scalp should remain free of plaque and residue for at least a few weeks until you may need to grab it again, so consider this more of a treatment than a daily shampoo. With such a powerful and effective formula, it is a popular choice on Amazon, with over 1,000 glowing ratings. One success story: I've been battling moderate to severe scalp psoriasis for years, nothing made it to this. After a terrible talent, I took a chance and bought this shampoo. With one use, I have help - in a week - I am 100% cleaned. It's been three months and I haven't got any talent. I consider this a miracle in a bottle. 3. Best Sulfate Free Shampoo For HairArtNaturals Argan Scalp 18 Shampoo (16 Ounces) AmazonCoal Tar Concentration: 3%Although sulfate-free shampoo can work well for all hair types, it is important to avoid sulfates if you have color-treated hair because it can cause your color to fade faster. Scalp Shampoo 18 from ArtNaturals is also free of parabens and phthalates, and while it has a strong concentration of coal tar, it is still soft enough to be used as a daily therapeutic cleanser. Thanks to nutritious ingredients such as argan oil and jojoba oil, its formula will help keep hair soft and smooth while working to combat dry and itchy scalp symptoms. Note that it does have a different smell, but some users report that it disappears as soon as you rinse it. One success story: This is truly remarkable! I have struggled with seborrheic dermatitis throughout my adolescence and early adulthood, and it's been a huge challenge finding a daily shampoo that manages the 'hot spots' as I call them. This shampoo really helps clean up the current 'flare-ups' and does a GREAT job of preventing it. 4. Best Fragrance-Free Tar ShampooDHS Shampoo (8 Ounces)AmazonCoal Tar Concentration: 0.5%Dr. Shamban calls this DHS shampoo excellent, and given tar coal's stinging reputation, its biggest selling point fragrance-free. It also acted quickly, with some users reporting tangible results after just one use. I get outbreaks of painfully infected hair follicles on my scalp. After only two or three days of using these they up, said one Amazon reviewer. Of all the options on this list, this one has the highest price for its size, however, it goes a bit far - the formula has a thinner and windy consistency so you only need a little to make it work into feathers. One success story: I saw the first washing difference. I am an African American woman with 4c hair & find it hard to find a way to reduce my scalp psoriasis in addition to apple cider vinegar. This really made my psoriasis go away for almost 2 whole weeks and usually reappears in 4 days! That's a big difference & relief for myself. It also doesn't make my hair feel stripped like any other shampoo, it feels like my hair is already conditioned. 5. The Best With MentholDenorex Dandruff Shampoo + Conditioner (10 Ounces)AmazonCoal Tar Concentration: 1.8%The addition of menthol in Denorex shampoo makes it a valuable option for those who may be looking for additional anti-itch properties. Plus, the refreshing aroma of menthol also helps balance the visible smell of coal tar. Since it is formulated as a shampoo and conditioner in one, you basically get two products here - and its discounting properties help prevent it from drying out your hair. Another recommendation from Dr. Shamban, it has been highly rated by more than 350 Amazon customers with one of them calling it the best dandruff shampoo ever made. To see the best results, you should use them at least twice a week. One success story: It has helped my psoriasis in my scalp more than I ever expected. I was worried it would dry my curls too much and I would be left with an unmanageable frizz. Instead of falling apart, my curls were left hydrated and I now have a 'good hair day' every day! The scale has dropped drastically, the hives have completely subsided, and the spots are decreasing slowly in size. Expert:Dr. Ava Shamban, M.D., board certified dermatologistStudies reference:Zeichner J. A. (2010). Topical Coal Tar Foam Use for Psoriasis Treatment in Hard-to-Treat Areas. Journal of clinical and aesthetic dermatology, 3(9), 37–40. Coal Tar and Salicylic Acid (KOLE tar & salicylic acid)Brand Name: Tarsum Medically Reviewed by Drugs.com. Last updated on August 7, 2020. Use of Coal Tar and Salicylic Acid: What do I need to say to my doctor BEFORE I take Coal Tar and Salicylic Acid? If you have an allergy to coal tar, salicylic acid, or other parts of coal tar and salicylic acid. If you are allergic to coal tar and salicylic acid, any part of coal tar and acid or medicines, food, or other substances. Tell your doctor about allergies and what signs you have. If you have lupus. If your skin is sensitive to light. This is not a list of all the drugs or health problems that interact with coal tar and Acid. Tell your doctor and pharmacist about all your medications (prescription or OTC, natural products, vitamins) and health problems. You should check to make sure that it is safe for you to take coal tar and salicylic acid with all your medicines and health problems. Do not initiate, stop, or change the dosage of any medication without checking with your doctor. What do I need to know or do when I take Coal Tar and Salicylic Acid? Tell all your healthcare providers that you are taking coal tar and salicylic acid. This includes your doctor, nurse, pharmacist, and dentist. Certain acne products containing benzoyl peroxide or salicylic acid can rarely cause very bad allergic reactions and sometimes life-threatening or very bad irritation. Before you first use it, you may need to follow certain steps to make sure you don't have an allergic reaction. Use coal tar and salicylic acid as you are told by a doctor or read the package label. Talk to the doctor. The drug can stain nails, hair and skin. Protect clothes and fabrics from coloring. Talk to your doctor before you use any medication or other product on your skin. If you get any kind of light therapy, talk to your doctor. Don't use it any longer than you've been told by the doctor. You might get sunburn easier. Avoid sun, sunlamps, and tanning beds. Use sunscreen and wear clothes and glasses that protect you from the sun. The use of other skin products when using coal tar and salicylic acid can cause more irritation. The drug can cause harm if swallowed. If coal tar and salicylic acid are ingested, contact a doctor or poison control center immediately. Do not give it to children and adolescents who have or are getting better from signs of flu, chicken pox, or other viral infections due to possible Reye syndrome. Reye syndrome causes very bad problems in the brain and liver. Tell your doctor if you are pregnant or planning to get pregnant. You need to talk about the benefits and risks of using coal tar and salicylic acid while you are pregnant. Tell your doctor if you are breastfeeding. You need to talk about any risks to your baby. How are these drugs (Coal Tar and Salicylic Acid) best taken? Use coal tar and salicylic acid as instructed by your doctor. Read all the information provided to you. Follow all the instructions carefully. Do not take coal tar and salicylic acid through the mouth. Use on your scalp and hair only. Keep away from your mouth, nose, ears and eyes (possibly burning). Avoid wearing healthy skin. Wash your hands and after use. Shake well before use. Wet hair and scalp. Use enough shampoo to make feathers. Lather well and go on as you've been told. Rinse and put it back on. What should I do if I lose my dosage? Carry out a missed dose as soon as you think about it. If it is approaching the time for the next dose, skip the missed dose and return to your normal time. Do not put 2 doses or additional doses. What are some side effects that I need to contact my doctor immediately? WARNING/CAUTION. While it may be rare, some people may have very bad and sometimes deadly side effects when taking medication. Notify your doctor or get medical help immediately if you have any of the following signs or symptoms that may be associated with very bad side effects: Signs of an allergic reaction, such as a rash, nest, itching, red, swollen, blistered, or flaking skin with or without fever, wheezing, tightness in the chest or throat, difficulty breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat. Very bad skin irritation. What are the other side effects of Coal Tar and Salicylic Acid? All drugs can cause side effects. However, many people do not have side effects or only have minor side effects. Contact your doctor or get medical help if any of these side effects or other side effects bother you or don't go. Irritation where coal tar and salicylic acid are used. These are not all possible side effects. If you have any questions about side effects, contact your doctor. Contact your doctor for medical advice on side effects. You can report side effects to the FDA at 1-800-332-1088. You can also report side effects. If OVERDOSIs are suspected: If you think there has been an overdose, contact your poison control center or get medical treatment immediately. Be prepared to tell or show what was taken, how much, and when it happened. How do I store and/or dispose of Coal Tar and Salicylic Acid? Store at room temperature. Store in a dry place. Do not store in the bathroom. Store all the drugs in a safe place. Keep all drugs out of the reach of children and pets. Dispose of drugs that are not used or expired. Do not flush the toilet or pour the drain unless you are told to do so. Check with your pharmacist if you have any questions about how best to dispose of drugs. There may be a drug take-back program in your area. Use of consumer information If your symptoms or health problems do not improve or if it gets worse, contact your doctor. Do not share your medication with others and do not take other people's medications. Some medications may have other patient information leaflets. Check with your pharmacist. If you have any questions about coal tar and salicylic acid, please talk to a doctor, nurse, pharmacist, or other healthcare provider. If you think an overdose has occurred, contact your poison control center or get medical treatment immediately. Prepare to give or show what was taken, how much, and when it happened.
