Polk pa4a manual

By admin in Polk April 14, 2020 Bluetoothinstructions4apairingpolkultamarine Tags I agree. The owner's guides that come with this boat are terrible - very generic. I find I have to make a lot of discovery myself. Thanks for posting this. I'll have to check it as soon as I get home. In 2018, in 2018, in 2018, Toyota Tundra Tr.R.D. No, I tried after I connected the fuse a second time and the same unit in my head died. There was only 10 hours in the system. 1/5 stars submitted in 2017-06-30 by MS, FloridaThis this unit drops a Bluetooth signal repeatedly and the screen locks on the first or second song that is being played. He was sent back to service but was told nothing was wrong. Still doing the same thing. The app isn't working properly and if the source screen (iPhone) goes to sleep it will try to reconnect. Frustrating! The sound is really good but can't get a consistent BT connection. Works great if a wired connection is used but not what I paid for and it's 2017.Can't recommend this unit. Looking at swapping with FUSION!! 1/5 stars submitted in 2017-10-04 by DPD, AnnapolisI bought this unit and immediately had trouble with connecting after pairing a device on Bluetooth. I went back the unit to the factory, and they said it's okay, just reset the unit when you have the problem. So, every few days when I can't connect, guess what? I need to pull the unit from the partition and press a button on the back of the ampere/pre-map behind it. Embarrassing and time-consuming. This is totally unacceptable in a high-end stereo!
