I am very happy to see that this game now has a modern remake with better graphics and other cool improvements. How to play: The main idea of the game is to destroy all your opponents. When you destroy enemy tanks you earn money, after finishing the levels you can buy upgrades for your tank with that money. For example, you can buy: armor, visibility, tower speed, movement speed, weapons and weapon characteristics (such as ricochet, flame, shock, etc.), lasers, mines, rockets, etc. Game is very complicated and has a huge list of different weapons, to be honest, I think this game has the best upgrade features. Create your own map: Awesome Tanks 2 also has a level editor that allows you to build your own custom maps. The game has three different difficulties: easy, medium and hard if you are familiar with this type of games, you can safely choose the average mode. Controls: The controls are listed in the menu, but I will add them separately here, this way is more comfortable. Then, to move, you use arrow buttons or A/WS/D. To and aim you use your mouse. Upgrades: As I said before, money is very important in the game, the more money you collect the best tank upgrades you you Getting this is very important and will be essential when you will have to deal with stronger opponents. Upgrades include: minigun, shotgun, ricochet, flamethrower, cannon, shock. You can also buy/upgrade mines and place them. You can also buy futuristic weapons like laser and railgun. Traditional weapons such as rockets are also available. Other upgrades include: armor, visibility, speed and movement speed. As you can see, there are tons of different upgrades you can buy. The second version of the game has so many changes and so many new things in it, it will take some time for you to figure it all out. Tips: Try to move all the time, navigate in different directions, avoid enemy bullets and don't stop shooting. Ammo is not a problem, you can always collect bullets from fallen enemies or from breaking wooden boxes. Remember, the level is not clear until you destroy your enemy base!
