The ultimate chemical equations handbook answers chapter 11

Item #: AP7479 Price: \$48.05 In stock. The Ultimate Chemical Equations guide is new and revised and offers thorough, comprehensive examples and exercises that provide continuous reinforcement to improve students' skills in chemical literacy. View more product information Product Details Resources Source Item #AP7478 AP7479 Edition Student Edition Teacher Edition Price \$12.90 \$48.05 Enter the number of entries New and fully revised second edition of the Chemical Equation Bible! This popular book is a must-have for every AP chemistry student. Both the student and teacher editions have been updated to reflect the latest changes in the AP chemistry exam and especially the equation part of the test. Written by two respected ap college chemistry teachers, the guide is a compilation of years of experience and expertise. Thorough, comprehensive and in-depth examples and exercises provide continuous strengthening to improve students' skills in chemical literacy. The book is also an invaluable resource for pre-AP review and summer preparatory activities. The teacher's edition contains the entire student text, the teacher's notes for each chapter, and the answers to all questions and equations. The updated portion of the response prediction consists of 25 realistic, AP-style practice sets with five sample chemical reactions (test questions) each. Each example now includes a standard follow-up question that students must answer in response (e.g. to identify an oxidising agent, the final solution is acidic, basic or neutral). The supplement includes a 50-year collection of AP-type chemistry equations—amazing! You don't learn AP chemistry without this book! 2010, 8 1/2 × 11. Spirally bound, 214 pages.*Advanced Placement and AP are registered trademarks of the College Board that did not play and endure those products.
