In fact, this state-of-the-art, multifaceted tool and Snap-on's seven-piece rotating socket set and the 14-piece deep impact socket set will be causing quite a stir in any facility that repairs the vehicles. The new Snap-on MG325 3/8 Impact Wrench is twice as strong as previous models, so you'll want to invest in a set of snap-on impact shots and extensions with our Flank Drive wrinkle system. They are specifically designed to withstand the torque production of the MG325, said Rodger Isetts, product manager for Snap-on. We have received phenomenal feedback from service technicians who have already tested the MG325 with Snap-on's Flank Drive Socket Sets. We are told that using them together saves time and increases productivity. Based on your comments, we expect a lot of interest when they become available in January. Snap-on MG325 3/8 Impact Key Features and Benefits include: • 425 feet free of sning pair. • Patented one-piece home construction, which means components are aligned with precision accuracy that provides a longer shelf life. • The continuous lubrication of the oil bath means that the impact mechanism is always lubriced for less wear and maintenance. • Double hammer impact mechanism means harder to hit bumps with less moving parts for longer lifespan. • Reverse bias engine means the engine has more torque output in reverse. This makes getting stubborn snuts out easier. • The comfort pillow trigger button means less tension and stress on the finger that allows the end user to work more comfortably longer. • Balanced housing means the same weight distribution for optimal control of tools. • Low impact on vibration means that the impact will run smoother with less user fatigue. • Anvil stop lock means the anvil will stop when the trigger is released. This prevents the lingering nuts and plugs. Snap-on Flank Drive Socket Sets features and benefits include: • Designed to withstand today's impact weapons with high torque production. • Welded pivot pins it means smooth, complete 30 degrees uninterrupted rotating action that allows an efficient energy transfer prolonging the life of the socket. • Flank drive wrinkle system: Plugs offer 15 to 20 percent more spin power that requires less use and abuse of your power tool and plugs, protecting your • The uninterrupted rotating action of 30 degrees means greater accessibility in narrow neighborhoods that allows easier and faster removal of stubborn fixings thus saving time. The Snap-on MG325 3/8 Impact Wrench and Flank Drive Socket Sets cover most car and light truck apps and are ideal for general car maintenance tasks and ongoing facilities such as silence and tire stores. Small engine repair facilities, motorcycle and snowmobile stores, and manufacturing environments where weight and repetitive movement are concerns will also benefit from its use. Customers can learn more about the Snap-on MG325 Impact Wrench and the Flank Drive Socket Sets trying to contact their local Snap-on franchisee, visit www.snapon.com or by calling 877-SNAPON-2 (877-762-7662).
