After you unpack the printer, follow the steps in the checklist in order. Each step is described in detail with easy-to-understand instructions. Unpack the printer and accessories. Step 1 Check the parts and location of the printer1-2 Step 2 Prepare the printer location Page 1-4 Step 3 Remove the internal package Page 1-5 Step 4 Page 4 Page 11 Install the content summary for Step 1. Printer Parts and Location Figure 1-1 Check the front/left side of the printer A Top Status Panel B Top Output Tray C Tray 1 (Multipurpose Tray, Fold to Use) D Tray 2 (Paper Cassette) E Tray 1 Status Light F Tray 2 Skylight G IR (Infrared) Status Light H Infrared Port I Front Status Panel J Removable Side Panel (Memory) Install language SIMM or

memory language SIMM) K interface cable 1-2 setup 12 printer settings 1 Figure 1-2 Printer K interface cable door L Serial and model number M Rear output tray (collapsed to use) N Power cord door O On/Off button P Top cover release button EN printer setup 1-3 Page 13 Step 2. Prepare the printer location Place the printer on a sturdy level surface in a well-ventilated room. The environment must be stable, with no sudden changes in temperature or humidity, no exposure to direct sunlight or chemicals. See the figure below for the recommended amount of space to leave around the printer. Figure 1-3 Printer Space Requirements: • Top Cover (A) • Opening Tray 1 (B) • Loading Tray 2 (C) • Rear Output Extension 14 Printer Setup 1 Step 3 Overview. You can save all packing materials by deleting internal packing notes. You may need to repack the printer at a later date. 1 Slide Tray 2 Remove it from the printer. 2 Push the orange shipping retainer in tray 2 down to bring it straight back. (If it is difficult to remove, try rotating the retainer while pulling backwards.) Return slide tray 2 to the printer. 3 Press the release button on the top cover to open the top cover. 4 Remove two orange shipping holds on i Page No. 15 Step 4 Content Overview. Install Toner Cartridge 1 and press the release button on the top cover to open the top cover. 2 Remove the toner cartridge from the package. Caution To prevent damage, do not light the toner cartridge for more than a few minutes. 3 Shake the cartridge to distribute the toner evenly in the cartridge. Do not insert a chip into the end of the cartridge. 4 Locate the transparent plastic sealing tape on the right edge of the cartridge. Pull the entire length of the tape out of the cartridge (overview of the contents of page 12-15 in/3 16 Printer setup 15. Remove the paper from the printer into tray 2 1 slide tray 2 (paper cassette), 2 Load the paper up to the paper length spacer arrow on the back of the tray (approximately 250 letters, A4, executive, B5, or legal paper). 3 Make sure the paper is flattened in the four corners of the tray. If necessary, press the clip lever (A) to raise the metal holder (B) on the front left so that the paper fits down. Match the side slot (C) of the 4-tray 2 to the rail (D) for the summary of the contents of the 17-page page. Printer Cable Connection Hp LaserJet 6P/6MP printers support three different interfaces that require cabling: • LocalTalk ports (A) for Macintosh computers and LocalTalk networks • Large B parallel ports (B) • Small C parallel ports (C) Printer interface connections Note Printers also support wireless connectivity with infrared ports. (See pages 3-16 for instructions on how to print on an infrared port.) 1-8 Printer Settings 18 Printer Settings Overview of the contents of page 1 Select a printer connection Select a printer connection See the following instructions to help you choose the correct connection to use between your computer and printer. Note The contents of the package do not contain printer cables. For hp recommended printer cables, see order information starting on pages 2-20. Large parallel port (B on the previous page) Use this port when: • Connect to an IBM or IBM-compatible computer. • Parallel cables are standard length (up to 3 meters) and use type B (overview of the contents on page 19 of the Parag Overview Page) to ensure that reliability uses IEEE-1284 compliant parallel cables (these cables are clearly marked with IEEE-1284). Only ieee-1284 cables support all the advanced features of the printer. Note Make sure the power is turned off 1 Look for the interface cable door (A) on the back of the printer. Pull out the door using the finger tab for leverage. 2 If you are using a parallel cable with a large B-type end, connect the cable to port (B). You can snap the wire clip into place and connect the printer directly to your Macintosh (or Macintosh-compatible) computer using a LocalTalk or Macintosh serial cable that connects the Macintosh printer cable to a summary of the contents of Page 20 Printer Settings 1. To connect the printer to the LocalTalk network, see Appendix C. Make sure it is powered off. 2. Pull out the door using the finger tab for leverage. 3 Plug the cable into the LocalTalk port of the printer. If the cable is not slippery
