Roblox clown kidnap command

Help and feedback support design game Hello Developers! I'm creating a story mode/adventure mode for my game. Im planning in the degree of The Kidnapping of Us. Would that be allowed roblox? If you can respond, please let me know. Thank you, US! 1 How to try to check if you're hashtagged or not. If games that have creepy pasta stuff yours should be fine. 1 As WE accompanies: The kidnapping of US. it's not hashtagged, but I wouldn't trust that. I just don't want to be banned @plr or anything. 1 As I don't really know, there are hundreds of games with kidnapping. But don't make it too realistic 1 As if it were like Mario, but instead of Princess Peach, it would be me, and bowser would be John Doe lol. I don't think you'll get a warning from this and if you get one you definitely won't ban it without a warning you might get some more information on why you think this isn't allowed? I don't see what you think makes this breakout cough. In the sense of a mario sunshine kidnap guy, I'd find it funny because I find it all funny. If Nintendo did, you can probably do it. 1 As is probably fine, since there is an administration order that has a clown kidnap you. I don't see anything wrong with it. As long as it's not something in real life like Timmothy Pitzen you should be fine. So I know there is an administration order in Adonis or something that allows him to kidnap players. Honestly, this is a gray area, personally I would say no... The simple answer is that it will work parents and it's a pretty extreme crime. Roblox has many protocols in place for inappropriate things in Roblox. However, when I checked the TOS there was no result for the kidnapping. I think this is because Roblox doesn't consider that a problem out of staff and rather would become personal. With this it is called Roblox would take four actions of what I can say. 1) Identify the threat in this case name. 2) Falls under a violation of the TOS. Probably yes watching as Roblox is an E game and criminal activities are not allowed in games ranked in E. 3) Block and review the name. So I would usually say yes. You should maybe walk away from that and say take it or cheat to come with them. Make it as child-friendly as you can. Best of luck to you. Edit: We're not personal, so we can't say for sure. He's not responsible for anything that happens. Help and feedback support design game, so I'm working on a game with some friends, and we want to have a lot of features on it, and one of the features be the ability to kidnap someone. I wanted to know if I was against ToS for having a kidnapping shot. I tried looking around and couldn't find question about it so yes. 5 Likes the Kidnapping command in the Adonis admin suite was against TOS so I guess that's it to. They ended up changing the kidnapping order to something else as a result. However, a little depends on what you are actually allowing them to do. Usually if you have to ask for the best to avoid, but if you're thinking something else like Fat Princess where no harm is done to princesses and it's very cartoonish, there's no violence to the person held hostage/kidnapped, then that's probably fine. If instead you have violence, tying people to the boot of a car, the person gets injured or worse, and the style is very realistic and close to real life, then you would struggle to justify it. Usually prison or something similar is a better terminology than kidnapping if you go down the cartoon route safer. 1 Like good, it would probably work similar to the feature in Wild West, where they allow people to be lasso'd and there is a law enforcement option in this game. I @kinkocat think the kidnapping command is different, then the feature I have, since one represents the modern clown kidnapping, this game is set in the ancient era. How would it be implemented? Would it be like the administrator of Kohls (where a van came up and stole you) or would you be dragged on a rope by a player? EDIT: If you are implementing this, keep it as safe as you can. Just don't do anything that could be perceived as a real kidnapping. Tied up and dragged or carried, it could also be placed on a horse as The Wild West. I'm sure he'll be fine. Once the feature is implemented you could just send a message to DevRel and ask them about it. Just don't release it until you have an answer. 1 Just like no, I wouldn't be against Roblox Tos rules because an administrator like @PMGDesigns said there's an administrator who could kidnap and if it really isn't like kidnapping just like throwing a rope around a player, then roblox might ask him to remove it or change it. There are games like this if some parts there game as long as you know what roblox wouldn't like at all. 1 As Wild West lassoing sounds good. I think post-lasso is the bit to question. What happens once you've caught someone? 1 Just as the HIGH DEFINITION administrator have a warrant called :clown me and what he did was have a killer clown kidnap and murder you. I'm sure the game will be fine. No, I strongly advise against any content that refers to topics such as kidnapping, murder, etc. This was a mistake on our behalf and we modified it with a kinder and more humorous command instead. If you have content that refers to kidnapping/murder, at best you will be will ask you to remove it, or worse receive a moderation notice. 1 As well as I've stated before that I'm having it be like Wild Wild's lasso duties roblox doesn't have a problem with it. 1 Just like Roblox the roblox logo and feeding imagination are. Roblox is an online virtual playground and workshop where children of all ages can safely interact create fun and learn. The school was chased by a clown and the teacher did not believe that jeff the killer survival. Killer clown script 2019 kidnapping roblox.
