Watch guardians of the galaxy online

Image: Marvel Studios When Marvel released Guardians of the Galaxy, almost no one outside of some serious comic book fans had ever heard of them before. Even among comic book fans, the Guardians were a pretty underrated crew that has been in the background for years. But the film brought them to life in a way that blew people's minds. They were unlike any other team; swashbuckling crew of space pirates who didn't get along, didn't follow the rules and didn't look like normal heroes at all. With a tree, a raccoon and a trio of man-like adventurers all with intense personalities, they were instant fan favorites. The sequel has just cemented its place as the cornerstone of the Marvel Universe and their appearance in Avengers: Infinity War has made fans crave more. The guards are a lot of fun as well as a pretty diverse crew as well. Of course, it would be great to be an Avenger, but it seems that the Guardians will instill you, no matter what. They take you for who you are, which is what any good family should do. If you ever find yourself watching them on screen and wishing you could join the adventure, you're not alone. Now, we'd love to hear from you. What watch do you use on the Galaxy Watch? Join the conversation on the forums! If you're something like me, you loved the Guardians of the Galaxy. I think it's the best Marvel movie to date by a mile and I love the Marvel movies. The film was literally something for everyone: It was super funny, there was great action and special effects, some emotional tearjerking moments, star cast, excellent characters, insanely good soundtrack, simple but satisfying plot, a hint of romance, and just enough Easter eggs to keep superfans happy. In other words, it was almost perfect. So like me, you'll probably want to watch it again. Right now. So where can you watch Guardians of the Galaxy online? Answer? Lots of places! It's 2015 and all, there's no shortage of services ready to beam the greatness that guardians of the Galaxy directly into your home. The only downside is that the movie hasn't hit any of the subscription streaming services yet (like Netflix or Amazon Prime), so you'll have to slap down some cash if you want to watch a movie. Further raising funds from your wallet is the fact that all the usual suspects offer only the opportunity to buy a movie in digital HD, without the rental available. Does anyone else kinda skip Blockbuster right now? However, though, I'm talking about Guardians of the Galaxy here, so if I'm honest, money isn't an object. With that in mind, that's where you can watch Guardians of the Galaxy online.iTunesApple's online store offers a movie in standard definition for \$14.99, or in brilliant HD for \$19.99. iTunes purchases can only be viewed on Apple devices, so if you want to watch a movie on the big screen, you'd better have an Apple TV. Google PlayGoogle's Chromecast device makes it easy to stream from your phone, tablet or computer, and you need to watch everything you buy from their service on your TV. Google Play prices for your own are the same as iTunes at \$14.99 SD and \$19.99 HD. Amazon While the movie isn't at its premiere, you can still purchase it from Amazon Instant Video. Prices are the same as Google and iTunes, but Amazon offers some extras that make it better. On the one hand, they include bonus With the purchase (always nice) and they also offer free download monsters university in HD if you buy before October 5 and tie up your Disney Movies Anywhere account. Account. Amazon movies can be viewed on their Fire TV devices, as well as roku and all major video game systems. Not bad, Amazon.VuduWal-Mart-backed Vudu offers familiar options for \$14.99 SD and \$19.99 HD, but they also offer their HDX version for the same price as HD. What is HDX, you ask? Probably a marketing gimmick, but Vudu claims it's a higher resolution than HD. Hey, if it's the same price, it seems like it's worth a shot. Vudu has apps for basic gaming consoles and roku, but boxes from competing buying services like Apple and Amazon don't offer it (that shocker). Microsoft StoreDid you know Microsoft sold movies? Because I didn't. Turns out it's just a rebranding X-Box video store and they offer the same price options as everyone else. Obviously, you'll need an X-Box if you want to watch it on your TV rather than on your computer. Playstation StoreIf you have a PS3 or PS4, you can buy Guardians of the Galaxy at the same prices that you are used to seeing to date. But if you only have a PS3 and have never upgraded to a PS4, you also have the option to buy a movie in 3D for \$29.99. Of course, you'll also need a 3D TV, but it's great to have them. YouTubeThanks to its ubiquitous nature, YouTube has apps for just about every streaming device out there. That's good because they offer Guardians of the Galaxy at typical prices with this added convenience youTube tossed for free. Starz PlayStill Gun Shy to Buy Movie? Well, if you're a cable subscriber and a Starz customer is on top, then you have the option to watch Guardians of the Galaxy on demand through their Starz Play online service. I don't think the cable is dead yet. Guardians of the Galaxy are all over the internet, but it's not cheap. But why should it be? Like I said, it's an amazing movie, and if you don't own it already, you should. So start downloading! Images: Walt Disney Pictures; Giphy (8) Before we turn our gaze to the stars, we should discuss the Earth. It's the birthplace of Peter Kweil (Chris Pratt), the hero in the heart of Guardians of the Galaxy, the 10th Marvel Studios film that takes place in its cohesive cinematic universe, and easily its most out of the box offering yet. When we meet Peter, it's 1988, and he's a kid on the cusp of the greatest loss he'll ever face. When the grief of losing someone close to him becomes too much to bear, Peter does what every little child tends to do in the face of adversity: He runs - but not very far away. Before he can escape from his troubles on his own, the spaceship shines him from the surface of his home world, changing the course of his life forever. Twenty-six years later, Peter is an intergalactic criminal known to some (but not many) as the Star-Lord. His reputation is not impressive, but his skills. He wears a retractable mask that offers him protection and allows him to breathe under hostile conditions. He has jet boots that can help him travel long distances. He wields hand guns that can use deadly force and can maim enemies when a softer touch is required. And he steals things - lots and lots of things - all while listening to Awesome Mix Volume 1, a collection of hits from the 1970s and 80s, and Peter's only real connection to the planet he was born on. Guardians of the Galaxy very well may be a bunch of holes, but they are our holes. In short, Peter quill represents the type of hero so many kids dream of becoming when they grow up. Similarly, Guardians of the Galaxy, in general, is the kind of movie kids will be obsessed with for years to come. It's massive and inventive in their imagination and scope, taking fans who are familiar with the Marvel Universe so far beyond Earth that they can be completely forgiven if they forget that they watched a Marvel movie rather than, say, Star Wars. Indeed, the Guardians and Peter quill are closer cousins of Star Wars and Han Solo than Iron Man and Tony Stark; an even better comparison of Firefly and Malcolm Reynolds, because quill is surrounded by a Serenity-esque crew of his own. In fact, while he is the focus of the Guardians, he is far from the only scoundrel in the galaxy. There's Gamora (zoe Saldana), the deadly assassin and adopted daughter of Thanos (Josh Brolin), the Mad Titan catch a glimpse in the Avengers' medium-credits sequence; Drax the Destroyer (Dave Bautista), a heavily tattooed muscle freak with a score to settle against the man who killed his family; and Rocket and Groot (voiced by Bradley Cooper and Vin Diesel, respectively), cannon-toting raccoon and talking tree-creature cut from the fabric of Han and Chewie. Regardless, Star-Lord, Gamora, Drax, Rocket, and Groot pile holes as they are described so many times in the film. Together they are the loving mother of guardians of the galaxy - still a bunch of holes, but holes with a collective ability to save the universe. They are the idea that people from all walks of life, with very different methods and priorities, can come together to do something amazing. And they do it all in style. A test of the Guardian's ability to work together for the benefit of the universe is Ronan Prosecutor (Lee Pace), a Cree fanatic and terrorist who attacks against a peace treaty forged between his people and the Nova Xandar Corps. He intends to control the galaxy with the help of an ancient artifact - an artifact that just so happened in the possession of Peter Kweil. Pace does his best to bring some menacing energy to an otherwise one-note role, but like his character in the film, he has surpassed the very strangeness of our characters. As a Star-Lord, Pratt proves why he is moving into the new stages of his career as a Man. He is moody and blunt, as we already knew from his work on Parks and Rec, but he is also soulful and expressive in an instantly relatable way; it doesn't hurt that he looks great shirtless, either. Like Gamora, Saldana does what she does best these days: kick and take names in outer space. Like Drax, Bautista flexes new muscles as an actor, with some solid emotional beats and even better moments of levity. (Drax takes everything literally; nothing goes over his head.) Like Rocket and Groot, Cooper and Diesel threaten to steal all the shows by lending their voices to the strangest characters in the film, and offering some amazing moments of vulnerability as well. Indeed, it is these completely strange, but fully realized characters that make the Guardians mandatory for viewing. History isn't all that complicated, and it's perhaps all too familiar, but the world (or worlds as well) it spills out is equally huge and spectacular. The connection with the Marvel Universe is intriguing enough. But it's the Guardians themselves, these unlikely heroes who make this film so special. Perhaps The Guardians lack emotional sophistication and social commentary on Dawn of the Planet of the Apes, or even Captain America: The Winter Soldier, but it surpasses both of these blockbusters in terms of sheer fun and entertainment value - thanks to James Gunn's witty screenplay and the wildly creative world, and the general weirdos who live in it. The world of cinema, and the universe as a whole, is all the more amazing with them in the mix. (Media © Marvel Studios) Editors' Recommendations
