In English, there are three main excuses of time: IN, AT, ON and in Russian we have two main excuses B and NA. That's the reason for most of the mistakes. Today we look at these excuses in IN, AT, ON, which cause the greatest difficulties for students. Apse AT is used: q refer to time: at six, at 6:00-6:00 p.m., with holiday names, when we think over time, not during a specific day, sometimes during the word time : Christmas (at times), Easter (time) with words at night, midnight, noon, (s): night, noon : now, now, days of the week (days of the week): Monday (on-dates), Saturday (days) when the time is set for a particular day of the week: Friday morning (s), Monday (Monday-Monday afternoon) , Saturday night (with dates): 5 March 2010, 26. : in 1962, in 2012, where ponds (aastaajad): suvel, talvel by the names of the months (kuud): detsembris, augustis in phrases: hommikul, p'rastl'unal, In the meaning of through when we mean the period of time: viie minuti p'rast q viie minuti p'rast kolme n'dala jooksul q kolme n'dala jooksul kahe kuu jooksul q kahe kuu jooks UI aastas q aasta jooksul Preposition weemni IN , AT, ON are not used with the words: j'rgmine: j'rgmisel esmasp'eval, j'mirgel aastal' eelmisel kuul, eelmisel n'dalal q see : t'na hommikul, sel kevadel q iga p'ev, iga p'ev, iga laup'eval Both variants are equal, but used differently. Lõpus ... denotes at the end of something and necessarily indicates the period: n'dala l'pus - at the end of the week kuu l'pus - at the end of the month aasta l'pus - at the end of the year With the pretext of AT can about the use of the word algu (at the beginning): n'dala alguses - at the beginning of the week kuu alguses - at the beginning of the month aasta alguses - at the beginning of the year IN end can not be used for a period of time, because, If the excuse is used , that phrase denotes in the end (l'puks): L'puks hakkasime auto. = Lõpuks alustasime auto. At the end of the day, we started a car. Lõpuks jõudsid nad kokkuleppele. = Lõpuks jõudsid nad kokkuleppele. In the end, they reached an agreement. The word alguses is not the antonym of the word l'puks in this phrase. The opposite expression is alguses (first, at first): Alguses me ei saanud alustada auto. At first they couldn't start a car. Alguses ei jõudnud nad kokkuleppele. At first they couldn't come to an agreement. How is it correct: aja jooksul or AJAL? Both options are translated on time. In aeg designates not late that in reserve herin time: J'udsime lennujaama zigeaegselt. We arrived at the airport on time. (We had time, there was still time before the flight, we were not late). Sometimes the word lihtsalt can be added to amplify: Nad tulid Station just in time to get on the bus. They came to the station just in time. We're checking the total and don't stop there. IN TIME you can use combinations: - over time to do something: He came to the theater in time to see his performance. He came to the theater just in time to see my performance. - over time something: I hope the

flowers are delivered in time for your birthday. - I hope the flowers will be delivered to his birthday on time (delivery is not delayed). ON Time - on time, as planned, on schedule, on schedule. We use at a time when it comes to accuracy: All students are served their reports at the time. All students passed their summaries in time (exactly in time or day). I'll see you at 6:00. Please, be on time. I'll see you at 6:00. Please don't be late (come in time). Read more about ENGINEFORM online school Keep learning English ENGINEFORM!
