However I also enjoy Furfsky for a really cool style and variety of every texture. Super cool showing off all the skyblock/resourcepacks texture packs and a great way to make them scream small as well! SheepLvr FurfNSFW Ay thanks for the mention. This is a matter that should have been pinned, not every issue is an individual resource package. Page 2 FurnoChris I use my own that I am making progress. I only have the armor to do but the hebelac is out of these last edit: September 28, 2019 Zcamt is pretty cool, thanks a lot Kiba_Star Mighty UwU Weebs UWU member in my opinion, 32x Hypixel Skyblock package by ImperiaL (and crew) is the best best. Not only are clean textures looking for all custom items, but it also has very clean animated textures, some of them with animated models as well, such as pigman swords. As it seems, it's an on-the-go job and they're constantly update it. All I could wish for is more animated textures for some other armor sets like Amber's Armor, which I feel should have a slow glow to it... And it may be myself if I can figure out the best way to go about it. Dark themed menus, which are easy on the eyes for long periods of play... And anyone who uses light themes in any app can (insert the dark theme of meme supremacy here). Your package even gets rid of stained glass in a clean way as menus look less cluttered. I are going to fangirl over this package until everyone uses it basically. Being able to say instantly what people are wearing, given the exact nature of the package, is really handy and makes the game just that much more enjoyable. I really am HP will gain this package and install it as an optional auto when you first join skyblock... This is because 90% (or more) skyblock users never know that there are texture packs for it, and the game's ones make the game much more interesting to play. Yw has had a few of my wtf talking about when I admire people armor lol. Yes, man... Your armor doesn't look like enchanted diamonds, your black with animated colors fading accents. It makes you proud of your armor, and people jelly when they see you^.^ Except, they don't see them, and most have no clue what anyone is wearing at any given time, without inspecting them. Are you the enchanted diamond armor of the dealer, or the perfect superior? No one knows... Unless they are one of these tissue packs (preferably 32x ImperiaLs). Hummy77 AstronoCraft-Space-Gaming said Nope, but if the packmakers demand me to delete the site and the texture pack, I will do it. I'm just a random player who just wants to propose my version of a good skyblock texture pack. And I didn't put any ads on the download so I just do it with my free time and I don't make money with it. You'll probably have to ask for permission when building a public package page 3 oLguren Eschatology NOLIFE officer oLguren Eschatology NOLIFE officer here's a list with almost all SkyBlock resource packs made so far in no particular order, for people looking for one. Please tell me if I had forgotten. If you own the package and wants something changed/deleted, just tell me. vanilla + by me (x16, animated) ImperiaL's (x16, x32, animated) by @Imperial 24 and @novotab51 FurfSky (x16, animated) by @Furf Buhpoi's (x16) by @buhpoi SkyPixel (x16) by @reagnarok9402 'Yet Another SkyBlock Resource Pack' (3D) by @MarcosSegon Socialist 1.8.9 Pack (x16) by @socialist �� 8+9-16x.2136676/ Flytre7 Overhaul (x16) by @flytre7 Hyblock (x16) by @ abbie Block Farr (x16) by @Farkonong Loyal Closed Textures (x32) by @ThatGravyboat @ThatGravyboat SkyBlock Tweaks (WIP, x32) by @PirzolaTM Ectoplasm's (WIP, x16, animated) by @Ectoplasm EvoSky (WIP, 3D) by @-ORAMBO- Skyblock 3D Swords (from Warlords, 3D) by Hypixel, ported to SkyBlock by @castcrafter New SkyBlock Texturepack (x16, WIP) by @zirkill007 Screenshots (one of each) Vanilla+ by me ImperiaL's FurfSky Buhpoi's SkyPixel SkyBlocks Tweaks Ragnarok's 'Yet other SkyBlock resource pack' Socialiist's 1.8.9 pack Repair Hyblock FAR Block Faithful Sky Textured Ectoplasm's EvoSky Skyblock Sword 3D (from Warlords) New SkyBlock Texture Pack prefers a lot of its tbh pack, textures that make Minecraft feel fashioned into it, though I've always changed the texture of the runaans bow to the buhpoi version because it looks a little better. Vierdant Hyblock is honestly amazing, @ abbie. The whole team loves its headquarters (Imperial Team). He'll foretold you. As for other packages, I love everything this community creates, so you've got my respect. Abby just kindda stand out in my eyes (personal comment). JJura I can't accept the outcome of this vote. Isn't the distant bloc going to take first place? look at this picture . [GALLERY=media, 15882] Block Away by FieldWind posted on December 1, 2019 at 4:15 PM[/GALLERY] Diluted Aspect of Bumble AOTB TBlazeWarriorT Member I cannot accept the outcome of this vote. Isn't the distant bloc going to take first place? look at this picture [GALLERY=media, 15882] Far Block by FieldWind posted Dec 1, 2019 at 4:15 PM[/GALLERY] Who won the poll was highly based on popularity (playerbase) and 10x more people use ImperiaL's pack, So FarBlock was only starting to be available for a while after the survey was made iirc please I need a resource pack that needs to opine something TBlazeWarriorT please I need a resource pack that requires an impossible opine thing, textured the order case OptiFine (opine) If for some reason you don't want to use Optimal (masochist or Minecraft 1.15), you can only use public resource packages for Vanilla Minecraft, such as DokuCraft, JohnSmith, BDCraft, etc, without skyblock items GODLIKE Can you heading and space it? My eyes &It; * * & gt; Impossible, textured custom case of OptiFine (opine) If you for some reason don't want to use optimal (masochist or Minecraft 1.15), you can only use public resource packages for Vanilla Minecraft, such as Doku, John Smith, BDCraft, etc., without skyblock items oh I can't use mods that is a problem Ectoguild ASN Master Guild please I need a resource package that is impossible, to my knowledge. Texture packs work through an Optifine feature that allows certain textures to be changed based on their item name, which cannot be done in vanilla. Out of curiosity, what makes you want a package that doesn't require Optifine? It is completely secure and allowed on the server, if I remember correctly. Homie 77, I cannot accept the outcome of this vote. Isn't the distant bloc going to take first place? look at this picture . [GALLERY=media, 15882] Block Away by FieldWind Posted on December 1, 2019 at 4:15 pm[/gallery] Not really, many of these packages offer individual aspects that make them great: Vanilla+ gives a modded FurfSky+ feel gives the artist pixels an imperial look gives this... My... PvP hybrid package? Hyblock gives mini Terraria a farblock feel that makes the weapons and armor look like they are professionally crafted in ectoplasm games gives a messy, rudimenter look that suggests bad sewing, making etc., the killer texture is also this very bright, just funky, rotten meat, ready in whatever you want to use, and therefore my favorite package! No need to be seen, people like to dislike a different ratio, also FARBlock came out much later on page 4 of EnteStein Yes, yes, make sure it's jealous you come to my subject, talk like if my package doesn't exist, and because I say anything about it is jealous. Isn't it that I just made a topic sharing everyone else's resource packs for the benefit of the community, sharing not only my package that I have nothing for but other people I have a really jealous person I've done with this Wtf? I mean, the guy you talked about that was supposed to make fun of you, I'm standing next to you, but well. And it looks like you don't like me directly if you don't get something right, I'm sorry, but don't get your anger out of me. I even wrote to you that I liked your tissues if you could read it. ItzEnd3r Dracophobia DRACO Master Guild Do you know how to weave just for aotd and not for diamond swords (which is what aotd without textures looks like) very interested in making my own texture pack) watching this will help slipy87444 Bumble Nursery BK Member Watch It Thx will help Slipy87444 Bumble Nursery BK Member Watch this will help me mcpacher tho only optimal RichThe1Kid Empiur Weebunism WEEB Guild Master Hay, who use these (or any other) resource packs that change dungeon items without texture conflict with furfsky+ in resolution x16? Would it be nice with those who probably have a style that is compatible with/similar to furfsky+'s Page 9 InCrizZ TBlazeWarriorT Hey, who sources from these (or any other) packages that change dungeon items without texture in contrast to furfsky+ in x16 resolution? Would be nice with those who probably don't respect a style that is compatible with/similar to furfsky+'s optimal for easily mixing sith packets, as it does not respect the order of layering resource packages. So random textures of both will be harvested everywhere on the other hand, mixing my packet (vanilla+) with furf is very common, and my pack has a lot of dungeon textures now (the last few 'soon') empire packs should have dungeon textures too, but won't be well with empire packs, it's not respected as ordering layering resource packs, so random textures of both will be harvested everywhere on the other hand, mixing my package (vanilla+) with furf is very common, and my package has a lot of dungeon textures too, but don't It will be nice with furf's I've heard that I should probably do this, but I don't know that certain furfsky textures lack that I can mix with yours since I'd primarily use TBlazeWarriorT furfsky tissue whether I have to install OPTIFINE again or not if I've already installed it and I have what you told me : Do but it still doesn't work as it just shows up as a regular/default Minecraft texture you need to use OPTIFINE so you need to install it, regardless of when you install it until the optimal running package will work, if it shows up like just a vanilla pack you have optimal clarity or settings Mistakes like custom off items I've heard that I should probably do this, but I don't know that certain furfsky textures lack that I can mix with yours since I'd primarily use furfsky textures I think people just manually remove all the tissue that furf from my pack and then throw all the others together, but it seems That it takes hours. There are some pre-performing mix packages too, though AstronoCraft BloodyBedwars **0**HYPE**0** Hey Leader! It's been a long time since I made a new update so, I made a new update! Can you just update the pls image ^^ also, for the poll, I just got 2 non-original textures (mastiff/armor revenant), and I reached the 1k download (proof below)! so... Thx! this is my mediafire page: TBlazeWarriorT Does anyone know if there is a package that has adaptive armor/blades in it that changes depending on your class? My package has it (in beta), but idk if it works if you try it, please tell me if it doesn't. Some person said only test it outside of hypixel because I'm @TBlazeWarriorT why don't you use an external voting website to host a poll? Look at the date of the subject. Back when I posted it, there was only like 5 sb packs and no need for an external survey, and the same went for months. and now its too late to make a new one. Motorgoryl does anyone get their textures to work if they are turned into dungeon items? For example, transform a regular dragon chestnut and build its chest dungeon so optimally it can't distinguish it as a superior dragon chestnut. TBlazeWarriorT Does anyone get their textures to work if they are turned into dungeon items? For example, become the regular premier dragon chest It will be a chestnut dungeon It's so optimal it can't recognize it as a superior dragon chestnut. In which packages are checked for names, and others check for internal hippie ID I guess turning items into dungeon items breaks id, but not names? Motorgoryl neither actually breaks that name. My package checks for the name space ID and then the item name, but the little stars you change when making something dungeon case are technically renamed. I don't know if checking for Hypixel ID will change this, can you link a package that does this? TBlazeWarriorT No it breaks the name actually. My package checks for the name space ID and then the item name, but the little stars you change when making something dungeon case are technically renamed. I don't know if checking for Hypixel ID will change this, can you link a package that does this? Not 100% sure what you mean about your package but the iirc ImperiaL package uses hypixel ID, If it doesn't, then I remember and I'm pretty sure mine (and almost every popular package) uses the item name but doesn't break because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and after racing item names so can have whatever sht in the prefix/extensions without breaking, because I'm smart and added wildcards before and af remember seeing dungeon items in AH and they look normal good motorgoryl they can't have dungeon items and still stars that break names. Life for example if you buy Chestplate Stone it looks like any custom texture for your stone breast plate. Chestplate Stone is a dungeon case but when you buy it it doesn't have any stars. As soon as you upgrade it and it gets the star then the texture breaks. I'll take a look at the L& Yanil+ emprial to see what you're talking about on page 10 dukmig Hey, which is from these (or any other) resource packs that change dungeon items without texture in conflict with furfsky+ at x16 resolution? It would be nice with those who probably have a style that is compatible with/similar to furfsky+'s @Empiur if you still find a package like that I have one, my recent review. It's based on FurfSky, and added lost items, and more stuff, just check it out u'll make it uwu EcologistKit CoyotePackMaster here's a list with almost all skyBlock resource packs built so far in no particular order, for people looking for one. Please tell me if I had forgotten. If you own the package and wants something changed/deleted, just tell me.
