Original: ABY Finereader Developer: ABY Platform: PC x64-x86 Version: 12.0.101.496 Interface Language: RAS (Multi) Year: 2016 Description: ABY Finereader 12 - Text recognition program that translates images of documents and PDF files of any kind into electronically edited formats. The program recognizes and correctly restores the logical structure of the document in its electronic copy, allowing you to forget about reprinting texts. The ABB Finereader 12 corporate program is designed to efficiently process documents across companies and institutions, with a flexible licensing system and special opportunities to work in local networks. Tablet: Stitched system requirements: Computer entered at 1GHz processor or higher. Operating Systems: Microsoft® Windows® 10, 8/8.1, Microsoft Windows 7, Microsoft Windows Vista®, Microsoft Windows XP, Microsoft Windows Server® 2012/2012 R2, Microsoft Windows Server 2008 R2 and Microsoft Windows Windows Server 2003. To work with the local interface, the operating system must provide the necessary language support. RAM: Less than 1024 MB. Multi-core processors require additional 512MB of RAM for each additional processor core. Free space on disk: 850MB for a regular installation and 850MB for the program. Monitor with a video card and resolution of at least 1280x1024 points. Twain- or WIA-compatible scanner. A keyboard, mouse, or other pointer. Additional: (q/-) Features: Repack: Year of Release: 2014 Version: 12.0.101.264 Platform: Windows Interface Language: Multilingual Q Russian Medicine: Not Required Details: Multilingual Registered an account! ABBE Financial 12 is an intelligent text recognition system that you can download in Ex.ua You can convert paper documents and any kind of PDF into editable format in a few minutes. It is a program for personal use at home and in the office, which will help solve the following problems: to create electronic documents based on paper, reprint and edit in paper documents without formatting; To translate poor quality documents into edited form: photographed by mobile phone cameras, faxes etc; Identify and process documents with complex formatting: tiered content, pictures, tables (magazine pages, price lists, reports, etc.); Scan and identify documents to be entered in electronic collection with the ability to search by text key features: protection of complete design. Thanks to revolutionary adaptive®2.0 adaptive recognition technology, the program accurately identifies documents with complex formatting. The new version of ABY Finereader analyzes title and hyperlink, multi-level headlines, page numbers, bottom and upper footers, photo captions and font and header styles, while fully preserving the document. Ease of use. The program's interface includes a window with specific scenarios. For ease of using scripts divided into groups, save settings are provided in the same window. User chooses the correct conversion scenario The edited copy of the document is received when clicked. If necessary, the user can identify the documents in the step-by-step program. To reduce the number of clicks and work faster with the program on the top panel, the main actions are provided: calling the window with specific scenarios, open and save buttons, it helps to reduce the time to find the right action in the program's menu. Mobile phone instead of scanner. The new version of the program supports work with all popular models of scanners and multifunctional devices, as well as accurately identifying photos of texts taken with digital cameras or mobile phone cameras. To process images taken with a mobile phone camera, the program provides the following features: fixing trapezoidal distortions, eliminating noise and fuzzy image. Support for most languages in the world. ABB Finereader recognizes documents in 186 languages based on cyrillic, Latin, Greek and Armenian alphabets, and supports languages based on hieroglyphic writing. A new language of recognition - Korean - has been added to the new version of the program, thus we continue to expand the list of non-alphabetical languages. Spell check is provided for 39 languages. The system successfully identifies documents that combine texts in two or more languages, including documents containing a mix of alphabetical and hieroglyphic languages. Automatic definition of language of recognition. Using intelligent algorithms, ABB automatically receives information about the financier Uses it to identify the document on which it is written, and it. Savings in PDF and PDF/A formats. The program provides all options for saving with the ability to search in PDF (text under image, text above image, text only text and picture, image only). If necessary, the user can secure the PDF file with a password. Customization for multi-core processors. The growing number of computers is equipped with two or quad-core processors. ABY Finereader's intelligent algorithms allow you to effectively parallel the various stages of document processing (pre-image processing, structure analysis, document synthesis) and fully utilize the full power of machines with multi-core processors. What's new in the 12th edition: Optical Recognition Technology (OCR) Recognition Language: 190 languages with dictionary support: 48 productivity and feature of work recognition speed increased by 15% for multi-page document support For touch screen pre-processing images, the background document's digital camera color change of the document background, Taken when photographed in light or excessive light automatic circumcision of unnecessary parts of the image for all pages to remove all pages of seals and traces on office documents under it to improve the quality of text recognition to rapidly copy parts of the document the ability to copy parts of the document image into the clipboard of the allotted parts of the document image (without prior recognition of the document Check the results of the recognition tool for text formatting in the check window of results ability to disable definition of structure elements (footnotes, footers, heads, etc.) saving validation results in PDF format and PDF/A (better) technology to visually improve text image (saving in PDF with search capability) cloud storage (customized) saving results compared to versions of Abyrender personal use at home and in corporate version office. Corporate use in the professional version type. A corporate version workplace license. A workplace license. A license for simultaneous use for multiple jobs is the scale of the professional version.
