Transport in plants worksheet tes

This worksheet covers transportation in plants. Specifically how they transport sugars via the floem (translocation) and water via the xylem (transpiration). We also cover the factors that affect the rate of transpiration: mild intensity, temperature, humidity and airflow. We also did video on 'transport in plants' here: We also do worksheets and videos on many other topics, so please check out them on our Tes page and youTube channel! Tes - YouTube - A collection of four visually appealing worksheets covering all the main aspects of the GCSE topic: transportation in plants. Transpiration is a challenging topic and these worksheets will help students understand the key points and acquay themselves with keywords. All worksheets are provided with a point scheme and are designed to encourage independent learning by students. Included in the pack is the following 1.) a worksheet on transport in plants (arrangement of xylem and loam in the root and trunk) 2.) a worksheet on how water and minerals move in the roots 3.) a worksheet on the process of transpiration 4.) a worksheet on transpiration rate and how to measure it FreeThese lessons are designed to replace textbook-based lessons on plant transport. Lesson 1: computer worksheet. Lesson 2: Clone section follow-up to make sure students are clear on the scientific terms. Also practical observation tribal cross-sections (can make a competition for the best scientific diagrams). Questions to get students thinking about the movement of O₂, CO₂ and H₂O in and out of the leaf. 3. A summary table of the factors affecting transpiration rate. 4. A summary table comparing xylem and phloem. Comments welcome! Read moreFreeReport a problem
