Players play legendary artistic wizards and embark on a romantic journey. It involves you in a murder case and a struggle in a whirlwind of intrigue. That. be a romantic encounter. It’s a romantic story of love, conspiracy and mystery. The background to the game comes from an artistic wizard full of legends and mysteries. On the way, he meets a girl who makes him fall in love and faces a romantic and happy encounter with that girl. But it's not enough. It also involves our artistic genius in a horrific and exciting murder case. The protagonist of the murder case is constantly struggling in the hearts of fascinating, conscientious people. What are the results of a mysterious artistic wizard? Each player's decision triggers the original plot. Does it embrace beauty, or is it stuck in an endless conspiracy? You're the one making the final decision. The back story is about an absolute little magician invited by a black woman and the Duchess to investigate a murder case. The protagonist of the murder case was cold and hot inside. Once you've heard the description, you'll realize that this is a game with a dominant story, glass sning and lily energy, but in short, it's adventurous. The whole course is English, but it's a daily conversation. There are no difficulties in the vernago. Primary school pupils can read and understand the dictionary. Krypton gold looks a little bumpy, but it's a good chance to get a little reward for a free turntable every day, and it can also return the key every day. First of all, it is a free game in the apple shop, and it can be free of krypton gold. The only thing that can affect everyone's gaming is the language that seems to be english only, and there are some unfamiliar words. The love-oriented game has three targets, the Queen, the evil doctor and the gentle master. You can choose someone who will call them to see if it can be a male person, a female person or even them. In the background was the ancient Roman era, when magic, plague, demons, tarot prediction and the Colosseum existed. The plot began with the Queen losing her husband and asking you to be divine. They're going to the palace to find a doctor suspected of killing the king. The style of painting is very beautiful, and it is very distinctive. We can also use the ancient Roman-style love game as a fortune teller. It attracted many players to download it. Each of the three destinations has cuteness. A lot of people like the doctor the most. A blond and bowknit wig suits him well. Let's talk about essential gaming. As a love game, the main line is the text RPG. If you want to go through the numbers and make choices, we need the keys to go through the sections, and some options require gold coins. Then there are three minigames. At Wheel of Fortune you can play once a day for free. You can go to small items, collect items to see the bonus plot. The tarot card daily logging minigame gives you gold coins, and you can give The Raiders will give you prediction for free for seven days. The last mini-game is to roll the dice and exchange love for postcards. Three times a day, it is time to fight for character and test the European spirit. These minigames are the source of gold coins and keys. With 500 gold coins, you can buy an entire number at the site. There are a lot of little surprises and highlights in the game. For example, it bases the color of a name in a dialog box for some natural richness characters. The mini-game has six types of Q-versions of small animals rolling the dice. When collecting items to open a bonus column, special effects for burning seals and six-character profiles can also be interactive. The opening page Painting style is finer, and we can see that it's an exotic story about magic. Here are several primary characters. The protagonist (gender and name are optional) is a vesus magician. He opened a small shop. There is a master named Asra, who is a character in the middle of the screen. Three years ago, there was a plague in Vesuvia. Many people died, and you (as the primary figure) and many people around lost a certain memory. At the beginning of the story, the Queen invited you to the palace. You must investigate the mystery of the Count's death. You're looking for a plague doctor suspected of being a murderer. Main page At the beginning of the game is a prologue. When the prologue's over, there'll be six people lined up. Six characters have separate personalities, but they are all very cute! In the upper-right corner, you must open the number. Money opens up exciting options. You have to fill in the key every day. If you want more money, you can also watch ads. Moreover, the possibility of raising money will not affect the final end at all. Asra, a powerful magician, made us feel like a young and wonderful child. He showed the appearance of a very gente and determined master, but sometimes his face burst red. Asra has purple eyes, silver hair and a fancy dress. In the words of the European and American players, he is a nuisance. This character is intelligent with an unpredictable personality. Asra is very close to MC and her snake and has a strong desire for protection and a small wolf dog. But other things depend on the mood. It's cold and ruthless. He's supposed to be a former lover of the MC. There are many secrets in my body, but he won't tell you. There's a strange relationship between this person and another character. Dr. Julian. And since this beautiful character has a wonderful relationship with all the characters, it feels like there are some trash features. Julian, a handsome and nervous doctor, tried to create an antidote during the plague and was the suspect who killed the Earl. At first glance, he looks romantic. Sophisticated pirate captain. He likes to drink in a particular tavern, but he is nervous talking to people and feels insecure. He always pushes away the people he cares about and faces danger. Sometimes stubbornness makes people want to hit him. He now lives with a relative. Although he is pessimistic, he always thinks about the people around him and has a unique sense of humor. Nadia, the proud Countess, hired you to investigate her ex-husband's cause of death. In short, it's a princely crafted character, sometimes very sexy, and she feeds you with a certain CG. Very lovely Portia, Julian's sister and Queen Nadia's maid. He's good at housework, cooking and gardening. Portia is sweet and cute, just like a kitten. Muriel, who is quiet and avoids the world, is cursed, and anyone who has seen her forgets about her, so her favorite flower is Forgotten-Me-No. The game's production team is wary of the details when creating this character. He and Asra were originally orphans with their old friends. Later, Duke Lucio forced him to be an executioner and executed the prisoners in the courtroom. He uses chains on his body, is covered in scars, does not trust others, is bad at communicating with people and has no sense of security. But he's interested in partners, and his concern for you is deep. Although he looks like a big guy, he has a friendly heart, lives in isolation in the forest, raises a she-wolf, wants to feed the chicks. Lucio, Nadia's dead man made a deal with the devil. It captures the soul between life and death, which is the source of the plague. This person is part of the role of a rich son of a. He's narcissistic. He feels like people all over the country like him. He not only wants powder, he also presents clothes. He's a little party prince. He messed up the earth while he was alive, and Asra hated him especially. He has two big cute dogs, and he claims to be the father of the dog and a big white bird. The formations of her character may have something to do with her childhood, as she has an unusually strict warrior mother. It broke one of his arms, and Asra's father helped him make a golden hand. Lucky roulette, which can be rotated once a day for free, can pull money and magic and collect a certain amount of accessories to open a small story like Lady Nadia's birthday bonus and so on. In the Tarot area, you can get five gold coins every day. And you can get a free tarot prophecy in 7 days, which is genuine prediction. Game 3 is exciting, called Heart Hunter. This little game can collect postcards from six characters for you. The letters have their message to you, which is particularly interesting. You can also claim prizes by collecting Postcards. Money is expensive, maybe because of the difficult challenges. You can buy 100 gold \$5, but \$1,000 gold coin for \$5? Buy more, but the unit price goes up? Maybe the playmaker has made the wrong calculations on this target. For a similar recommendation, Romance Club is an entertaining romantic love simulation game.
