## Edit this cookie apk

Edit This cookie is a cookie manager. You can add, delete, edit, search, protect and block cookies. You can do anything you might have to do with cookies. EditThisCookie is a convenient, quick and easy solution for those who need a free cookie manager. The plug-in can be installed by both Chrome and Opera users and offers great flexibility in cookie processing. Efficient management, creation, or blocking of cookies This extension allows you to have the same features in Opera and Chrome. After installing the extension, you can use the service immediately. It is free, open source, and does not require registration. Its simplicity makes EditThisCookie easy to use and is suitable for various use cases. On any website, you can click the cookie icon (it will be added to the toolbar). The add-on drop-down displays all cookies on the current page, including its content. You can add, delete, edit, or create new cookies, e.B. for testing purposes. If you are concerned about online privacy, you can also filter and block third-party cookies. Instruments for developers, testers and technical users EditThisCookie is suitable for all types of users. For example, you can create your own cookies, import existing cookies (in JSON format only), or export cookies from any website. The export option is slightly more flexible because it allows users to output data in multiple formats: JSON, Netscape HTTP cookie file, Perl::LWP, or in name-value pairs separated by a semicolon. You can override the maximum age for each cookie, automatically reload the pages after submitting cookie changes, or use the Protect Cookie feature. You can protect a cookie by clicking the Set as read-only button. This action makes it possible to maintain the original value of the cookie so that the website can no longer change it. Conclusion All in all, EditThisCookie is an excellent choice for everyone. If you are a regular, non-technical user, it is helpful to understand how the Internet works, how your data is stored and used, and how you can improve your privacy. Read more about it here. If you are a technical person, the extension provides access to many useful functions for your technical requirements and requirements.
