Go here to register your MyJDownloader account: Send your feedback! We are very happy with every little feedback that comes to us. Your words keep us going. Use the buttons in the app or switch to . FOLLOW US JDownloader is a free open source download manager with a huge developer community and is available for Windows, Linux and Mac. JDownloader is not available for Android but there are many alternatives with similar features. The most popular Android alternative is uGet, which is both free and Open Source. If that doesn't suit you, our users have ranked more than 100 alternatives to JDownloader and 12 are available for Android, so I hope you can find a suitable replacement. JDownloader Remote Client.Full control on JDlownloader from Android phone:- Current downloads.- Links with full text analysis.- Stop/Start/Restart/Shutdown.- Set speed limit / max download.- Premium account.- Integration with navigator for sharing links.- Compatibility with night build.- Rss reader and link control. Read FAQ and Help.Check the setup before saying it doesn't work! Most issues come from a not good or incomplete configurationHelp & Configuration Tutorial: Adding links. Sometimes the links stay in the grabber, restarting jdownloader can help! Also check the JDownloader Max. Downloads & Speed limit parameters. No Captcha.Captcha cannot work, JDownloader Remote Controller does not support it. I know many of you have requested it, you are notified, so please do not post negative reviews request it. If one day it is possible to implement it, we will do so. JDownloader 2.JDownloaderRCPro is NOT compatible with JDownloader 2 BETA. Before using:- Activate the JDownloader remote control plug-in.- Make sure the IP is public and open the port.- Change the configuration after installation! JDownloaderRC Pro Version is available: free ads and priority for updates. Thank you for supporting us. Most of us benefit from a download manager. With one of these useful utilities installed, you can not only enjoy faster downloads (and who doesn't want to get their files faster?) but also benefit from options like pausing and resuming downloads. While there are paid programs you could use, you can find a free download manager that is with characteristics. Some will convert files between formats for you, while others will automatically play media files when they are downloaded. Most offer download scheduling, and there are numerous extras like BitTorrent support, batch download, a range of security features, file preview, and support for compressed file formats to look for. Whether you're looking for standalone software or something that connects to your favorite web browser, there's so much choice that it can be hard to know where to start. If you're struggling to decide which tool you should use, read on to find out which we think are the best free download managers out there.1. Ninja Download Manager. The schedule of downloadsNinja Download Manager is a relatively newcomer to the download party and looks considerably more contemporary than its contemporaries. Its interface is simple and modern (if a bit dark) and its accelerator can help you get your files 10 times faster. It does this by dividing each file into blocks, then downloading each using a different server connection, making downloads not only faster, but also more reliable. If you like music and movies, you'll be delighted by its sequential setting, which allows you to start playing a file while it's still downloading. There is also a built-in video downloader with support for YouTube and Vimeo and a video converter that automatically changes the file format once the download is finished. There are plenty of great options around, but if you love music, movies, and TV, Ninja Download Manager is the tool for you. Note that the link to download the free version of Ninja Download Manager is located at the bottom of the developer's homepage.2. Free Download Manager.Web-based remote controlFree Download Manager aims to be everything for all people – and is successful. It's a download accelerator, BitTorrent client, audio and video preview viewer, and traffic management tool, and because it's open source, it's completely free and receives regular updates from its developer community. It includes powerful scheduling features and a very convenient remote control, which means you can keep your downloads running and check their progress from any internet-connected device. It can spider sites to download specific types of files, and you can choose to download only the bits of a ZIP file that you actually want. It's a great program and it was hard to choose between this and Ninja Internet Download Manager for the top spot.3. Download Accelerator Plus. Installer contains adwareJDownloader is a free open source download manager with a developer community, and is available for Windows, Linux, and Mac.It's truly one for advanced users, with support for over 300 decryption plugins, RAR auto extraction, password list search, and OCR to complete some of the captcha controls 'I'm not a robot' robot' on download sites. You will need the object to run and you will have to be careful when installing it: the installer contains adware, which will come bundled with the download manager if you do not specifically deselect it. Also pay attention to the fake download buttons on the site; the actual download link is a line of text.5. Extra software bundledEagleGet is a smart and modern download manager that makes downloading all kinds of media files a breeze. It boasts accelerated downloads, automatic malware control, automatic and batch downloads, and many other features. EagleGet's browser extension works with Chrome, Firefox, Opera, and Internet Explorer, identifying downloadable content on pages and allowing you to grab it with a couple of clicks. All open browser windows will be closed when you install EagleGet, so make sure you've saved all work in progress before you get started. Keep your files safe with the best. Get a for an extra layer of online security. JDownloaderRcPro 1.5.4 Full APK. JDownloader Remote Client Pro Total Control JDlownloader from your Android phone: - download. - Links with full text analysis. - Stop / Start / Stop / Restart. - Set maximum speed limits/downloads. - Subscription account. - Integration with the browser of shared links. - Compatibility with night construction. - RSS reader and link checker. Checker.
