Clash of lights boom beach

Boom Beach - an exciting online strategy game created by the developers of Clash of Clans. Gamers will get their own personal peninsula, they will have to cope with their development and attack the enemy country, capturing their islands. The game is almost identical Clash of Clans, where you will be given the main base, which will need to be improved, extracting different resources. As with any such strategy, actions and modifications need a certain amount of time, therefore the game is very addictive, which will play for more than a month. All buildings are divided into several options: Support - there are different improvements; Economical - here players will find buildings that provide them with resources and protection - a protective structure that helps to repel enemy attacks. When gamers will be able to equip their main base, they will immediately fall into the hurricane of hellish apocalypse, fighting with other players. It is possible to attack the shores of other players, for the success of the battle winners you will be given resources and you can have a great time. The offensive is being carried out by landing their troops on the enemy's shores, two cargo ships and one artillery ship. While the attacking unit will rush into the attack you can control your armed fighters mass destruction of the main enemy sites.
