It works on the HTML5 canvas, so images are created instantly on your own device. More commonly, people use the generator to add text captions to established memes, so technically it's more of a captioner meme than a meme maker. However, you can also upload your own images as templates. How do I customize my meme? You can move and resize text boxes by dragging them. If you're on a mobile device, you may first need to check Enable drag-or-drop in the More Options section. You can customize the font color and outline color next to where you type the text. You can further customize the font in the More Options section and also add additional text boxes. Imgflip supports all Windows/Mac web fonts and fonts, including bold and italicized fonts, if they are installed on your device. Any other fonts on your device can also be used. Note that Android and other mobile operating systems can support fewer fonts unless you install them yourself. You can insert popular or custom stickers and other images, such as scumbag hats, sunglasses, voice bubbles and more. Opacity and resizing are supported. You can rotate, reverse, and trim the templates you upload. You can draw, sketch, or write in your meme using the panel just above the meme preview image. You can create meme strings from multiple vertically stacked images by adding new images with the option below the current image. Can I use the generator for more than just memes? Yes! The Meme Generator is a flexible tool for many purposes. By uploading custom images and using all customizations, you can design many creative works, such as posters, banners, ads, and other custom graphics. Why is there a watermark imgflip.com in my mems? The Imgflip watermark helps other people find where the meme was created, so they can make memes too! However, if you really want to, you can remove our watermark from all the images you create, as well as delete ads and overload your image creation skills, using Imgflip Pro or Imgflip Pro Basic. Can I make animated or video mems? Yes! Meme Templates will be displayed when you search for the previous Meme Generator (try party parrot). If you can't find the meme you want, browse all GIF templates or upload and save your own animated template using gif maker. Do you have a crazy AI that can write memes for me? It's funny that you ask. Why yes, we do.
