

Sharp tv troubleshooting no picture no sound

The status is not open for further answers. The last next sort by votes has tried to set up procedures by Anpluggang, volume down & and set connections. Nothing seems to work now. Tv is only 2 and a half year old and my extension warranty expired 6 th Advesi first. Please help!!! Hi, if you have a multimeter, give me the quality on all the pans of the CN3 connector. But be careful to do anything less on this board. The status is not open for further answers. My 55 Samsung TV has a small light on the bottom of the screen. When I press on the remote control to change this TV, the light for power is bright. However, I see no picture and no sound is heard. This is the first time that it has ever happened. I've also added TV for 10 minutes including Inploggang to try all the rearrangement procedures. Is there a rearrangement method for flat panel TV or does that mean something is burning or bad in TV? The TV on light comes on power but there is no picture or sound here to check when your TV is changed, electric light is on, but no picture is seen or sound is heard: 1-Make sure the components you are using (X-box, cable, SAT, ROKU) is on. 2-To be sure that all cables and tv swells are safely linked to the output of the pit and components. 3-Make sure you are on the right input because there is nothing connected to this input as some TV. 4-Input Unplug which you are trying to use from all cords and cables TV. 6-Make sure Energy is not in safe mode, click this button to return the remote control to normal mode. 7-TV Unplug for 10 minutes to watch if there was temporarily a time problem with TV. Disconnect the TV from electricity for 8-2 minutes, then reset it from 10 to 20 seconds when plogging it back and capturing the power button on this TV. 9-If after examining all these different issues, you may have a wrong power supply board, a bad sensor on the power supply board, loose wire control, or loose ribbon connector in this TV. 10-Most likely when there is electric light on a TV but no picture and no sound, this power supply board has failed. TV Power Supply Board-Popped Kapakators TV Power Supply Boards Look For Why They Have Failed? The papacators on an electricity supply board can get an electrical shutdown or a hike from someone to fail or pop. Check the power supply board and find the popped papacutars are located on the power supply board in TV where the electric bones are plugged in. Also check the power supply board for any harmful ingredients or snares. Change the characters or replace the board if needed. TV power supply boards-alternate parts of television as a safety note- If you choose to open the TV, unplug it, and wait at least 60 minutes so that the footage can be stored in tv plus tv. There is electric light on your TV why most of the above methods to solve but no sound or picture is applicable to all tv brands LG, Samsung, Sony, Sharp, Toshiba, Visao, Chapras, Element, etc...
