Today we will look at the largest independent app store that allows you to configure and manage your own Android store plus give you tons of free apps, this program is Aptoide for PC and Android devices in general. Aptoide is an application that serves as a link between the installed device and the servers of the various stores that app users have on their website. The main feature of this app is to provide APK files for free. If you sign up on Aptoide's official website, you can create your own app store for any platform like Android, iOS, Windows Phone, Blackberry, Nokia, etc. Now that you can understand why this app is so popular, we recommend downloading Aptoide so you can recognize how great and easy to use this app is. Apps work perfectly WITHOUT any Google Services, so you'll be able to use them hassle-free. In addition, the software does not have a restricting policy like Google, so people from all countries of the world can install, use, upgrade new applications without worrying at all and completely free. Aptoide is a platform where you will be able to download all the apps you want for your Android device without having to access Google Play. This is an ideal place for those who are unhappy with official stores or simply looking for a different market. Using Aptoide is easy, you just need to access it from your device and enter whatever you are looking for in the search bar at the top. This app will quickly return you a list of all the apps that fit your criteria so you can choose which apps you want to download. If you don't own an Android device, you can always have it on your PC by downloading and installing Bluestacks, a program that simulates an almost perfect Android experience. The app can only be downloaded directly from the official website as it has long since been removed from the Google Play Store. As stated previously, the program is merely available for devices based on the Android operating system so if you own an iPhone, Nokia or Blackberry, forget about it, there are other great alternatives to try on these popular platforms. After installing Aptoide you have to add some stores (i.e. Repository) to find and install the app, then the problem of choosing the app you want to download and install. It also provides ratings and reviews for all apps, descriptions, it let you know if it's worth downloading, etc. Everything in Aptoide is designed perfectly and carefully so its use is simple and intuitive, suitable for all types of users. This market is also a good choice for Google Play for those who prefer to download content from less popular sites All in all, Aptoide is a free application made for users of the Android operating system that allows to get thousands of free applications without the risk of getting any viruses or malware on our mobile phones or tablets. Unlike other similar applications, on Aptoide we can create our own app store, where we will be able to share applications that we want others to download or even our own applications in case we are developers. All this means that every day thousands of users share and distribute Android apps through this useful tool. Due to all the features described earlier, we recommend downloading this app especially because of the large number of apps that we can find, download and install without spending any money. Last but not least, Aptoide is available in many languages such as English, Portuguese, Chinese and Spanish, among the most important. Aptoide is an open source independent Android app store that allows you to install and discover apps easily, interestingly and securely. Aptoide is community-oriented and provides applications through social experiences. It provides opportunities for any user to create and manage their own store, upload their own app, track community suggestions, and discover new content.
