Void elsword leveling guide

Yes, you are reading right, this is a guide to earn a lot of ED. I recently noticed that my friends don't know how to make money in this game, so I made this guide for them and now I'm doing it for you. Before I start, note that this guide has been made for the EU server, the prices and values can change greatly for different servers. As I said on the title, the manual will be divided into transmission level. Eventually you'll find additional tips useful for everyoneLowest levels: SD gear or below is the lowest gear you'll ever get. With this outfit your best bet is to run the SD. The drop you want from this Barrier Fragments. They are usually sold for 60k or higher. In addition to the snippets you can also get gear cubes that can be sold. Unique arms cubes can be sold for 15M, for example. Pros and cons: SDs are the easiest end dungeon game, however they require tickets to enter. While tickets can be easily charred, they are small to reduce benefits. The best way to farm tickets is just running up to elianode dungeons. Medium: henir or heroic gear: This is probably the outfit most players will have, add empy weapons or not. With this equipment you are ready for Hell's Farm: Hall El.The drop you want to get from here Elianod tickets. Each of them is usually sold for 9.5M aprox. Also, you can get El Tears and accessory that sells for 25M. I recommend using a character with auto-directed skills such as Daybreaker or Sariel as it will make the second half of the stage much faster. A mountain with automatic targeted attacks can work too if you have one (which you can easily buy after this guide) and if you're lucky, you might even get a legendary forze skill. Pros and cons: Does not require tickets to enter and is a solo dungeon, meaning that quests and treasure chests will appear at normal speed. However, the drop in agriculture here has a low chance of falling, which may result in no falls at all. Light difficulty consumes less than 10%, but enemies are really annoying, while hard consumes less than 10%, but lighter enemies. The choice is hers. High-level transmission: Elianod armor (with good El tears) and Void weapons. At this level, you may already know, but the best place for farming will be the Debrian Laboratory. Your desired fall here are three colors of dust that make El tears. Blue Dust sells for 150-250k each (dust prices change very quickly) Red is about 130K and purple is about 30K. Secondary drop you would farming Elianod tickets again. In addition to dust, you can get El tears yourself, and if you Lucky: forze skills. And an accessory. Pros and cons. Tickets are not required, and dust drops are quite high. However, the dungeon can be difficult even for directed players and, moreover, you may die during the second midboss dying animation as a result of costly gear repairs. GOD level gear: P2W Elianod and empty weapons. I can't. why would you need a farm ED at this level, but there is room even for you: Elianod Tower Defense. There are only two things worth farming here: El Tears and Accessory. The accessory can be sold for about 1B ED and at the same time you can get about 6 El Tears to run if you're lucky. In the first phase of the dungeon ignore the boss and kill the mini-bosses to get more El tears. Pros and cons: Three tickets for entry are terribly expensive and you will depend on RNG to get something valuable. It also consumes a lot of stamina. Another more viable option for this level is to run the Debrian laboratory alone. You get lower drop rates, but a huge EXP bonus. Tips for improving benefits!! - 100 ERP's mining chance is a must for obvious reasons. Getting an extra chance to rob from other sources such as titles, cinematography, El Tears.... It's also a good idea.- ED drop ERP isn't as impactful as robbing chance, but it still increases the raw money you have it from the dungeons, use only if you have a spare point.- Get a silver board card from Ariel to get 9 slots sale and don't have to pay for a seat items on board (30 days cost just 5M) - Make Reuben hot springs your new home A: Buy boiled eggs for cheap mana pots, use Anna to repair and get a positive effect (and recharge the fastenings faster if you use them)- Pet aura is a must. You will never imagine how many drops you have lost for not having it. If you don't have it, use this guide to buy it as soon as possible.- Feed Anna gloves for your pet: Reuben's shop owner sells the cheapest armor in the game (gloves). Feeding them to your pet is more beneficial as they are a lot cheaper than the ed you get by selling high-level garbage.- Always bring three friends. If you make Hall El, the big sides increase the prey rate and reduce your endurance intake.- Wait for the Gate of Darkness to have a positive effect to repair your gear, as its positive effect will reduce the cost of it by 50%. - If you sell things that need printing always use this formula: the value of the goods - (print price - 10% board tax) often ask questions:Why not farm heroic dungeons? Aside from the ticket requirement, heroic gears need seals to be sold, which leaves only minerals to be sold, and even with ERP their speed is very low. They are also too tight for low-level transmission and too easy for mid-level gear. Why elle tears is not the main goal? Only a few El tears are worth selling and they still need to be sealed. Inexperienced players can lose a huge amount of ED by trying to useless tears or selling expensive cheap. Erp? El Resonance PointsWhy isn't it easy to run a debrikan lab? I've done this guide trying to think the most effective way to face things. While the Debrri laboratory has the best performance, low-level players will spend too much time and resources doing so. Will I be rich in one day with this guide?lol no. This main goal is to get As much as possible ED with the least wasting of resources, you need time to get a lot of money. I think that's it.
