However, we'll give it a try. Here are seven of the best Google apps on the App Store. Why should you care? Google is one of the largest companies in the world, and its apps and services are usually compatible across multiple platforms, including iOS, Android, macOS and Windows. Google CalendarYes, your iOS device ships with the local Calendar app. However, if you're looking for something better, look no further than the Google Calendar app. Google Calendar is fully integrated with Gmail events and can easily pull in flights, hotel, concert and restaurant reservations. You can also add personal goals such as going to the gym every two days that are added to your calendar automatically. Looking for more reasons to switch? Google Calendar works with all calendars on your device, including Exchange and iCloud. is also integrated with the Health to track your workouts. On the arrival of YouTubeUntil iOS 6 in 2012, YouTube was the native app that was found on all iOS devices. Now you have to install the app yourself. No matter the app, you can watch, stream and discover everything that the free YouTube service has to offer. Use the app to subscribe to channels, share with friends, or upload videos. Feeling adventurous? With a YouTube Red premium subscription, you can watch ad-free video, access exclusive content, and use background and offline video playback. The subscript also provides access to Google Play Music All Access. On Google MapsLike YouTube, Google Maps once came preinstalled on every iOS device. No more. Since 2012, you've had to install Google Maps from the App Store. By contrast, every iPhone and iPad is now shipped with Apple Maps.Whether you should use Google Maps using Apple Maps, is still open for debate. Both are among the most popular apps on the App Store, and it's not likely to change anytime soon. Google PhotosI don't use Google Photos and happens to have a lot of photos and videos, you're missing. Google Photos offers free storage for unlimited photos and videos, up to 16 MP and 1080p HD, no matter what device. Let me repeat; Google gives you free storage of high quality images instead of Apple, which pays for iCloud storage after 5GB. If you want to save your pictures to their original size, you'll need to buy storage with a subscription. Google EarthUntil recently, Google did not see the iOS version of Google Earth much love. That all changed in 2017, when the app finally received a major update. The new Google Earth app lets you explore the world by swiping your finger. Fly through landmarks and cities like Paris, New York, and Tokyo in 3D, then use more micro-reviews using street view. With Voyager, visit places in all new ways including Sesame Street, BBC Earth, NASA and more. GboardHas a myriad of keyboard apps available in the App Store, but only one Gboard. It has all the tools you want to use on your digital keyboard, as well as a lot of extras, including GIF images and built-in Google search. In addition, there is no longer a program switching; just search and send directly from the keyboard. YouTube TVOver top (OTT) tv subscription services continue to improve year by year. In 2017, YouTube TV joined the market for Sling TV, PlayStation Vue, DirecTV Now and Hulu TV. With YouTube TV, you can get 24/7 access to more than 50 channels, as well as unlimited cloud storage. Each subscription has six accounts per household. YouTube TV is slowly becoming my favorite OTT service mainly for its ease of use budget price. The best part is that it's available on multiple devices, including iOS, tvOS, Android, and Windows. Mac users can also use this service using Chrome. Best Google there are plenty of other Google apps worth considering, including Gmail, the official Google app, and much more. What are your favorite Google apps for iOS? Let us know below. Like the App Store for iOS, android device owners go to apps and games on the Google Play Store. Because Android apps don't work on iOS, it's not possible to run the full Google Play Store on an iPhone or iPad. But that's not the end of the story. Google offers the Google Play Movies & TV app for iOS, as well as Google Play Music and Google Play Books. You can install any of these apps to access this Google Play content on your iPhone or iPad. Here's how. Check out the products mentioned in this article: iPhone 11 (From \$699.99 best buy) iPad (from \$329.99 best buy)Samsung Galaxy S10 (from \$899.99 buy best) How to get Google Play apps on your iPhone If you own Google Play content and want to access it on your iPhone, You can do this by installing the right apps: You can install Google Play apps for movies and TV, music, and books on your iPhone. Dave Johnson/Business Insider When you run each of these apps for the first time, you will need to log in to your Google Account to see your content. How to buy content for Google Play Google Play apps for movies, music, and books doesn't allow in-app purchases, so for example, you can't buy a movie from the Google Play Movies & TV app. Instead, you'll need to purchase from an Android device or desktop computer into a web browser. No matter where you make your purchase, as long as it uses your Google Account, it'll be available on any device running Google Play. If you haven't already, you'll need to set up a payment method for your Google Account:1. Navigate to the Google Play site in your browser. If necessary, sign in to your Google Account. 2. In the left pane, click Payment methods. 3. If you haven't already configured your payment method, click Add payment method. To make Google Play purchases, you're going to need to add a payment method to your Google account. Dave Johnson/Business Insider 4. Follow the instructions to add a credit card or other payment method to your account. After you set up your payment method, you can buy or rent content on Google Play:1. In your browser, go back to Google Play.2. In the upper-left pane, click the Google Play site you want to visit: Movies & TV, Music, or Books. All purchases you make on your desktop will be instantly available on iPhone. Dave Johnson/Business Insider 3. Browse or search for the content you want, and then make a purchase. Content will be available on your iPhone within minutes. Related coverage from How to Do Everything: Tech: Insider Inc. receives a commission when you buy through our links. SearchClear searchClose searchGoogle appsMain menu You can your Google Account account mobile device in several different ways. Sign in to Safari You can sign in to your Google Account in Safari, which opens on your device. When you sign in to Safari, you're using a personalized experience with Google products on the web With one tap, sign-in sites and apps More control over privacy settings When you're signed in, your Google Account activity controls and ad preferences automatically apply to safari.
