## Ipod 30gb model a1136 instruction manual

Деякі функції Word не вадобрацься в Google Документац. Якъо ви внесете змiни, налаштування цiц цункцiй буде скинуто. Докладнiше By Shawn McClain Updated on February 10, 2017 The iPod model number A1136 is the fifth generation of the original iPod, which includes a touch wheel and a color display. This iPod allows you to listen to music and view pictures, but also includes some additional features such as an alarm and voice notes. To use your iPod A1136 model, you will first need to get media to the device by connecting it to your computer, and then use the iPod interface to navigate through the device. Plug the USB cable from the iPod into the port at the bottom of the device and connect the other end to the iPod power adapter. Connect the adapter to an electrical outlet and let the iPod load for a few hours before you start using it. While waiting for the device to load, use the iPod CD that came with the device to install iTunes on your computer, along with the iPod software drivers. Connect your iPod to a USB 2.0 port available on your computer. A small window will appear in the iTunes program. Enter a name for your device and choose what kind of media you want to automatically synchronize with your iPod. Once you click Done, the music and photos you have configured with iTunes will automatically download to your iPod. Disconnect your iPod once the transfer is complete and the right disconnect messages appears at the top of the iTunes window. Press any iPod button to activate it, and the main menu will appear. Slide your finger into a circular motion around the click wheel on the face of the iPod to scroll through the menu. You don't need to push it down, just swipe around the wheel. Press the Select button in the middle of the click wheel to select an item. Choose Music from the main menu to start listening to music on your iPod. Go to the song, album, or playlist you want to play, then press the Play/Pause button at the bottom of the click wheel to start playback. Tap the Play/Pause button to pause playback again, or tap the Menu button to return to the menu. While the screen displays the song information currently being played, you can move your finger around the click wheel to adjust the volume. Tap the Next/Fast Forward button, located on the right side of the click wheel, to skip to the album's next song or playlist. Press and hold this button to fast forward through the current song. Press the Previous/Rewind button, located on the left side of the click wheel, to return to the start of the song. Press it twice to go to the previous song on the album or playlist, and press it to rewind through the current song. Move the Hold switch, which is located at the top of the iPod, to the to turn off all entries on your device. This allows you to put it in your pocket or bag without worrying about accidentally touching the controls. Select Photos from the main menu to look through the images you have stored on the iPod. Use the click wheel to scroll through the images, or press the Play/Pause button to start a slide show that will be advanced automatically. Press and hold the Play/Pause button when you're done using your iPod, which will turn off your device. Apple iPad Mac TV Watch Music Support
