1640s. However, this expression is much more recent. The evocative phrase, (which is not 'colder than a tit witch' by the way, this is just a spelling mistake), is sometimes written as cold as a witch. It appears to have been first recorded by American historian and writer Francis Van Wyck Mason, in one of his mystery novels, Spider House, 1932:It's cold as a witch's tit outside. In the 1949 version of the book I have access to Mason did not use the previous line, preferring as cold as an Arctic cookie, as cold as scratching an ice shovel on an icy pavement, as cold as a tombstone, as cold as the phrasom's heart. Why we opted for these and not for the witch he used in the 1932 edition is unclear. Mason could have coined the expression or it could have been the street slang he had heard. Using the other evocative and self-written as cold as... phrases in his 1949 edition suggests that he may have invented the phrase himself. Either way, we can be sure it dates from around that time and was coined in the US. Whoever coined it may have been making an allusion to the days of witch hunters. It was believed in the 17th century that the witch would suck her relatives with tits in various parts of her body. Evidence of this brand of witches, which did not bleed when punctured, was considered sufficient proof of witchcraft. Not everyone was convinced by this method. The English clerygman John Webster made public his doubts in his denunciation of the witch hunt Displaying Supposed Witchcraft, 1677:Now, if all these [ber breakfasts, etc.] were witch marks, then few would go free. A more likely explanation is that the expression, along with the most effusive, as cold as the titor of a witch in a brass monkey time. A witch's kiss variant can be found a little earlier, in illinois newspaper The Daily Register-Gazette, June 1918:The inside of a cloud is cold weather 'Brass monkey time.' A witch's kiss variant can be found a little earlier, in illinois newspaper The Daily Register-Gazette, June 1918:The inside of a cloud is co
