S curl texturizer instructions

g-stockstudio/i/Stock/GettyImages You can change your rough or curly hair by applying hair text. Luster's S-Curl texter is designed for men who want to change the look and feel of their hair. It consists of chemicals that loosen the pattern of hair curls. S-Curl is sold as a kit and the products attached after the application are required for maintenance. The intended result is wavy, smooth hair, which is easier to handle. Wash your hair if it has a build up of oil or hair products, then let it dry and wait 24 hours before applying S-Curl. Rub the protective gel around the hair line to avoid skin irritation or chemical burns, then put on disposable gloves. From the container, cut out the cream of the S-Curl text initiator using the end of a medium-sized tooth comb. Slather cream on the hair, starting from the curly or most resistant area. Continue the process until all the hair is covered. Comb the product through the hair, in the direction of your usual style. Set the timer from 10 to 15 minutes. Rate the texture of the hair when the time is up. Add processing time if your hair has not reached the intended Model S. Wash the text text from the hair with warm water. Do not allow dirty water to get into the ears or eyes. Wash your hair with shampoo from the set. It is designed to produce pink bubbles if any texturizing cream remains in your hair. Continue to wash your hair until the suds become white. Then rinse with warm water until the water is clear. Blot hair with a towel to remove extra water. Do not allow the hair to dry completely. Saturate your hair with a spray from the set and rub it. For the curling style, gently lift the ends of the hair with a comb or choose. For a wavy style, comb your hair into the desired style, using a small serrated comb. Use products to keep S-Curl text moistened. Do not allow the substance to remain on the hair for more than 35 minutes. Do not use S-Curl for hair that is chemically treated or damaged. Do not use the product if your scalp is irritated or has cuts or scabs. The product S Curl, created by Luster, is a text text that helps loosen the curls of coarse hair. The text is mainly used by men because it is ideal for men with rough, curly hair and produces a uniform wave pattern that works well with short haircuts. There are several other S Curl products that Luster recommends to use to make hair moistened and healthy after being applied to S Curl. This hair treatment can be carried out at home, but it is very important to follow the instructions that are provided with the product in order to achieve the best results. Start from the back of the head and apply s curl text cream over the head with a large tooth comb for dry hair. Hair around the neck often curling and more resistant to chemicals, so curls in this this hair may take more time to relax. Gently comb the cream to ensure that all parts of the hair are processed. Leave S Curl on the hair until the text needlewoman creates a pattern of S-shaped waves in the hair. If your hair is particularly thin, leaving S Curl for a minute or two is ideal. For hair that is much thicker, processing may take an extra minute. Thoroughly wash the text from the hair with warm water. Apply s curl neutralising shampoo to your hair and wash at least twice to ensure that all text recorders are removed from the hair. Wash the latch with warm water. Blot hair dry with a towel. Spray your hair with S Curl No Drip Activator and gently massage the product through your hair to make it evenly conditioned. Paused... Unfortunately, your browser does not support HTML5 videos. Download it. If you have tight curls, treating your hair with an S-curl texturizer can help loosen and relax curls and easier style of hair. One popular style for people with short, coarse hair after texturizing treatment is the appearance of 360 waves, where curls were trained to lie on the scalp, completely 360 degrees around the head. To create this look yourself, start with texturizer treatment and then create 360 waves of hair in a few weeks. MStudioImages/E+/GettyImages Apply The Texturizer You can find s-curl texturizer treatment in a pharmacy or beauty supply store. Most kits include latex gloves, texturizer treatment, neutralising shampoo, conditioner and style product, such as gel or spray. You will also need vaseline and a small toothache. Start by applying vaseline to the entire hair line to avoid burning the skin with a text message. Then put on latex gloves and use a comb to tear off the dollop of the S-curl texturizer. Carefully comb the text of the text through the hair for at least 10 minutes until you see the S or wave pattern in the hair. After that, wash the text with warm water and wash your hair with a neutralized shampoo. Wash and repeat if necessary until all the texturizer is out of your hair. Finally apply the hair conditioner and rinse after about five minutes. Hair cleansing After text processing, dry your hair and start the process of creating 360 waves. Your hair has grown to about an inch in length, so you have enough to work with as you train it. Your hair brush will be the most important tool in your style toolkit as you work towards 360 waves. Brush daily for 10 minutes or even longer, starting with a wreath of the head and working your way to the hair line. Any hard, medium or soft brush of wild boar bristle will do the trick. Be sure to brush evenly around your entire head, and avoid shampooing for one to two weeks as you create waves.

After cleaning the hair, attach the rag on the head. You may want to do this process at night so that you can sleep do-rag and continue to squeeze your hair while you sleep. Do not use hair in the morning when you remove the rag, because you will peel the pattern of waves. In a few weeks on the hair you will create an S-curl pattern. To keep your waves looking shiny and healthy, use hot oil for treatment or deep conditioner every month. Leave it for about 30-45 minutes, wash and repeat the cleaning process above.
