Ozark trail 3 person dome tent instructions

The Ozark Trail 3-Dome connecting tent is a set of three tents suitable for 8 to 10 people. The three tents are connected, and can be accessed without having to leave the tent system. A large, connected carpet covers the area in front of the three tents. You can use this space for tasks. Tent assembly is straightforward, and you can do it relatively quickly after you get the hang of it. Items you will need Ozark Trail 3 Dome connecting tentStakesHammer Make sure that all parts are included in the package and in good condition. See the owner's manual for a list of parts and their description. Lay out the center tent on a flat surface. The center tent is the largest. Confirm that the door is unpacked. Extend the doormat out as far as possible on either side. Extend the tent posts by pulling them outwards on each side. Slide the main post through one of the center sleeves. Attach the end of the pole to the five-way center hub. Repeat this for the other four main poles. Secure the other end of the poles to the pin rings at the base of the tent. Attach the fast clips to each of the poles. The quick clamps are attached to the body of the tents. Lay out the smaller tents on both sides of the main tent. Slide a pole through the front poll sleeve and the rear poll sleeve. Your action should create an X shape. Secure the posts to the base of the tent with pin rings. Snap quick clips on the poles along their entire length. Repeat this step for the second small tent. Connect the three tents by zipping together the extension flaps. The zipper extension flaps are on both sides of the main tent and zip on to the outer zipper on the side door of each small tent. Connect the center tent rainfly, using the S-hooks to the small loops in each corner of the center tent. Tie the nylon brackets around each pole. These are at the bottom of the rainfly. Slide the rainfly through the sleeve below the rainfly logo. Secure each end of the rainfly with the metal grommets on the front stolphysan. Repeat this step for the two smaller tents. Secure the tents to the ground by running a stake through each pin ring. Secure the doormat by running a stake through each large weaving loop. Ozark Trail 3 Room Tent 20x10Ozark 6 Person Dome Tent. 1 Answer SOURCE: I have this tent and have successfully uploaded it a few times. It's a big tent but it's frustrating to set up sometimes. Plan on having multiple people to help you. I think that in high outcome helps if there are a total of 3-4 of you. The poles are color coded. The center support is red rods. The two side supports are blue with the graphite looking rod that runs through the tent. Spread the tent on the ground and try to square it up and do it evenly. Drive the center pole through the top and connect to the curved pieces, which then connect to red dot posts on the side. Lift it all up. Have two people hold these poles for a while. Get the bue poles into the black clutches and put the graphite looking for the rod through the tent. It's going to be a little tight. Hoist the blue poles in place. The bottom of the blue dot poles should be about two meters from the center. They extend outwardat an angle of about 30 degrees. Hold your center people holding my poles and let the two blue dot pole sections extend outwards. You're starting to see a tent shape. Your center holder people may need to keep and keep an eye on the poles. Now, start trying to get some bets in. Once these are in and things start to get tight, it should start holding on its own. Work all the effort in and make adjustments in all the poles needed. Extend the red dot posts upwards until the ceiling is at the right height. I usually do this last time. The fly basically cuts on into holes on the blue dot posts. It's a bit of a pain to set up but it's a big tent and works well when it's up. I took lots of pictures after I got it up the first time. When I took it down, I shot the pictures. Then I turn the order and printed them into a book and now kind of use it as my manual. Insted on Jun 22, 2010.
