Application - To have internet backup mode via Airbox to view the status, downloaded volume and user list accES INTERNET LiveboxCONTROLE Storage - Plan Internet connection intervals on each of the home's equipment, including your children's equipment, immediately disable mobile Internet access, tablets and PCs that you have chosen to turn on or off Wi-Fi all the time - Wi-Fi plan to stop it at night Wi-FIFys enjoy friends with Wi-Fi and Internet connection by sharing Wi-Fi key: via SMS via simple copy and insertion or by qRcodePERSONNALISER YOUR WI-FI - Renaming your Livebox - Easy to change wi-fiDEPANNER your LIVEBOX key, TV or TELEPHONE - Running a diagnosis of an identical diagnosis by consultants with one click to identify your problem Not requiring technical skills - If tests detect a breakdown, the app will offer you to exchange your defective Livebox, trigger the intervention technique to repair your line- If necessary you will be asked to contact customer service for your problemThe app my Livebox is fully available with TalkBack. It can be used by visually impaired people, regardless of good ergonomics-----We invite you to continue to share your suggestions, so that each update will continue to improve this service that belongs to you. Contact us by phone - Orange informs you: - about the inconvenience, influencing your Internet access due to work to improve the network or incidents on the Orange network - if you are eligible for the Service Fibre on the Orange Network - Wi-Fi Diagnosis: to diagnose the Wi-Fi of your Livebox from the universe Problem and optimization or homepage - My Wi-Fi allows you to view on levels of detailed connected equipment behind Wi-Fi Repeater) My Livebox Permissibility from Google Play: Livebox APK Identity: Find accounts on the deviceMa Livebox APK Contacts: find accounts on the deviceMa Livebox APK Location: approximate location (network)Ma Livebox APK Phone: read the status of the phone and identityMa Livebox APK Camera: Photograph : View Wi-Fi connectionsMa Livebox APK Device ID - Call Information: Read phone status and identityMabox LiveBox : run when you start, change your network connection, prevent your device from sleeping, watching Connections, full access to the network, allow Wi-Fi Multicast reception, connection and disconnection from Wi-Fi, receive data from the Internet Allow Wi-Fi Multicast reception: Allows the app to accept packages sent to all devices on the Wi-Fi network using multicast addresses, not just your device. It uses more energy than non-multi-power mode. Approximate location (based on network): allows the app to get an approximate location. This location was obtained by location services using network location sources such as cell towers and Wi-Fi. These location services should be enabled and available for your device to use them. Apps can use this to determine where you are. Changing your network connection: allows the app to change the state of your network connection. Wi-Fi connection and disconnection: Allows the app to connect and disconnect from Wi-Fi hotspots and make changes to the device configuration for Wi-Fi networks. Find accounts on your device: Allows the app to get a list of accounts known on the device. This can include any accounts created by apps you have installed. Full access to the network: allows the app to create network outlets and use custom network protocols. The browser and other apps provide the tools to send data to the Internet, so this permission is not required to send data to the Internet. Sleep Prevention Device:Allows the app to prevent the device from going to sleep. Read the state of the phone and identity: Allows the app to access the device's phone features. This permission allows the app to determine the phone number and iD device, whether the call is active, and the remote number connection to the call. Getting data from the Internet: Allows apps to receive cloud messages to devices sent by the app service. Using this service will hang the use of data. Malware can lead to overuse of data. Running at launch:Allows the app to start itself as soon as the system has finished downloading. This can make it take longer to start the device and allow the app to slow down the overall device that always works. Photo Photos and videos: allows the app to take photos and videos with your camera. This permission allows the app to use the camera at any time without your confirmation. View Network Connections: Allows the app to view network connection information, such as which networks exist and are connected. Wi-Fi Views: Allows the app to view Wi-Fi network information, such as whether Wi-Fi and the name of connected Wi-Fi devices are enabled. Devices.
