Software Device Agent – Download Sports + Iron Man Expedition Style Kids Iron Kids – User Guide Timex Kids Digital – User Guide – Discussion Starter • #1 • May 24, 2010 I got a black one from fleas for \$16.50 (from a fresh corporal in Iraq) but if the straps are not replaced, some work is required. I really only need a bath. Any ideas? (Good cleaning from ultrasonic cleaner) - Remove the strap with the yellow line, keep it fixed to the bar and wear the NATO strap. Otherwise you will have to find an extra broken Humvee to use to fix your ImageShack.us upload..... Discussion Starter • #3 • June 2, 2010 Believe it or not believe it or not but you've learned that a new replacement may be possible. I called hotline watch service 1-800-448-4639 and their instructions told mail on broken straps for Timex, Nautica, or Mark Echo watches: TG Service Center PO Box 8000 Little Rock AR 72203 included \$8 for rubber straps, \$10 for leather, or \$12 for metal and they would send replacements. So I'm going to try it and follow up! - Tell us what the end result looks like--Cheers! :) - Believe it or not, but I found a new replacement is available. I called hotline watch service 1-800-448-4639 and their instructions were said by mail on a broken strap for Timex, Nautica or Mark Echo watches: TG Service Center PO Box 8009 Little Rock AR 72203 included \$8 Rubber straps, leather \$10, metal \$12, replacements will be sent. So I'm going to try it and follow up! Sweet -! - Discussion Starter • #5 • July 3, 2010, we learned that Timex no longer has a black rubber Humvee strap. But they send new pins, so that's a big plus. So I put the black Velcro on the black Velcro and the new beige Velcro on the silver Velcro. They're not actually bad, but the straps almost come out of the loop to fit my hand. As I found Velcro comes pretty fuzzy from the new brand. So if it spreads too much, it will be trimmed with scissors. New straps, awesome! But I'm going to rejuvenate the old rubber strings. It just needs to be riveted again and somehow get a new PVD tang. -! - I know you have the original Timex Humvee part to pursue, and if you're interested I'm more interested in a black Velcro band for an interchangeable Humvee:-! AuthorMessagesx6ConsignierePosts: 5911 Join date: 2009-12-06Age: 54Location: North of Syracuse NYSubject: 90, Timex Humvee... Life with a 75 cent clock. May 03, 2014 10:47 PM This is not really new but I just wanted to add some information to this watch and show my evolution. A few months ago I stopped on a back-to-back sale and picked up a Timex Humvee for 75 cents. It seemed like a good deal for the price. It got a little dirty and worn, but there was originally a band. Here are a few shots of it when I got home. The last one sold for more than \$20k with a pre-Daytona Rolex, so I've liked to see the difference between a \$0.75 watch and a \$20k watch. First I changed the battery with the expectation that it would come to life. These take lithium CR2016. The new battery worked great and the watch came back to life!! I figured out how to set it up (more on that later) and then needed a good cleaning! When I scrubbed the band with a brush to clean up the funk, the band basically collapsed into my hands. Garbage! The rest of the clock cleaned up OK, so I threw in this Velcro band that I couldn't use. It looked ok but it didn't really fit. Next I tried the deep blue rubber strap that was lying around that I didn't use, and although it looked good at the end (basically turning the strap for use in something else), it didn't really capture the 'tough guy' image of a thin watch... Then I found the perfect strap that was always sitting in my strap box. This yellow pipe rubber sail cloth strap was just the right size and looked perfect. I also notched it up, but it's a big deal... This will be someone I slick with. This watch, of course, was Indiglo, has a couple of neat features... Patented Timex back lighting... However, if you press the Indiglo button for about 3 seconds, a beep will sound and 'night mode' will be activated. Press each of the Indiglo buttons The light is provided with the button pressing. Night mode is disabled by pressing the Indiglo button until you beep again. The next neat feature is the screen itself, which can be green, gray, or yellow, depending on the angle and ambient light. This was to increase visibility in all lighting conditions. Here green and gray I will try to get a good shot of pumpkins later. In addition to normal time mode, the watch has a chronograph, two alarms, a countdown timer, and a mode for dual time zones..... So the clock is not a bad everyday piece. After the watch's 'Transformers' or 'LEGO' look, the case is rated at 200MWRI It also has a strange joint end lug that uses long screws to connect the band. I think this actually makes the watch more comfortable and safer on the wrist than the spring bar. A feature that doesn't work well is that the print on the button function is on the side of the case. This makes it difficult to read while wearing, but once you memorize the location, it's not really a problem. I will add more information and photos to this writing as time permits.1995 Timex Humvee User Manual Rites timex customer service..... Below 3 jggs is everything. Life with a 75 cent clock. Tuesday, November 04, 2014 2:50 AM Gary, Holy Cow !!! Fantastic stuff! Have you ever been finding a cooler for the price? Believe! Guess this is a good example of Timex's old saying: it takes a lick, but keep licking here! In fact I think this one was actually better now and then originally. A method to clean is good and adds the strap which is good on the way and is zumi. The strap that originally came with it was not awesome, but it almost seems to be meant to collapse, giving you a new feel for it, and allow you to rent it out for life. What a great story behind this, as well as the work Gary. It shows us all how wonderful this hobby is, what a wonderful, and all-watch it can be. It's really amazing. I appreciate it! Also thanks for the About this TIMEX. I actually didn't know about it, but I definitely have those tough scissors about it, and it looks like I can even threaten G-Shock. The color changes the screen sounds, and looks amazing too. . Yaw, neat stuff once again sir. Expect more!

Tuesday, November 04, 2014 3:29 pm 1997-1998..... Later original ad, Gary Remember we are custodians of mechanical art..... Life with a 75 cent clock. On November 06, 2014, at 9:52 PM, click the Foam link, and then click the photo to get the full size. And Gary, what can you do? Very good you!. Not only is it neat to actually see the instructions for a watch like this, but now anyone who can have this watch will know what they want. Cool stuff sir. Thank you so much

Humvees. Life with a 75 cent clock. Mon 10, 2014 2:32 pm Oh neat Gary, that's great or what?! So much fun! Timex obviously had a lot of thought in advertising, not just the watch. It's so much fun, and it's also wonderful getting to see all this like this. You can't actually get enough of it. . Thank you

Thanks again! Yes Tom, all this fun for just \$ 0.75! (The check strap was a few dollars). I just saw one on ebay in the UK.... For \$156.00 (99 pounds)!! Honestly amazing! Even strap Gary! Hearing about them going too far in the UK should make you feel really good about all this, and like you almost did something away. So good teacher

Tuesday, February 03, 2015 10:29 PM and there were two people!! Basically picked up silver on eBay in mint condition. I ed it with the same strap only with a white stitch. This is a little new, no line on the screen with more time. It is awesome! Later, Gary remembers that we are custodians of mechanical art.... Member NAWCC, National Association of Watches and Watch Collectors Atomic Atomic Senior Consigliere For Atomic: 16008 Subscription Date: 2009-08-25Age: 49 Location: NJ Re: Timex Humvee of 90... Life with a 75 cent clock. February 04, 2015 12:57 AM Hey, this is a wonderful !!! 'assie! You know what they say, two watches of the same model are better than one. . Yes, I just made it, but that's true! Now there are two watches that you can really enjoy here, and it's really neat to see the similarities and differences. That silver finish changed a lot of things by itself! You may notice more details within the case and feel more industrial, as if they were actually made of steel. It's cool how this latest version also had no lines on the screen, with bigger numbers like this also !!! . Another great edition collection here! You!!! Sir huge congratulations but it's cool next to all black models!. Continue to enjoy.

On February 04, 2015, 1:17 a.m. AtomicTom wrote: Better than one. . Yes, I just made it, but that's true! Thanks Tom, that's some fun stuff right here.... There is one more color... desert tan. But when you find one they seem to be very high priced. As well as you can get that one too. I'm not sure why I've taken on these Humvees, I just like wearing them (usually at work) and they're spacious strap..... Later, Gary remembers that we're custodians of mechanical art.... Life with a 75 cent clock. Saturday, March 14, 2015 10:16 PM Oh Neat Gary !!! I found it was only a matter of time! What are you doing now Gary?! . This could be a sleeper hit among the three. I mean silver, with black models really grab your attention from the start. Then suddenly steals a new tan of income, and show imho. The It's very different and, along with the leather straps, it's a particularly eye-catching combo teacher. . In a way, it's more futuristic and industrial. Maybe classy but definitely cool.. Find a big congratulations, and add this one to your family Gary! What I continue to enjoy is comfortable, and also something very cool, and unique that you'll honestly find on everyone's wrist. !!! Congratulations again.

On March 14, 2015 (Small), 5:58 p.m., the tan model was finally acquired. I remember it was the right color and the black already..... Later, Gary and we went with a leather band on this one because we were custodians of mechanical art.....
