It is considered one of the leading trade associations in the IT industry. [1] Based in Downers Grove, Illinois, CompTIA issues supplier-neutral professional certifications in more than 120 countries. The organization publishes more than 50 industry studies each year to track industry trends and changes. Since the association was established, more than 2.2 million people have been certified by CompTIA. [2] History compTIA was created in 1982 as a better computer dealers association (ABCD). [3] ABCD was later changed its name to the Computing Technology Industry Association. [4] In 2010, CompTIA transferred to its world headquarters in Downers Grove, Illinois. The building is designed to meet LEED C1 certification standards. [5] The CompTIA portal moved to a hybrid version of the open access model in April 2014 with dues-only content The move expanded the organization's reach, involving a broader and more diverse set of members, and within a year, CompTIA's membership had increased from 2,050 to more than 50,000 in 2015. [8] By the end of 2016, the organization had more than 100,000 members worldwide. CompTIA started the Dream IT program in 2014 to provide resources for girls and women in the U.S. interested in the IT industry. In October 2015, the programme expanded to the UK. [9] Skillsboost, CompTIA's school online resource, was launched in June 2015. It includes resources for students, parents, and teachers to increase the importance of computer technology. [10] [11] CompTIA hosted its first annual ChannelCon Vendor Summit in 2015. Vendor Summits are only available to those attending ChannelCon, an industry-leading conference for collaboration, education, and networking. Solve problems in the IT industry. [12] In January 2017, CompTIA launched the IT Professional Association based on its acquisition of the Information Technology Professionals Association. [13] [14] Certified CompTIA manages vendor-neutral certification exams through the Pearson VUE Test Center. (Note: CASP+ allows A+ to meet 20-75 CEA. lifetime education units for three years to renew or extend certification.) [15] Basic Authentication CompTIA IT Basic + Certification covers basic IT concepts, basic IT literacy, terminology and concepts in the IT industry. It is considered the first step towards A+ authentication. [16] CompTIA provides cloud essential authentication as a path to cloud+ credentials. [17] A+ certification represents an entry-level competency as a computer technician and is vendor-neutral certification covering a variety of technologies and operating systems. [18] By 2014, more than one million people worldwide were A+ certified. [19] It expires in three years. [20] Certifications certified before January 1, 2011 are considered lifetime good and will not expire. [21] Cloud+: Released in October 2013, including both cloud computing and virtualization. Certified by ANSI and is a map of the DOD 8570 standard. [22] It expires in three years. [20] CySA +: Cybersecurity Analyst: It is released in February, 2017. This certification focuses on cyber threat detection tools and analytics to identify vulnerabilities and risks. CSA+ is certified by ANSI. [23] [24] [25] In January 2018, the certification was renamed CSA+ to CySA+ due to trademark issues. [26] It expires in three years. [20] Linux+: A single test known as XK0-004[27], which can be played through ce programs,[28] Linux covers operating systems, on the basis of corresponding free software and open source licenses from their installation and use. Previously, we worked with the Linux Professional Institute to test the two-part LX0-103 and LX0-104. [29] Network +: Certified by ANSI in 2008. [17] Entry-level authentication is used to measure your skills as a network technician. [30] It expires in three years. [20] Certifications certified before January 1, 2011 are considered lifetime good and will not expire. [21] PenTest +: Medium level authentication focused on penetration testing. Launched on July 31, 2018, PenTest+ covers risk analysis, threat detection, penetration testing, and ethical hacking tools and methodologies. [31] PenTest+ is ANSI and ISO 17024 certified and currently meets DOD 8570 standards. Expires in three years. [20] Project+: In 2001, CompTIA acquired the Project+ Project Management Certification Program from the Gartner Group. The program, formerly called IT Project+, was updated in 2003. [32] [33] Security +: Also certified as ANSI in 2008. [17] Security+ is an entry-level vendor-neutral security certification based on network security knowledge covered by Network+ authentication. [34] It expires in three years. [20] Certifications certified before January 1, 2011 are considered lifetime good and will not expire. [21] Server+: Focuses on server-specific hardware and operating systems, IT environments, disaster recovery, and business continuity. [35] It was developed in 2001 and updates were released in 2005 and 2009. [36] Master-level authentication Advanced Security Practitioner Authentication (CASP) is authentication to follow Security+. The CompTIA Advanced Security Practitioner Certification was certified by the International Organization for Standardization (ISO) and the U.S. National Institute of Standards (ANSI) on December 13, 2011. [17] Casp exams prove that successful candidates have the technical knowledge and skills needed to conceptualize, design, and engineer security solutions in complex enterprise environments. In March 2013, the Department of Defense approved certification with approved baseline certifications for Information Assurance Technology Level III, IS Administrator Level II, and IA System Designers and Engineer Levels I and II. [37] A specially certified certified document imaging architect, or CDIA+, is a certification for document imaging, document management, and enterprise content management competencies. [38] Certified technical trainers or CTT+ certifications are vendor-neutral certifications that apply to training professionals in all industry. Originally managed through Chauncey Laboratories in 2001, the CTT program was acquired by CompTIA and renamed CTT+. It was created through the cooperation of the Information Technology Education Association, Inc. Computer Education Management Association (CedMA). [39] The CompTIA Healthcare IT Technician Certificate was designed for IT professionals who focus on IT in the healthcare industry and install and maintain electronic health records systems. [43] The right to repair CompTIA initially lobbied for the right to repair. [44] On February 21, 2020, CompTIA permanently withdrew from all lobbying activities related to legal repair rights on February 3, 2020. [45] The charity CompTIA founded a 501 (c)(3) charitable foundation called IT Gift Making. [46] In 2012, IT Gift Making worked with the Wounded Warrior Project to provide 5,000 CompTIA certified test vouchers to wounded military veterans. [46] Prior to the certification expiration, CompTIA sold its flagship A+, Network + and Security + certifications as lifetime valid. In January 2011, CompTIA changed the status of these certifications to expire every three years. Under the proposal, accredited individuals would be authorized to re-certify their exams or pay an annual maintenance fee for the Ceu (Unit of Lifelong Education) system. CompTIA has revised its guidelines so that only certificates received after January 1, 2011 must be renewed every three years. However, a certain amount of documented time associated with using authentication automatically renews the authentication. [47] Non-expiring certificates issued before 2011 are officially called Good-for-Life, and getting more updated (expirable) certifications does not replace good certificates for life.
