Gigaware USB to Serial Driver is licensed as freeware for PC or laptop with Windows 32 bit and 64 bit operating system. It is in input devices category and is available to all software users as a free download. I'm trying to use a Gigaware USB> Serial Adapter that worked fine on Windows XP. It doesn't work and I get this device can't start. (Code 10) A device has been specified that does not exist. in device manager. The drivers are up-to-date. What shall I do? Looking for the driver for your RadioShack Gigaware USB to Serial cable? You may have been searching the Internet for some time, but you still can't find this driver. That can be very annoying! But don't worry! This driver can be found. In the following you will find two how to easily download and install the Gigaware USB to Serial cable driver. Methods to tryOutThere are two ways to get your USB-to-serial cable driver: manual and automatic... Manually download and install your Gigaware USB to Serial cable driver - you can manually update your driver by clicking and search for the latest driver for your USB-to-serial cable. But if you choose this approach, be sure to choose the driver that is compatible with the exact model number of your hardware, and download your version of Windows.or and install your Gigaware USB to Serial cable driver automatically – if you don't have the time, patience, or computer skills to manually update your driver, you can do it automatically with Driver Easy instead. You don't need to know exactly which system your computer is running, you don't have to risk downloading and installing the wrong driver, and you don't have to worry about making a mistake during installation. Driver Easy handles everything. Download and install Driver Easy.Run Driver Easy and click the Scan Now button. Driver Easy then scans your computer and detects all problem drivers. Click the Update button next to the USB-to-Serial cable driver to download the correct version of the driver, and then you can install it manually. Or click the Update All button at the bottom right to automatically update all drivers. (This requires the Pro version - you will be prompted to upgrade when you click Update All. You get full support and a 30-day money back guarantee.) You can do it for free if you want, but it's partly manual. Manually.
