Ice chest with wheels amazon

Here at the strategist, we like to think of ourselves as crazy (in a good way) about the things we buy, but as much as we would like, we can't try everything. That's why we have People's Choice, which we find the most peer-reviewed products and get the most convincing. (You can learn more about our rating system and how we choose each item here.) And while we've written about many coolers and fridges before - including wine fridges, a beach cooler and mini fridges - here we've overtaken the best wheel coolers as praised by the most enthusiastic reviewers on Amazon. We used this umpteen times cooler: beach, forest, family gatherings, camping, - writes one reviewer who calls this cooler unique because the white super-heavier plastic liner is easy to wash. He also notes that it's very easy to to tot around. And many other five-star reviewers talk about the functionality of this Coleman. After trying it out on a week-long trip, one customer reports: Not only did he do a great job of keeping things cold, but it's small enough to carry on easily. He notes that it took about 15 seconds to clean up. One mom-of-three says this cooler was a lifesason, and put it to the ultimate test: Going to the beach alone isn't fun with so many things. I was able to pack lunch, drinks, snacks and ice to keep everything cold and roll it around with ease. Well, except over the sand. Because, well, it's sand. But, it fits so much! Coleman 40-Quart Wheeled Cooler For such a low-cost cooler, reviewers were shocked at how long it kept the ice frozen. The big boy kept the ice for at least four days straight. This little guy is just as inspiring, writes one content customer who bought this for day trips to and from the lake (walking in and out). He admits he only needed to hold the ice for one day, but was amazed that he kept the ice much longer. It also describes it as durable, well built, compact and practical, and works great to keep our things cold throughout the day. Another finds it great during the trip. While she wouldn't expect to feed the football team out of her, she believes it's perfect for a picnic or two. A third reviewer even calls it the best cooler I've ever bought, explaining: He kept food cold even on 16-hour drives. Also, it's easy for me to get in and out of our van. Also, it's easy to get it in your home or accommodation, especially for those of us with knee and back problems, just grab a pen and get rolling. And now for some micro-picks for each type of cooler with wheels you can search for. While the downpour is not unique to this cooler, reviewers say this downpour works better than others they've used before. One calls this feature distinctive, explaining: We're lucky enough to have a slight tilt everywhere we've gone, but I don't think that would be a problem, even if we didn't. By habit I would raise it to get the last bit and it was rarely more than a drop. He even thinks it's as good as more expensive models, especially because this cooler won't make you strain your back when raising it. Another reviewer calls it a very simple and affordable solution for needing a larger or additional fridge for entertaining. He agrees: There's no need to spend money on a crazy expensive cooler if you can't buy ice except every few days while camping. He adds: Easy to move? Yup. Any worries when people sit on it (they will, they always do)? No. Drain to easily clear melted ice? Check. More than 20 percent of five-star reviewers use words big, big or huge, in their reviews, and the general consensus is that it's particularly roomy. One reviewer says: It holds up to 64 bottles of water and four bags of ice, making it ideal for camping or large family outings. A reviewer who has used Coleman's coolers previously says it does a great job of holding ice and cold temperatures even in the summer heat of Florida. Wheels make transporting it easy. So can it keep your food for two to three days of camping trips? Yes, it can. A third reviewer warns that when it's full and packed with ice, it's HEAVY, but it's still a great cooler. Ice did not melt hardly on the disc and not completely until four days later, even with us in and out of it constantly getting drinks. This thing keeps tons of things and is pretty durable. Reviewers prefer this cooler for road trips because it's relatively small, but it still keeps enough stuff (and keeps it cool) for the long trip. We bought it for a trip for three weeks and it got up to the daily boot in and out of the car. The wheels are amazing. Size is fantastic,' writes one reviewer, who also calls it perfect. And once you arrive at your destination, many reviewers say it's easy to roll around. One of the reviewers took this cooler campsite and reports that he travels well around all terrain. He explains: I dragged this thing through rocks/sand/grass/dirt full to the edges seamlessly. Another small feature that gets a lot of love is the built-in cup holder on the lid: Sometimes we use it as a mini-camping table, and owners come in handy not just for drinks but small items or phones as well. YETI Tundra Haul Portable Wheel Cooler If you just want Yeti, reviewers report that this version can hold ice for eight days. Everyone always jokes about it's expensive and fashionable, but they've earned their bragging rights,' says one reviewer who says his ice has stayed on week in summer. One calls it a working home because of how well it functions, writing: After years of buying what I considered worthy coolers and having to replace them for a year or two, I wondered, why not?! Well, I'm using a cooler almost insanity since Memorial Day weekend, and it exceeded my expectations. He initially bought two blocks of ice for the holiday weekend, and Yeti's contents remained cold for five-plus days. And another agrees that it's worth the price, calling it the absolutely best cooler on the market. He adds: From the cutouts on the lid so that it stays tied in the truck to the fact that it holds the ice for eight days, what else could you want? It's tight, doesn't move around in the bed of the truck (no belts), and holds 220 pounds bags of ice. In fact good deals, smart shopping tips, and exclusive discounts. The strategist is designed to surface the most useful, expert recommendations for things to buy across the vast e-commerce landscape. Some of our recent subcorations include the best acne treatments, luggage hire, side sleeper pillows, natural anxiety products, and bath towels.
