## Furnas pressure switch 69wa4

Review of PEX Privacy Policy FURNAS Electric 69WA4 Pressure Switch Type Simple: TBD designed to be the most compatible switch on the market, 69J offers user flexibility to build pressure switches around compressors, not the other way around. The drainer can be mounted on the sides, and can rotate to any of the eight different positions, allowing for faster assembly and shorter tubes. The bottom entry frame is also available with built-in strain relief clamps for even faster assembly. With thousands of variations right off the production line, 69J provides maximum flexibility at a minimum cost. Download datasheet (PDF) When you accept your quote and confirm your order, we are prepared by recovering related parts and components from our inventory. Anything we don't currently have in stock is the source. Once received, inspect all the parts visually for damage and then take photos to document your situation. Parts obtained from vendors must meet our quality standards. Industrial computer boards and other parts we are equipped to evaluate are tested to check performance and detect possible damage. Industrial computer boards have all the components replaced with low MTBF numbers (such as capsules and connectors) and washed in our PCB cleaner to remove dust and makeup. Industrial computer boards are fully detected and repaired by our engineers. Logs of problems encountered and implemented solutions have been recorded. The industrial computer board has all the hard-tested I/O connections to ensure that everything is working properly before the board is certified as ready to ship. After the photos are taken to document the outer state of the part, it is packed and sent to the customer. Safe ESD materials are used to protect sensitive equipment on your journey.
