Finder is not responsible for how your stock executes. Historically from \$7.7 to 2020-11-16 1 week (2020-12-24)-15.38% 1 month (2020-12-03)-13.39% 3 months (10) 2020-10-02 % 6 months (24.60) 3 years (2020-07-02) -29 41% 2 years (2020-01-03) 30.19% 1 year (j) 2019-01-03 5 years (3.08) 2018-01-03 Is a country health related to a country- the health care stock of the country is unbelievably difficult, and any metric is a major body of the health care of the country should be seen as part of Performance. However, analysts usually use some important metrics to help measure the value of a stock. The price of the country's healthcare/income to the growth ratio of the country's healthcare can be counted by its P/E ratio distribution by its development-2.7368. A lower ratio means that shares can be offered a better price, while higher proportions mean that the shares can be offered a worse price. The leaf ratio provides a broader approach than the P/E ratio only, as it gives more insight into the future profits of the country's healthcare. By accounting for development, if you are comparing the share prices of more than one high growth companies, it can also help you. The Ebit DA-A-Country Health Care Budget of The Country's Health Care Is \$24.1 Million (Income Before Interest, Tax, Reduction and Omustasation). Ebit DA Is A Way Of Gross Financial Performance Of The Country's Healthcare And Is Widely Used To Measure Its Profits. Revenue TTM USD \$635.9 million Operating Margins TTM 1.8% Total Profit TTM USD \$204 Million Return on Asset sp.TTM 2.49% Return to TTM-11.24% Profit Margins-2.24% Book Value \$4.102 Market Investment US\$341.8 million TTM. Follow 12 months Short interest of Shortang-12-Country Healthcare Shares currently held short by 568,244 business-country care stock investors- This is known as the healthcare of the country. This figure is from 19.8% to 474,186 last month. There are a few different ways that this level of interest in Shares of Shortang-E-Country Care can be assessed. The ratio of the small interest in the healthcare of the country to the (sic) the ratio of the small interest of the healthcare of the country to the country is presently the proportion of the share of the healthcare of the country which is divided by the average volume of trade shares daily (recently around 373844.73684211). The head of the country's healthcare is currently standing at 1.52. For every 100,000-crore country's healthcare shares, in other words, traded daily on the market, around 1520 shares are currently held briefly. However, the short interest of the care of the country can also be assessed against the total number of shares of the country's healthcare, or, against the total number of foreign-able discare shares (shares that are insadars or large long-term shareholders) Are not held by -- also known as float in this case the express edu can be expressed as a short interest in the health care of the country 0.02% of the outstanding shares (for every 100,000 in existence, Approximately 20 shares are currently held short) or 0.0191% of foreign-shareable shares (according to every 100,000 shares of the country's healthcare shares such low head generality of a hopeful price For outlook points, less people are currently ready to bet against the land of the land Learn more about how you can stock the health care of the country in the country. We are not expecting to pay a dividend over the next 12 months to take care of the country. The country's healthcare shares share price instability over the past 12 months, with the across-the-country care shares added up to \$13.42 a bit of price up to \$4.5. A popular way to assess stock instability is his son. The Crayon American Instability (Son: 1.12) Abg. Instability (beta: 1.00) is a way of instability of a part in the Lohai Beta market. The market (THE NADAQ average) is beta 1, while the health care of the country is 1.1223. It would suggest that the shares of the country's healthcare are slightly more stable than the average for this exchange and represent, relatively speaking, slightly higher risk (but possibly also market rate returns).
