DONKEY KONG * Frogger * Tetris * Asteroids * Simon * Donkey Kong * Space Invaders * Tic Tac Toe * PacMan * Other Neave Games One of Nintendo's first major games to be released after turning manufacturing playing cards into a fully fledged video game company, Donkey Kong was created by shigeru Miyamoto i celebrates 30. The character is still much loved among Nintenda fans and, after all these years, continues to play in some of the biggest games for the company's consoles. To celebrate the many years of this iconic character and his debut game, we have mliad a list of the generation of games that Donkey Kong has played in and please leave a comment below on your favorite Donkey Kong moment! The original Donkey Kong Games In 1981, the first Game of Donkey Kong was released in arcades and it was not only a game in which we were presented to the icon of the monkey, but also the first time we introduced ourselves to Mari. Two years later the game will be released on nintendo entertainment system and further increase the market and popularity of video games. The game was then and now so iconic, it's still playing championships, and there was even a documentary based on a game known as The King of Congo: A Handful of Quarters. One year later it came out another year and saw you play Donkey Kong Junior instead of Mario and this particular game saw Nintendo Nintendo Entertainment System an exclusive game that included solving mathematical problems while reaching the top of each level. The third game was made for arcades in 1983, as well as some games and watch, made during the 1980s, before the monkey took a long break, while Mario became the popular creation that the gamers wanted to play. Donkey Kong Country Games When Nintendo's 16-bit console was released and continued to develop the video game industry, Few tried to bring back Donkey Kong and put it in its platformer and did other characters, including Kranky Kong and Diddy Kong. The game was Donkey Kng Country and was a great success with Redki, who decided to do two successions with the same elements of gameplay, such as riding different animals and making each level different from the last. An animated television series was made, which even managed to broadcast in a mix of countries for two years before being released on VHS cassettes and DVDs. The same company that metroid Prime games would be made last year's Donkey Kong Country Returns for the Wii and has managed to become very successful among gamers and critics like. N64 Donkey Kong Games Between N64 and Playstation's reigning 3D graphics, Rare has been the most popular in this generation with games such as GoldenEye 007, Banjo-Kazooie, Perfect Dark and Conker's Bad Fur Day. But they continue to push Donkey Kong characters into the market and while they are only two from these games are both very much loved even today?fans. The first was Diddy Kong Racing and is one of the few games that Donkey Kong's sidekick managed to get its title and this countdown racing game is one of mario kart's closest competitors games, with the ability to drive a car, hovercraft or plane all over the course. The second game was Donkey Kong 64 and was also one of the first games to use the extra Expansion Pak. Following in the footsteps of a large platforming gameplay from Banjo-Kazooie, the game was another hit for the popular console and is also one of the few games within the series to have multiplayer. Handheld Donkey Kong Games Although the popularity of the original Donkey Kong game saw Nintendo make some games with the title character for the game and watch the handheld console, there was a surprising amount of handheld games for Donkey Kong. GameBoy had this?own version of the original arcade game and Rare is even a series of Donkey Kong games exclusive to the console known as Donkey Kong Land, which was treated more like a portable version of the game Donkey Kong Country. Mario vs. Donkey Kong started at GameBoy Advance, which saw Donkey Kong and Mario fight out again using the igranks themselves to solve puzzles and challenges that became so popular that DS saw some guidance that had some tweaked and improved gameplay elements. While DK King of Swing and DK Jungle Climber was released for GameBoy Advance and DS, they were out-shined by a number of puzzle games that tried to fit in and generally, players just wanted to play more Mario vs. Donkey Kong games. Bongo Games With the popular music game Guitar Hero reigns over PlayStation 2, Nintendo wanted to break into the music genre and introduce a plastic barrel fringe for GameCube. It didn't sell as well as Nintendo had hoped, but it saw Donkey Kong star in three musical games from Namco called the Donkey Kong series and Nintendo even tried to push Bongo drums to sell with crazy platformer Jungle Beat. Even with Guitar Hero beating Nintendo's attempt to get into the music game market, the control system of drums was visible on the Donkey Kong Barrel Blast for the Wii, after Nintendo decided to release it on the Wii instead of GameCube and was ultimately a failure from Donkey Kong fans and critics as they did. jeux gratuits jeux d'aventure jeux de héros jeux d'arcade jeux de Mario jeux à score jeux de plateforme jeux Retro-Gaming Avec Pacman, Donkey Kong est certainement l'un des plus anciens jeux vidéo. Super Mario y faisait même sa première apparition ! Allez-y rien que pour le petit moment de nostalgie, où ce jeu hyper simple nous paraissait fantastique ! Le but du jeu est simple : faire installer Mario aussi haut que possible en lui évitant de recevoir un projectile Head. To move the plumber, use the ARROW KEYS and SPACEBAR to jump... Sounds fast, but it's not that fast! Be careful from the beginning of the game, click in the window, otherwise the arrow keys are not always activated... Donkey Kong is the result of the game, so don't forget to sign up before you start the game! The Donkey Kong game will take you back a few decades... Indeed, created by Nintendo in 1981, this game was a huge success and nostalgia will be able to relive the forgotten sensations here! To play it is simple: use the ARROW KEYS to steer Mario and SPACEBAR to blow it up. Get up as fast and as high as you can! Good Mario game! This game is part of our choice of scoring game, so you know what you need to do! How am I supposed to play? Move MarioSauter Sign up or sign up so you can save your score on Donkey Kong! :) 1st sandystefou Review: 154200 2. Rating: 127500 3rd foxxx Review score: 66000 4. Posted by calot quite hard Posted by Simon2006 Awesome but there is no level where what? Posted by progaming c too slow e c to zero Posted by cyprien565 bof Posted by quent12002 preo well Posted by mute1 too durr!!! Posted by Lilianito a old game - OK! But we've come in 1 times out of 10!!! He's going back to my space invaders on my pac-man, eh! Posted by Alric C really is an old and good game, but the thing about it is that you start playing and you lose without stopping you can not stop still not continuing? Posted by RAVYWILSON vieu but top posted by erichard2 an antique but know the top! about 17th century published redouane1224 is well posted 1dydy c nule Posted by INDOSHINE name and strange should be called mario-jump, but the game and genial posted by Emil 2014 this is great posted by Marydu59 normal game should seem jumpman, so a hundred is this character renamed mario kasne (you were a bad) very good game Posted by moriarty a very old but cool game! Posted by edr se the game is too coooo! Posted by lolitabella too NUL!!!!!! Posted by AMAR21 this game is great but damage not to move to the next level ect...) Post a pair of torch61 tros cool!!! Pac-man Play Guitar with Google! Really fantastic! Guitar Google Snake Game! Snake game Believe it or not, I know your location! My location Are you having enough fun with Google Mirror? Check bing mirror then! Bing Mirror You know you remember Donkey Kong! Not the one from Donkey Kong, but the old donkey kong old school that kidnapped the princess and fought Mario. This is a remake of the original donky kong arcade game. You can only play the first whiteboard in this version of Donkey Kong, but it's still fun! You play the role of mario and you must navigate up the ladder to save the princess. As you make an ascent, Donkey Kong will throw barrels at you, so you have to be quick and jump over them to avoid the game more. It's hard to judge when to climb the ladder and when to wait. The barrels don't necessarily fall up the ladder, so be careful! As if that wasn't hard enough, Donkey Kong will start a metal barrel that will ignite a flame-dead man who will slowly chase you from behind. The closer you get to Donkey Kong, the harder it's going to be than the barrels will be in the waves right now. Point.
